K. S. Rangasamy College of Technology

(Autonomous)

CURRICULUM AND SYLLABI

FOR

B.E. Computer Science and Engineering

(Artificial Intelligence and Machine Learning)

(For the batch admitted in 2024 – 2025)

R2022

Accredited by NAAC with A++ Grade, Approved by AICTE, Affiliated to Anna University, Chennai.

> KSR Kalvi Nagar, Tiruchengode – 637 215. Namakkal District, Tamil Nadu, India.

Department of CSE (Artificial Intelligence and Machine Learning)

VISION

• To produce competent software professionals, academicians and researchers through Quality Education.

MISSION

- To produce competent software developers, system designers and network programmers through innovative teaching-learning practices.
- To keep abreast of the latest developments and technological transformations in computer science and engineering for social benefits.

Program Educational Objectives (PEOs) for B.E. CSE (AIML) Programme

PEO1:

Graduates will provide effective solutions for software and hardware industries by applying the concepts of basic science and engineering fundamentals.

PEO2:

Graduates will be professionally competent and successful in their career through life-long learning.

PEO3:

Graduates will contribute individually or as member of a team in handling projects and demonstrate social responsibility and professional ethics.

PROGRAMME OUTCOMES (POs) Engineering Graduates will be able to:

PO1: Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2: Problem analysis: Identify, formulate, review research literature, and Analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3: Design /development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4: Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5: Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PO6: The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7: Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO8: Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9: Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10: Communication: Communicate effectively on complex engineering activities with the engineering Community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11: Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one 's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12: Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

M

Program Specific Outcomes (PSOs) for B.E. CSE (AIML) Programme

Engineering Graduates will be able to:

PSO1: Apply standard Software Engineering practices and strategies in software project development using open-source programming environment and deliver a quality product for business success.

PSO2: Analyse and Interpret data by applying advanced data analytic models for decision making in Complex Problems and facilitate inter disciplinary research.

MAPPING OF PROGRAMME EDUCATIONAL OBJECTIVES (PEOs) WITH PROGRAMME OUTCOMES (POs)

The B.E. CSE (Artificial Intelligence and Machine Learning) Programme outcomes leading to the achievement of the objectives are summarized in the following Table.

Programme					Pro	gramn	ne Out	comes				
Educational Objectives	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
PEO1	3	1	3	2	2	1	1	1	2	2	3	1
PEO2	3	3	3	2	2	1	1	1	2	2	3	1
PEO3	3	2	3	2	2	1	1	1	3	2	3	1

Contributions: 1-low, 2- medium, 3-high

^{*} General Elective - Extra credit is offered

HS - HUMANITIES AND SOCIAL SCIENCES

BS - BASIC SCIENCE

ES - ENGINEERING SCIENCES

PC - PROFESSIONAL CORE

PE - PROFESSIONAL ELECTIVES

MC - MANDATORY COURSES

AC - AUDIT COURSES

OE - OPEN ELECTIVES

CG - CAREER GUIDANCE COURSES

 Open Electives are courses offered by different departments that do not have any pre requisites and could be of interest to students of any branch

K.S. RANGASAMY COLLEGE OF TECHNOLOGY, TIRUCHENGODE -637215 (An Autonomous Institution affiliated to Anna University)

HUMANITIES AND SOCIAL SCIENCE (HS)

S.No.	Course Code	Course Title	Category	Contact Periods	L	Т	Р	С	Prerequisite
1.	60 EN 001	Professional English-I	HS	3	1	0	2	2	Basic knowledge of reading and writing in English
2.	60 EN 002	Professional English-II	HS	3	1	0	2	2	Basic knowledge of reading and writing in English and should have completed Professional English I
3.	60 HS 002	Engineering Economics and Financial Accounting	HS	3	3	0	0	3	NIL

BASIC SCIENCE (BS)

S.No.	Course Code	Course Title	Category	Contact Periods	L	Т	Р	С	Prerequisite
1.	60 MA 001	Matrices and Calculus	BS	5	3	1	0	4	NIL
2.	60 MA 006	Linear Algebra and Discrete Mathematics	BS	5	3	1	0	4	NIL
3.	60 PH 004	Physics for Computer Technology	BS	3	3	0	0	3	NIL
4.	60 CH 004	Engineering Chemistry	BS	3	3	0	0	3	NIL
5.	60 CP 0P2	Engineering Physics and Chemistry Laboratory	BS	4	0	0	4	2	NIL
6.	60 MA 014	Probability and Random Processes	BS	5	3	1	0	4	NIL
7.	60 MA 020	Inferential Statistics and Numerical Methods	BS	5	3	1	0	4	NIL

ENGINEERING SCIENCES (ES)

S.No.	Course Code	Course Title	Category	Contact Periods	L	Т	Р	С	Prerequisite
1.	I DU ALI UUI	Foundations of Artificial Intelligence	ES	3	3	0	0	3	NIL
2.	60 ME 002	Engineering Graphics	ES	6	2	0	4	4	NIL
3.	60 CS 001	C Programming	ES	3	3	0	0	3	NIL
4.	60 CS 0P1	C Programming Laboratory	ES	4	0	0	4	2	NIL
5.	61 ME NOT	Fabrication and Reverse Engineering Laboratory	ES	4	0	0	4	2	NIL
6.		Basic Electrical and Electronics Engineering	ES	3	3	0	0	3	NIL

PROFESSIONAL CORE (PC)

S. No	Course Code	Course Title	Category	Contact Periods	L	Т	Р	С	Prerequisite
1.	60 IT 001	Python Programming	PC	5	3	1	0	4	Basic Knowledge of mathematics and programming
2.	60 IT 0P1	Python Programming Laboratory	PC	4	0	0	4	2	Basic Knowledge of mathematics and programming
3.	60 CS 003	Data Structures	PC	3	3	0	0	3	Basic knowledge of mathematics and programming language in C
4.	60 CS 004	Java Programming	PC	3	3	0	0	3	Basic knowledge of any programming language with ability to solve logical problems
5.	60 AM 301	Formal Language and Automata Theory	PC	5	3	1	0	4	Basic Knowledge of mathematics and Computer Systems
6.	62 AM 302	Computer Architecture	PC	3	3	0	0	3	Basic knowledge of Software and Hardware
7.	61 CS 0P3	Data Structures Laboratory	PC	4	0	0	4	2	Basic knowledge of mathematics and programming language in C
8.	60 CS 0P4	Java Programming Laboratory	PC	4	0	0	4	2	Basic knowledge of any programming language with ability to solve logical problems
9.	60 IT 002	Design and Analysis of Algorithms	PC	3	3	0	0	3	Basic knowledge of Data Structures and Computer programming
10.	61 AM 401	Artificial Intelligence	PC	3	3	0	0	3	Basic knowledge of Computer programming and algorithms
11.	61 AM 402	Software Engineering	PC	4	2	0	2	3	NIL

