Item-27	Any other items and valuable suggestions of Members
Discussion	<ul style="list-style-type: none"> • The members were appreciative of all the unique measures taken by the Head of the institution and the support rendered by the management • Dr. P. Lakshmi suggested to recruit a few more Tamil faculty to cater to the entire batch of 1st year students. • Both Dr. P. Lakshmi and Dr. V. Geetha recommended to retain UG & PG courses in Core Engineering Branches and added that they both hold a good potential for recruitment. They also suggested that in 'Travel Grant' data, the beneficiaries of International and National categories may be separately highlighted with number of Faculty and Students benefitted. • They further added that peer group learning and experimentation in cross disciplines may be fully utilized using the IDEA Lab. • Dr. V. Geetha remarked that students may be observed closely at the entry level itself; faculty may interact with them to find their passion, if they have joined the course on their own or under compulsion and they may also be enthused that though they may be forced into the course choice, they still have a lot of avenues to pursue their passion by enrolling in 'Open elective' courses/ Minor or Honours Courses and involving in inter-disciplinary projects or even explore national or international certifications in the domain of their choice. All these small steps will in due course help them build their resume strongly. • All complex issues may be addressed in the 1st year itself and the students may feel happy and relaxed to explore growth possibilities. • The character of Students should evolve naturally, helping them with kindness to keep track of their attitudinal changes and when that happens, find some mentor to discuss and resolve all issues. Their failures and frustrations may be addressed through mentoring.

	<ul style="list-style-type: none"> • Dr. P. Parthiban added that students in the computational domains may also be empowered with good managerial skills. • He further emphasized that if we are successful in triggering students' curiosity and help them channel it in research and innovation, their growth will be unstoppable. • The academic team's publication and patenting profile should be increased on a regular basis • They may be motivated to publish in SCOPUS journals under Q1, Q2; a separate team may work vigorously and focus on quality research and publications. Principal responded that there is already a center exclusively working on research and innovation. • The expert members appreciated that KSRCT's growth is improving every year. • They voiced their concern that all the best brains are moving to technology and research is slowing down; a strong collaborative team working closely with industries alone can be the remedy for the current scenario.
Resolution	The members of governing body noted the details and appreciated the institution's many valid initiatives taken in the interest of students.

The Principal and Member Secretary of the Governing Body expressed gratitude to all members for their valuable suggestions and effective coordination.