S. No	Course Code	Course Title	Category	Contact Periods	L	Т	Р	С	Prerequisite
12.	60 AM 403	Database Management Systems	PC	3	3	0	0	3	Basic Knowledge of Data Storage and Management
13.	60 AM 4P1	Artificial Intelligence Laboratory	PC	4	0	0	4	2	Basic Knowledge of Computer Programming and Algorithms
14.	60 AM 4P2	Database Management Systems Laboratory	PC	4	0	0	4	2	Basic Knowledge of Data Storage and Management
15.	60 AM 001	Machine Learning Techniques	PC	3	3	0	0	3	NIL

18.	60 IT 003	Design Thinking	PC	4	2	0	2	3	Basic Knowledge of Mathematics and Programming
19.	60 AM 0P1	Machine Learning Techniques Laboratory	PC	4	0	0	4	2	NIL
20.	60 AM 5P1	Network Infrastructure Laboratory	PC	4	0	0	4	2	NIL
21.	60 AM 601	Visual Analytics in Al	PC	3	3	0	0	3	NIL
22.	60 AM 602	Deep Learning	PC	3	3	0	0	3	Basic Knowledge of Machine Learning
23.	60 AM 603	Web Technology	PC	5	1	0	4	3	NIL
24.	60 AM 6P1	Visual Analytics in Al Laboratory	PC	4	0	0	4	2	NIL
25.	60 AM 6P2	Deep Learning Laboratory	PC	4	0	0	4	2	Basic knowledge of Machine Learning Concepts
26.	60 AM 701	Machine vision	PC	3	3	0	0	3	Basic Knowledge of Machine Learning and Visualization Techniques.
27.	60 AM 702	Speech and Language Processing	PC	3	3	0	0	3	Basic Knowledge of Deep Learning and ML Concepts.
28.	60 AM 703	Explainable Al	PC	3	3	0	0	3	NIL

S. No	Course Code	Course Title	Category	Contact Periods	L	Т	Р	С	Prerequisite
29.		Machine vision Laboratory	PC	4	0	0	4	2	Basic Knowledge of Machine Learning and Visualization Techniques.
30.		Speech and Language Processing Laboratory	PC	4	0	0	4	2	NIL

PROFESSIONAL ELECTIVES

SEMESTER V, ELECTIVE I

S.No.	Course Code	Course Title	Category	Contact Periods	L	Т	Р	С	Prerequisite
1.	60 AM E11	Exploratory Data Analysis	PE	4	2	0	2	3	Basic Understanding of Statistics and Probability.
2.	60 AM E12	App Development	PE	4	2	0	2	3	Basic Knowledge of Java Programming.
3.	60 AM E13	Ethical Hacking	PE	4	2	0	2	3	Basic Knowledge of Network Protocols and Architectures.
4.	60 AM E14	Augmented Reality/Virtual Reality	PE	4	2	0	2	3	Basic Understanding of spatial Mathematics and Physics concepts.
5.	60 AM E15	Cyber Security	PE	4	2	0	2	3	Basic Knowledge of Network Security Protocols and Architectures.
6.	60 AM E16	Knowledge Engineering	PE	4	2	0	2	3	Basic Knowledge of Artificial Intelligence.

SEMESTER VI, ELECTIVE II

S.No.	Course Code	Course Title	Category	Contact Periods	L	Т	Р	С	Prerequisite
1.	60 AM E21	Recommender Systems	PE	4	2	0	2	3	Basic Knowledge of Machine Learning
2.		Cloud Services Management	PE	4	2	0	2	3	Basic Understanding of IT Concepts.
3.	60 AM E23	Digital and Mobile Forensics	PE	4	2	0	2	3	Proficiency in Computer Systems and Mobile Operating

4.	60 AM E24	Multimedia and Animation	PE	4	2	0	2	3	Basic Knowledge of Design Principles and Visual Storytelling.
5.	60 AM E25	Quantum Computing	PE	4	2	0	2	3	Basic Understanding of Quantum Mechanics Principles.
6.	60 AM E26	Soft Computing	PE	4	2	0	2	3	Basic Knowledge of Al Concepts and basic Understanding of Calculus,Statistics.

SEMESTER VII, ELECTIVE III

S.No.	Course Code	Course Title	Category	Contact Periods	L	Т	Р	С	Prerequisite
1.	60 AM E31	Text and Speech Analysis	PE	3	3	0	0	3	Understanding of Linguistic Concepts, including Syntax and Semantics.
2.	60 AM E32	UI and UX Design	PE	3	3	0	0	3	Knowledge of Fundamental Design Concepts including color theory and layout Principles.
3.	60 AM E33	Social Network Security	PE	3	3	0	0	3	Understanding of Network Protocols and Security Measures.
4.	60 AM E34	Video Creation and Editing	PE	3	3	0	0	3	Proficiency in Video Editing Software.
5.	60 AM E35	Cryptocurrency and Blockchain Technologies	PE	3	3	0	0	3	Basic Understanding of Cryptographic Principles.
6.	60 AM E36	Game Theory	PE	3	3	0	0	3	Foundation in Probability and Statistics Concepts.

SEMESTER VII, ELECTIVE IV

S.No.	Course Code	Course Title	Category	Contact Periods	L	Т	Р	С	Prerequisite
1.	60 AM E41	Business Analytics	PE	5	1	0	4	3	Proficiency in Python and SQL.

2.	60 AM E42	Web Application Security	PE	5	1	0	4	3	Basic Understanding of Web Technology.
3.	60 AM E43	Modern Cryptography	PE	5	1	0	4	3	Basic Understanding of Cryptographic Algorithms.
4.	60 AM E44	Digital marketing	PE	5	1	0	4	3	Understanding of basic Marketing Principles and Strategies.
5.	60 AM E45	Game Development	PE	5	1	0	4	3	Proficiency in Languages such as C# and Java.
6.	60 AM E46	Cognitive Science	PE	5	1	0	4	3	Basic Knowledge on Neural Networks.

SEMESTER VIII, ELECTIVE V

S.No.	Course Code	Course Title	Category	Contact Periods	L	Т	Р	С	Prerequisite
1.		Image and Video Analytics	PE	3	3	0	0		Proficiency in Python Libraries such as OpenCV and Tensorflow.
2.	60 AM E52	DevOps	PE	3	3	0	0	3	Basic Knowledge of Linux Systems and Command-line Interface.
3.	60 AM E53	Engineering Secure software systems	PE	3	3	0	0	3	Basic Knowledge on Software Development life cycles.
4.	60 AM E54	Visual Effects	PE	3	3	0	0	3	Basic Knowledge of Design Principles and Visual Storytelling.
5.	60 AM E55	3D Printing and Design	PE	3	3	0	0		Basic Knowledge on 3D Printing Technologies.
6.	60 AM E56	Ethics and Al	PE	3	3	0	0		Proficiency in Python Libraries such as OpenCV and Tensorflow.

SEMESTER VII, AUDIT COURSES (AC)

S.No.	Course Code	Course Title	Category	Contact Periods	L	Т	Р	С	Prerequisite
1.	60 AC 001	Research Skill Development	AC	1	1	0	0	0	NIL

MANDATORY COURSES (MC)

S.No.	Course Code	Course Title	Category	Contact Periods	L	Т	P	С	Prerequisite
1.		Environmental Studies and Climate Change	MC	2	2	0	0	0	NIL
2.	60 MY 002	Universal Human Values	MC	3	3	0	0	3	NIL
3.	60 MY 003	Startups and Entrepreneurship	MC	2	2	0	0	2*	Basic Knowledge of Reading & Writing in English

OPEN ELECTIVES I / II / III (OE)

S.No.	Course Code	Course Title	Category	Contact Periods	L	Т	Р	С	Prerequisite
1.	60 AM L01	Exploratory Data Analysis	OE	3	3	0	0	3	Basic Understanding of Statistics and Probability.
2.	60 AM L02	Al for Energy Conservation and Management	OE	5	1	0	4	3	NIL
3.	60 AM L03	Intelligent AR/VR Systems	OE	5	1	0	4	3	Basic Understanding of spatial Mathematics

LIST OF INTEGRATED COURSES (IC)

	PROFESSIONAL ELECTIVE I										
S.No.	Course Code	Course Title	Category	Contact Periods		Т	Р	С	Prerequisite		
1.	60 AM E11	Exploratory Data Analysis	PE	4	2	0	2	3	Basic Understanding of Statistics and Probability.		
2.	60 AM E12	App Development	PE	4	2	0	2	3	Basic Knowledge of Java Programming.		
3.	60 AM E13	Ethical Hacking	PE	4	2	0	2	3	Basic Knowledge of Network Protocols and Architectures.		
4.	60 AM E14	Augmented Reality/Virtual Reality	PE	4	2	0	2	3	Basic Understanding of spatial Mathematics and Physics concepts.		

5.	60 AM E15	Cyber Security	PE	4	2	0	2	3	Basic Knowledge of Network Security. Protocols and Architectures.
6.	60 AM E16	Knowledge Engineering	PE	4	2	0	2	3	Basic Knowledge of Artificial Intelligence.
		PROFESSIO	NAL ELEC	CTIVE II					
1.	60 AM E21	Recommender Systems	PE	4	2	0	2	3	Basic Knowledge of Machine Learning Concepts.
2.	60 AM E22	Cloud Services Management	PE	4	2	0	2	3	Basic Understanding of IT Concepts.
3.	60 AM E23	Digital and Mobile Forensics	PE	4	2	0	2	3	Proficiency in Computer Systems and Mobile Operating Systems.
4.	60 AM E24	Multimedia and Animation	PE	4	2	0	2	3	Basic Knowledge of Design Principles and Visual Storytelling.
5.	60 AM E25	Quantum Computing	PE	4	2	0	2	3	Basic Understanding of Quantum Mechanics Principles.
6.	60 AM E26	Soft Computing	PE	4	2	0	2	3	Basic Knowledge of Al Concepts and basic Understanding of Calculus, Statistics.

CAREER GUIDANCE COURSES (CG)

S.No.	Course Code	Course Title	Category	Contact Periods	L	Т	Р	С	Prerequisite
1.	60 CG 0P1	Career Skill Development I	CG	2	0	0	2	1*	Basic knowledge of reading and writing in English.
2.	60 CG 0P2	Career Skill Development II	CG	2	0	0	2	1*	Basic knowledge of reading and writing in English

3.	60 CG 0P3	Career Skill Development III	CG	2	0	0	2	1*	Basic knowledge of Arithmetic and Logical Reasoning
4.	60 CG 0P4	Career Skill Development IV	O	2	0	0	2	1*	Basic knowledge of Arithmetic and Logical Reasoning
5.	60 CG 0P5	Comprehensive Test	CG	2	0	0	2	1*	Fundamental Knowledge in all core
6.	60 CG 0P6	Internship *	CG	-	0	0	0	3*	NIL
7.	60 AM 7P3	Project Work – Phase I	CG	4	0	0	4	2	NIL
8.	60 AM 8P1	Project Work – Phase II	CG	16	0	0	16	8	NIL

^{*} Internship – Extra credit is offered

K.S. RANGASAMY COLLEGE OF TECHNOLOGY, TIRUCHENGODE -637215

(An Autonomous Institution affiliated to Anna University)

COURSES OF STUDY

(For the candidates admitted in 2024-2025)

SEMESTER I

S.No.	Course Code	Course Title	Category	Contact Periods	L	Т	Р	С
		Induction Programme	-	-	-	-	-	-
	THEORY							
1	1 60 EN 001 Professional English-I HS 3 1 0 2 2							
2	60 MA 001	Matrices and Calculus	BS	5	3	1	0	4
3	60 AD 001	Foundations of Artificial Intelligence	ES	3	3	0	0	3
4	60 ME 002	Engineering Graphics	ES	6	2	0	4	4
5	60 CS 001	C Programming	ES	3	3	0	0	3
6	60 1/1 / 1011	Environmental Studies and Climate Change	MC	2	2	0	0	0
7	61 GE 001	Heritage of Tamils தமிழர் மரபு*	GE	1	1	0	0	1*
		PRACTICA	ALS			•	•	
8	60 CS 0P1	C Programming Laboratory	ES	4	0	0	4	2
9	61 ME 0P1	Fabrication and Reverse Engineering Laboratory	ES	4	0	0	4	2
		<u> </u>	Total	31	15	01	14	20

Heritage of Tamils & additional 1 credit is offered and not account for CGPA.

I to VII semester

- NCC * Course can be waived with 3 credits in VII semester or offered as extra credits
- NSS/NSO/YRC/RRC/Fine Arts* 3 credits are not accounted for CGPA
- Career Skill Development (CSD) additional credit is offered not accounted for CGPA.

I to VIII semester

• Internship 3 additional credits not accounted for CGPA is offered based on the Internship duration in any of the semester.

SEMESTER II

^{*} CA evaluation pattern will differ from course to course and for different tests. This will have to be declared in advance to students. The department will put a process in place to ensure that the actual test paper follow the declared pattern.

^{**} End Semester Examination will be conducted for maximum marks of 100 and subsequently be reduced to 60 marks for theory End Semester Examination and 40 marks for Practical End Semester Examination.

60 EN 001	Drefessional English I	Category	L	Т	Р	Credit
60 EN 001	Professional English- I	HS	1	0	2	2

Objectives

- To help learners improve their vocabulary and to enable them to use words appropriately in different academic and professional contexts
- To help learners develop strategies that could be adopted while reading texts
- To help learners acquire the ability to speak effectively in English in real life and career related situations
- To equip students with effective speaking and listening skills in English
- To facilitate learners to enhance their writing skills with coherence and appropriate format effectively

Pre-requisites

• Basic knowledge of reading and writing in English.

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Compare and interpret complex academic texts	Understand
CO2	Recall the denotative and connotative meanings of technical texts	Remember
CO3	Interpret definitions, descriptions, narrations, and essays on various	Understand
	topics	
CO4	Express fluently and accurately in formal and informal communicative	Understand
	contexts	
CO5	Summarize their opinions effectively in both oral and written medium of	Understand
	communication

60 MA 001	Matrices and Calculus	Category	L	T	Р	Credit
OU WIA OUT	Matrices and Calculus	BS	3	1	0	4

Objectives

- To familiarize the students with basic concepts in Cayley-Hamilton theorem and orthogonal transformation
- To get exposed to the fundamentals of differential calculus in various methods
- To acquire skills to understand the concepts involved in Jacobians and maxima and minima
- To solve various linear differential equations and method of variation of parameters
- To learn various techniques and methods in solving definite and indefinite integrals

Pre-requisites

• NIL

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Apply the concepts of Cayley-hamilton theorem and orthogonal transformation to the matrix	Apply
CO2	Apply the concepts of differentiation in solving various Engineering problems	Apply
CO3	Obtain Jacobians and maxima and minima of functions of two variables	Apply
CO4	Employ various methods in solving differential equations	Apply
CO5	Apply different techniques to evaluate definite and indefinite integrals	Apply

60 ME 002	Engineering Graphics	Category	L	Т	Р	Credit
OU IVIE UUZ	Engineering Graphics	ES	2	0	4	4

Objectives

- To acquire various concepts of dimensioning, conventions and standards.
- To impart the graphic skills for converting pictorial views of solids in to orthographic views.
- To learn the concept in projection of solids, section of solids and development of different types of surfaces.
- To learn the concept of isometric projection.
- To learn the geometry and topology of engineered components

Pre-requisites

NIL

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Demonstrate the Impact of computer technologies on graphical communication.	Apply
CO2	Convert the pictorial views in to orthographic views using drafting software.	Apply
CO3	Draw the projection of simple solids, true shape of sections and development of surfaces.	Apply
CO4	Construct the isometric projections of objects using drafting software.	Apply
CO5	Interpret a design project illustrating engineering graphical skills.	Apply

- To learn the extensive literature of classical Tamil
- To review the fine arts heritage of Tamil culture
- To realize the contribution of Tamils in Indian freedom struggle

Pre-requisites

NIL

Course Outcomes

On the successful completion of the course, students will be able to

<u> </u>	en the edecederal completion of the educe, stadente will be able to									
CO1	Recognize the extensive literature of Tamil and its classical nature.	Understand								
CO2	Apprehend the heritage of sculpture, painting and musical instruments of ancient people.	Understand								
CO3	Review on folk and martial arts of Tamil people.	Understand								
CO4	Insight thinai concepts, trade and victory of Chozha dynasty.	Understand								
CO5	Realize the contribution of Tamil in Indian freedom struggle, selfesteem movement and siddha medicine.	Understand

பாடத்தின் நோக்கங்கள்:

- தமிழ் மொழியின் இலக்கணச் செறிவைக் கற்றுணர்தல்
- தமிழர் பண்பாட்டின் நுண்கலைகள் பற்றிய ஒரு மீள்பார்வை
- இந்திய சுதந்திரப் போராட்டத்தில் தமிழர்களின் பங்களிப்பை உணருதல்

முன்கூட்டிய துறைசார் அறிவு:

தேவை இல்லை

பாடம் கற்றதின் விளைவுகள்:

பாடத்தை வெற்றிகரமாக கற்று முடித்த பின்பு, மாணவர்களால் முடியும் விளைவுகள்

CO1	தமிழ் மொழியின் செந்தண்மை மற்றும் இலக்கியம் குறித்த தெரிதல்.	புரிதல்
CO2	தமிழர்களின் சிற்பக்கலை, ஓவியக்கலை மற்றும் இசைக்கருவிகள் குறித்த தெளிவு.	புரிதல்
CO3	தமிழர்களின் நாட்டுப்புறக்கலைகள் மற்றும் வீரவிளையாட்டுகள் குறித்த தெளிவு	புரிதல்
CO4	தமிழர்களின் திணைக் கோட்பாடுகள், சங்ககால வணிகம் மற்றும் சோழர்களின் வெற்றிகள் குறித்த தகவல்கள்.	புரிதல்
CO5	இந்திய தேசிய இயக்கம், சுயமரியாதையை இயக்கம் மற்றும் சித்த மருத்துவம் பற்றிய புரிதல்.	புரிதல்

60 CS 0P1	C Programming	Category	L	Т	Р	Credit
60 CS 0F1	Laboratory	ES	0	0	4	2

- To enable the students to apply the concepts of C to solve simple problems
- To use selection and iterative statements in C programs
- To apply the knowledge of library functions in C programming
- To implement the concepts of arrays, functions, structures and pointers in C
- To implement the file handling operations through C

Pre-requisites

NIL

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Implement computational problems using selection and iterative statements	Apply
CO2	Demonstrate C program to manage collection of related data.	Apply
CO3	Design and Implement different ways of passing arguments to functions, Recursion and implement pointers concepts.	Apply
CO4	Develop a C program to manage collection of different data using structures, Union, user-defined data types and preprocessor directives.	Apply
CO5	Demonstrate C program to store and retrieve data using file concepts.	Apply

Reading: Reading advertisements, user manuals and brochures. Writing: Professional emails, Email etiquette - compare and contrast essay. Language Focus: mixed tenses, prepositional phrases, same words used in different contexts and discourse markers	100					
Making Comparisons Listening: Evaluative Listening: Advertisements, Product Descriptions, - Audio / video; filling a graphic organiser (choosing a product or service by comparison) Speaking: Marketing a product, persuasive speech techniques. Reading: Reading advertisements, user manuals and brochures. Writing: Professional emails, Email etiquette - compare and contrast essay. Language Focus: mixed tenses, prepositional phrases, same words used in different contexts and discourse markers						
Listening: Evaluative Listening: Advertisements, Product Descriptions, - Audio / video; filling a graphic organiser (choosing a product or service by comparison) Speaking: Marketing a product, persuasive speech techniques. Reading: Reading advertisements, user manuals and brochures. Writing: Professional emails, Email etiquette - compare and contrast essay. Language Focus: mixed tenses, prepositional phrases, same words used in different contexts and discourse markers	[9]					
Expressing Causal Relations in Speaking and Writing Listening: Listening to longer technical talks and completing— gap filling exercises.						
Listening technical information from podcasts – Listening to process/event descriptions to identify cause & effects. Speaking: Describing and discussing the reasons of accidents or disasters based on news reports. Reading: longer technical texts– cause and effect essays, and letters / emails of complaint, Writing: Writing responses to complaints Language Focus: Active Passive Voice transformations, Infinitive and Gerunds – Word Formation (Noun-Verb-Adj-Adv), Adverbs. Problem Solving	[9]					
Listening: Listening to / watching movie scenes/ documentaries depicting a technical problem and suggesting solutions. Speaking: Group Discussion (based on case studies), - techniques and Strategies. Reading: Case Studies, excerpts from literary texts, news reports etc. Writing: Letter to the Editor, Checklists, Problem solution essay / Argumentative Essay Language Focus: Error correction; If conditional sentences - Compound Words, Sentence Completion.	[9]					
Reporting of Events and Research Listening: Listening Comprehension based on new report and documentaries – Speaking: Interviewing, presenting oral reports, Mini presentations on select topics. Reading: Newspaper articles. Writing: Recommendations, Transcoding, Accident Report, Precis writing and Summarising, and Plagiarism Language Focus: Reported Speech – Modals - Conjunctions- use of Prepositions	[9]					
Total Hours:	45

Course C	ontents and Lecture Schedule	
S. No.	Topics	No. of hours
1	Making Comparisons	
1.1	Evaluative Listening	1
1.2	Product Descriptions and filling a graphic organiser	1
1.3	Marketing a product by using persuasive techniques	2
1.4	Reading advertisements, user manuals and brochures	1
1.5	Writing professional emails	1
1.6	Compare and contrast essay	1
1.7	mixed tenses and prepositional phrases	1
1.8	Same words used in different contexts	1
2.0	Expressing Causal Relations in Speaking and Writing	
2.1	Listening to longer technical talks	1
2.2	Listening to process/event descriptions	1
2.3	Describing and discussing the reasons of accidents or disasters	1
2.4	Reading longer technical texts- cause and effect essays	1
2.5	Writing responses to complaints	1
2.6	Active Passive Voice transformations	2
2.7	Infinitive and Gerunds	1
2.8	Word Formation (Noun-Verb-Adj-Adv), Adverbs.	1
3.0	Problem Solving	
3.1	Listening to documentaries and suggesting solutions	1
3.2	Group Discussion (based on case studies)	2
3.3	Reading Case Studies, excerpts from literary texts and news reports	1
3.4	Letter to the Editor	1
3.5	Checklists	1
3.6	Problem solution and argumentative essays	1
3.7	Error correction and Sentence Completion	1
3.8	If conditional sentences	1
4.0	Reporting of Events and Research	
4.1	Listening Comprehension	1
4.2	Interviewing and presenting oral reports	1
4.3	Mini presentations on select topics	1
4.4	Reading newspaper articles	1
4.5	Recommendations	1
4.6	Transcoding	1
4.7	Precis writing, Summarising and Plagiarism	1
4.8	Reported Speech, Modals	1
4.9	Conjunctions	1
5.0	The Ability to put Ideas or Information Coherently	
5.1	Listening to Formal job interviews	1
5.2	Role plays	2
5.3	Virtual interviews	1
5.4	Reading Company profiles	1
5.5	Writing Statement of Purpose (SoPs)	1
5.6	Writing Résumé	1
5.7	Numerical Adjectives and Relative Clauses - Idioms	1
5.8	question types: Wh/ Yes or No/ and Tags	1
	Total	45

60 MA 006	Linear Algebra and	Category	L	T	Р	Credit
OU WIA OUG	Discrete Mathematics	BS	3	1	0	4

- To gain basic knowledge about linear algebra
- To facilitate different techniques in solving system of vectors
- To perform different operations associated with sets, functions, and relations
- To get exposed to basics of Mathematical logic
- To familiarize the machine intelligence problems based on principle of counting

Pre-requisites

NIL

Course Outcomes

<u> </u>	ecocorar compressor or the ecoroc, etaderite will be able to	
CO1	Interpret the linear algebra concepts in approximations and matrix decompositions.	Apply
CO2	Apply the concepts of basis and dimension in vector spaces.	Apply
CO3	Apply the concepts of relations, functions, and operations on sets.	Apply
CO4	Employ logic principles to evaluate the reliability of a programme.	Apply
CO5	Interpret the counting principles in implementing various programmes.	Apply

60 BH 004	Physics for Computer Technology	Category	L	T	Р	Credit
60 PH 004	(B.E/B.Tech. CSE, IT, AI&DS, AI&ML)	BS	3	0	0	3

- To instil knowledge on physics of semiconductors, determination of charge carriers and device applications
- To enable the students to correlate the theoretical principles with application oriented studies in optoelectronic materials
- To introduce the basics of laser, optical fiber and its applications in information science
- To understand the basic concepts of magnetic materials and its applications
- To inculcate an idea of significance of nano structures, ensuing nano device applications and quantum computing

Pre-requisites

NIL

Course Outcomes

	,	
CO1	Acquire knowledge on basics of semiconductor physics and its applications in various devices	Understand
CO2	Apply the principles of LCD, photo detectors and optoelectronic devices for various engineering applications	Understand
CO3	Realize a strong foundational knowledge in lasers and fiber optics.	Understand
CO4	Impart knowledge on magnetic properties of materials and their applications in data storage.	Understand
CO5	Recognize the basics of quantum structures and their applications and basics of quantum computing	Understand

	(Common to CSE, IT & AIML)	BS	3	0	0	3

- To help the learners to analyse the hardness of water and its removal
- To study the concepts of electrochemistry and its applications
- To explain the characteristics and application of chemical sensors
- To study the working principles of smart materials and its applications
- To learn the concepts of cheminformatics

Pre-requisites

NIL

Course Outcomes

On the successful completion of the course, students will be able to

	,,	
CO1	Identify the types of hardness of water and its removal.	Apply
CO2	Interpret the applications of electro chemistry.	Understand
CO3	Categorize the types of sensors for various applications.	Apply
CO4	Identify the properties, principles and applications of various smart materials in modern technologies.	Understand
CO5	Illustrate the significance of cheminformatics in drug development	Understand

Course	Contents And Lecture Schedule	
S. No.	Topics	No. of Hours
1	Water Technology	
1.1	Introduction – Commercial and Industrial uses of Water	1
1.2	Hardness - Types	1
1.3	Estimation of Hardness of Water by EDTA Method	1
1.4	Internal Conditioning (Colloidal, Phosphate, Calgon and Carbonate)	1
1.5	External Conditioning (Zeolite Process)	1
1.6	Demineralization Process	1
1.7	Desalination Methods (Reverse Osmosis)	1
1.8	Electro dialysis	1
1.9	Flash Evaporation	1
2	Electrochemistry	
2.1	Electrode potential - Nernst Equation - derivation and problems	2
2.2	Reversible and irreversible cells	1
2.3	Types of Electrodes and its applications	1
2.4	Reference electrodes - pH	1
2.5	Conductometric and Potentiometric titrations	1
2.6	Principles of electro plating and electro less plating-	2
2.7	Fabrication process of Printed Circuit Board.	1
3	Chemical Sensors	
3.1	Sensors – Chemical Sensors - Characteristics	1
3.2	Elements and Characterization	1
3.3	Potentiometric Sensors, Amperometric Sensors	1
3.4	Sensors Based on Electrochemical Methods	1
3.5	Electrochemical Biosensors	1
3.6	Optical Biosensors: Enzyme Sensors – Bio affinity Sensors	1
3.7	DNA Sensors. Chemical Sensors as Detectors and Indicators	1
3.8	Indicators for Titration Processes	1
3.9	Separation Methods. Nano technology in chemical sensors.	1
4	Smart Materials	
4.1	Liquid Crystal Polymers - Organic Light Emitting Diode (OLED) - Polythiopene - Working and Applications	1
4.2	Conductive Polymers and Semi Conducting Polymers: Principle and Applications	1
4.3	Organic: Organic Dielectric Material [Polystyrene, PMMA].	1
4.4	Smart Screen Materials: Inorganic Rare Earth Metals [Yttrium, Lanthanum, Cerium]	1
4.5	Conductive Components: Indium Tin Oxide [Properties and Applications] - Touch Screen [Resistive and Capacitive]	1
4.6	Magnetic Storage [Iron Oxide, Cobalt Alloy]	1
4.7	Optical Storage [Photo Chromic Materials] - Solid Storage.	1
4.8	Liquid Crystal Polymers - Organic Light Emitting Diode (OLED) - [polythiopene] - Working and Applications	1
4.9	Conductive Polymers and Semi Conducting Polymers: Principle and Applications	1
5	Cheminformatics	
5.1	Definition – coordinate –bonds –bond length – bond angles – torsional angles – chemical structure –	2

5.2	Definition - conformation - representation of structural information	2
5.3	Linear format – SMILEYF notation – MOL format – PDB format –	1
5.4	Storage of structural data in a database - structural keys	1
5.5	Finger print -canonical structure using chemdraw	1
5.6	Similarity search –sub structure search -	1
5.7	Application of chem-informatics in drugs designing	1

60 EE 001	Basic Electrical and Electronics	Category	L	T	Р	Credit
60 EE 001	Engineering	ES	3	0	0	3

- To familiarize the basic concept on electrical circuits and its various parameters
- To facilitate the various types of electrical machines and their uses
- To gain knowledge on Electrical safety
- To provide exposure on the functions of various semiconductor devices
- To familiarize the use of various measuring instruments

Pre-requisites

• NIL

Course Outcomes

<u> </u>	decertification of the course, stadente will be able to	
CO1	Apply the basic laws of electric circuits to calculate the unknown quantities.	Apply
CO2	Acquire knowledge on different electrical machines and select suitable machines for industrial applications.	Apply
CO3	Express the significance of various components of low voltage electrical installations and create awareness on electrical safety.	Understand
CO4	Demonstrate the operation and characteristics of various semiconductor devices.	Apply
CO5	Interpret the operating principles of measuring instruments and choose suitable instrument for measuring the parameters.	Understand

60 IT 001	Dython Programming	Category	L	Т	Р	Credit
0011 001	Python Programming	PC	3	1	0	4

- To know the basics of programming in Python
- To understand modules and functions
- To study files and exception handling
- To recognize the basic concepts of NumPy
- To create layouts using graphical tools

Pre-requisites

• Basic Knowledge of mathematics and programming

Course Outcomes

CO1	Apply the basics of Python Programming for problem-solving	Apply
CO2	Develop programs using modules and functions	Apply
CO3	Implement programs using file and exception handling	Apply
CO4	Create a solution for real world problems using NumPy arrays	Apply
CO5	Design layouts with GUI toolkits using Tkinter	Apply

Mappi	Mapping with Programme Outcomes														
COs		POs												PSOs	
COS	1	2	3	4	5	6	7	8	9	10	11	12	1	2	3
CO1	3	2	3	3	-		-	-	2	2	2	2	3	3

Course Contents and Lecture Schedule							
S. No.	Topics	No. of hours					
1.0	Introduction	<u>.</u>					
1.1	Introduction to Python	1					
1.2	Basic Data Types	1					
1.3	Strings						
1.4	List	1					
1.5	Tuples	1					
1.6	Dictionaries	1					
1.7	Basic Operators	1					
1.8	Decision Making Statements	1					
1.9	Looping Statements	1					
2.0	Modular Design						
2.1	Modules	1					
2.2	Python module	1					
2.3	Namespaces	1					
2.4	Importing modules	1					
2.5	Loading and Execution	1					
2.6	Program Routine	1					
2.7	Functions	1					
2.8	Parameter Passing Types	1					
2.9	Recursion	1					
3.0	Files and Exception Handling						
3.1	Introduction	1					
3.2	Data Streams	1					
3.3	Creating own data Streams	1					
3.4	Access Modes						
3.5	Writing Data to a File, Reading Data From a File						
3.6	Additional File Methods	1					
3.7	Exceptions and Types	1					
3.8	Handling Exceptions	1					
3.9	User Defined Exceptions	1					
4.0	NumPy Basics						
4.1	NumPy Data Types	1					
4.2	NumPy Arrays	1					
4.3	Creating Arrays	1					
4.4	Adding items into Arrays	1					
4.5	Removing items	1					
4.6	Printing Items	1					
4.7	Sorting items	1					
4.8	Reshaping	1					
4.9	Indexing and Slicing	1					
5.0	GUI Programming and Graphics						
5.1	GUI Programming toolkits	1					
5.2	Introduction to Tkinter	1					
5.3	Creating GUI widgets	1 1					
5.4	Resizing						
5.5	Configuring Widget options	1					
5.6	Creating Layouts	1					
5.7	Radio buttons & Check boxes	1					
5.8	Dialog boxes	1					
5.9	Drawing using Turtle	1

#For Tamils and Technology, additional 1 credit is offered and not accounted for CGPA

	தமிழரும் தொழில்நுட்பமும்	Category	L	T	Р	Credit
60 GE 002	(அனைத்து துறைகளுக்கும் பொதுவானது)	GE	1	0	0	1*

பாடத்தின் நோக்கங்கள்:

- தமிழர்களின் சங்ககால நெசவு, பனை வனைதல் மற்றும் கட்டிட தொழில் நுட்பம் குறித்து அறிகல்.
- தமிழர்களின் சங்ககால வேளாண்மை, நீர்ப்பாசனம் மற்றும் உற்பத்தி முறைகள் குறித்த கற்றல்.
- நவீன அறிவியல் தமிழ் மற்றும் கணித்தமிழ் குறித்த புரிதல்.

முன்கூட்டிய துறைசார் அறிவு:

தேவை இல்லை

பாடம் கற்றதின் விளைவுகள்:

வுகள்
ı

CO1	சங்ககாலத் தமிழர்களின் நெசவு மற்றும் பானை வனைதல்	புரிதல்
001	தொழில்நுட்பம் குறித்த கற்றுணர்தல்	
CO2	சங்ககாலத் தமிழர்களின் கட்டிட தொழில்நுட்பம் கட்டுமானப்	புரிதல்
002	பொருட்கள் மற்றும் அவற்றை விளக்கும் தளங்கள் குறித்த அறிவு.	
CO3	சங்ககாலத் தமிழர்களின் உலோகத் தொழில், நாணயங்கள்	புரிதல்
003	மற்றும் மணிகள் சார்ந்த தொல்லியல் சான்றுகள் பற்றிய அறிவு.	
CO4	சங்ககாலத் தமிழர்களின் வேளாண்மை, நீர்ப்பாசன முறைகள்	புரிதல்
004	மற்றும் முத்து குளித்தல் குறித்த தெளிவு.	
CO5	நவீன அறிவியல் தமிழ் மற்றும் கணித்தமிழ் குறித்த	பகுப்பாய்வு
COS	புரிந்துகொள்ளலும் மற்றும் பயன்படுத்துதலும்.

00 CF 0F2	Chemistry	Laboratory		BS	0	0	4	2

- To infer the practical knowledge by applying the experimental methods to correlate with the Physics theory
- To demonstrate an ability to make physical measurements and understand the limits of precision in measurements
- To Analyse the behavior and characteristics of various materials for its optimum utilization
- Test the knowledge of theoretical concepts and develop the experimental skills of the learners
- To facilitate data interpretation and expose the learners to various industrial and environmental applications

Pre-requisites

• NIL

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Analyse the properties of semiconducting materials for its potential applications	Apply
CO2	Realize the interference and diffraction phenomena by Airwedge and laser experiments	Apply
CO3	Recognize the magnetic properties by experimental verification	Apply
CO4	Apply different techniques of qualitative and quantitative chemical analysis to generate experimental skills and apply these skills to various analyses	Apply
CO5	Explain and Analyse instrumental techniques for chemical analysis	Analyse

PHYSICS LABORATORY

List of Experiments:

- 1. Determination of Hall coefficient of a given semiconductor and its charge carrier density. *
- 2. V-I Characteristics of Zener diode and Solar cell. *
- 3. Air wedge Determination of thickness of a thin sheet/wire. *
- 4. a) Laser- Determination of the wave length of the laser using grating. *
 - b) Optical fibre -Determination of numerical aperture and acceptance angle. *
- 5. Magnetic field along the axis of current carrying coil Stewart and Gee. *

CHEMISTRY LABORATORY

List of Experiments:

- 1. Estimation of HCl by pH meter. **
- 2. Estimation of mixture of acids by conductivity meter ****
- 3. Determination of ferrous ion by Potentiometric titration. ****
- 4. Determination of corrosion by weight loss method. ***
- 5. Estimation of ferrous ion by spectrophotometer. ***

Case studies/Activity report

- 1. Activity using chemdraw software.
- 2. Activity report on cheminformatic structure.
- 3. Case study on ion selective electrodes.
- 4. Assembling of cell or battery.

Lab Manual

- 1. "Engineering Physics Lab Manual", Department of Physics, KSRCT.

- To gain the knowledge in Python Programming Language
- To understand the concepts decision making and looping statements
- To implement functions with the aid of modules using exception handling
- To implement the concepts of NumPy Arrays
- To create layouts using graphical modules such as Tkinter and Turtle

Pre-requisites

• Basic knowledge of mathematics and programming

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Implement the basics and data structures of Python programming	Apply
CO2	Implement the concepts of decision making and looping statements	Apply
CO3	Develop programs using functions and modules with exception handling	Apply
CO4	Create programs using NumPy arrays	Apply
CO5	Design layouts with GUI toolkits using Tkinter	Apply

	Data Structures	PC	3	0	0	3

- To choose the appropriate data structure for a specified application
- To design and implement abstract data types such as Linked List, Stack, Queue and Trees
- To Learn and implement the Hashing techniques
- To design a Priority Queue ADT and its applications
- To demonstrate various Sorting, Searching and Graph applications

Pre-requisites

· Basic knowledge of mathematics and programming language in C

Course Outcomes

CO1	Apply linear data structures to solve real time applications	Apply
CO2	Apply trees concepts and its applications.	Apply
CO3	Apply algorithm for solving problems like Sorting and Searching.	Apply
CO4	Apply the Priority Queue operations and Hashing techniques.	Apply
CO5	Apply Shortest Path and Minimum Spanning Tree algorithms and Biconnectivity.	Apply

60 CS 004	Java Programming –	PC	3	0	0	3

- To learn object oriented programming concept
- To understand Java fundamentals and String methods
- To implement code reduction through packages and collection methods
- To apply the knowledge of Threads and IO Streams
- To build applications with JDBC technology for real world problems

Pre-requisites

• Basic knowledge of any programming language with ability to solve logical problems

Course Outcomes

CO1	Apply Java fundamentals to construct functional programs to solve real-world problem.	Apply
CO2	Implement object-oriented principles, exception handling and string operations to solve real world problems	Apply
CO3	Design packages and utilize collections to achieve reusability.	Apply
CO4	Apply multi threading concepts and IO Streams in various real world scenario.	Apply
CO5	Explore database using regular expression with JDBC.	Analyse

60 AM 301	Formal Language and	Category	L	T	Р	Credit
OU AIVI 30 I	Automata Theory	BS	3	1	0	4

- To understand the types of finite automata and the relationship between finite automata
- To understand regular expressions, push down automata and context free grammar
- To understand the properties of context free language
- To learn the programming techniques of Turing machine and undecidable problems
- To learn the concepts of Undecidability and interactable Problems

Pre-requisites

• Basic Knowledge of mathematics and Computer Systems

Course Outcomes

CO1	Comprehend the formal proofs, Inductive proofs and Finite Automata.	Understand
CO2	Apply regular expressions and the properties of regular languages.	Apply
CO3	Construction of context-free grammar and Push-down automata.	Apply
CO4	Interpret the uses of Turing machine and properties of Context-Free Languages.	Apply
CO5	Analyse the undecidability and Interactable problems.	Apply

62 AM 302	Computer Architecture	Category	L	Т	Р	Credit
62 AIVI 302	Computer Architecture	PC	3	0	0	3

- To gain the knowledge about basic structure, Instructions and functional units of a digital computer
- To discuss in detail, the operation of the arithmetic unit including the algorithms and implementation of data manipulation
- To study in detail, the different types of control and the concept of pipelining and study the hierarchical memory system, cache memory
- To study the different ways of communicating with I/O devices and standard I/O interfaces
- To understand the instruction and thread level parallelism concepts and multi core processors

Pre-requisites

• Basic knowledge of Software and Hardware

Course Outcomes

CO1	Acquire Knowledge on the basic structure of computer, Instruction sequencing and Addressing modes.	Understand
CO2	Apply the basic design of Addition and subtraction for fixed point numbers, multiplication and division of fixed numbers and basics of floating point numbers.	Apply
CO3	Analyse the concept of Instruction execution, generation of control signals, pipelining and hazards.	Analyse
CO4	Apply the concept of Cache memory and its performance, interrupts, buses, Direct Memory Access and Standard I/O interfaces.	Apply
CO5	Analyse Parallelism concepts, compiler techniques, multiprocessor architecture and case studies on Intel's processors.	Analyse

2.2	Understanding Human being - As Co-Existence of the self and the Body - The Activities and Response of the Self and the Body	2							
2.3	The body as an instrument of the	1							
2.4	Understanding harmony in the self	1							
2.5	Harmony of the self with the body	2							
2.6	Programme to ensure self-regulation and health	1							
2.7	My Participation (Value) regarding Self and my Body - Correct Appraisal of our Physical needs	1							
3.0	Harmony In The Family And Society								
3.1	Harmony in the Family - Understanding Values in Human Relationships	1							
3.2	Family as the basic Unit of Human Interaction	1							
3.3	Values in human Relationships	1							
3.4	Trust - the foundation value in relationship	1							
3.5	Respect as the right evaluation, the Basis for Respect, Assumed Bases for Respect today	1							
3.6	Harmony from Family to World Family: Undivided Society	1							
3.7	Extending Relationship from family to society, Identification of the Comprehensive Human Goal	1							
3.8	Programs needed to achieve the Comprehensive Human Goal: The Five Dimensions of Human Endeavour	1							
3.9	Harmony from Family Order to World Family Order – Universal Human order	1							
4.0	Harmony in The Nature / Existence	1							
4.1	The Four Orders in Nature	1							
4.2	Participation of Human Being in Entire Nature	1							
4.3	Natural Characteristics - Tendency of Human Living with Animal Consciousness / The Holistic Perception of Harmony in Existence	1							
4.4	Present day Problems	1							
4.5	Recyclability and self-regulation in nature	1							
4.6	Relationship of Mutual Fulfilment	1							
4.7	An Introduction to space, Co-existence of Units in Space	1							
4.8	Harmony in Existence – Understanding Existence as Co- Existence	1							
4.9	Natural Characteristic of Human Living with Human Consciousness	1							

5.0	Implications of The Holistic Understanding	
5.1	Natural Acceptance of human values	1
5.2	Definitiveness of Ethical Human Conduct - Development of Human Consciousness	1
5.3	Identification of Comprehensive Human Goal	1
5.4	Basis for Humanistic Education and Humanistic Constitution	1
5.5	Ensuring Competence in professional Ethics	1
5.6	Issues in Professional Ethics-The Current Scenario	1
5.7	Holistic Technologies and Production Systems and management models - Typical Case Studies	2
5.8	Strategies for transition towards value based life and profession	1

61 CS 0P3	Data Structures	Category	L	Т	Р	Credit
61 CS 0P3	Laboratory	PC	0	0	4	2

- To design and implement simple linear and nonlinear data structure
- To strengthen the ability to identify and apply the suitable data structure for the given real world problems
- To program for storing data as tree structure and implementation of various traversal techniques
- To implement sorting and searching techniques
- To gain knowledge of graph applications

Pre-requisites

• Programming language in C

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Demonstrate the implementation of Linear Data structures and its applications.	Apply
CO2	Investigate Balanced Parenthesis and Postfix expressions with the help of Stack ADT.	Apply
CO3	Implement Non-Linear Data Structure.	Apply
CO4	Implement sorting and searching techniques.	Apply
CO5	Implement Hashing Techniques, Shortest Path and Minimum Spanning Tree Algorithm.	Analyse

- To apply core Java concepts to solve real-world problems
- To implement object-oriented programming (OOP) principles
- To apply exception Handling, Strings, and Collections to manipulate strings and data efficiently
- To apply the knowledge of Threads and IO streams
- To create a JDBC-integrated mini project that applies a wide range of Java concepts

Pre-requisites

Basic knowledge of any programming language with ability to solve logical problem

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Demonstrate Java fundamentals to solve real world problems	Apply
CO2	Design applications involving Object Oriented Programming concepts such as inheritance, polymorphism, abstract classes and interfaces.	Apply
CO3	Implement Java Applications using Strings, Collections and exception Handling.	Apply
CO4	Develop concurrent and input/output-intensive applications using Threads and IO streams.	Apply
CO5	Develop a JDBC-integrated mini project to provide extensible software solutions.	Analyse

- To help learners improve their logical reasoning skills at different academic and professional contexts
- To help learners relate basic quantitative problems and solve them
- To help learners Infer critically the statements with optimal conclusions and assumptions
- To Solve the quantitative problems pertaining to calculations of averages, ratio and proportions, and profit and loss effectively
- To compute quantitative problems related to time and work speed and distance, and simple and compound interest

Pre-requisites

• Basic knowledge of Arithmetic and Logical Reasoning

Course Outcomes

CO1	Deduce the topics in logical reasoning at the preliminary and intermediate level.	Analyse
CO2	Relate basic quantitative problems and solve them effectively at the preliminary level.	Apply
CO3	Infer critically the statements with optimal conclusions and assumptions with the data and information given.	Analyse
CO4	Solve the quantitative problems pertaining to calculations of averages, ratio and proportions, and profit and loss effectively at the pre-Intermediate level.	Apply
CO5	Compute quantitative problems related to time and work, speed and distance, and simple and compound interest at intermediate level.	Apply

- To design algorithms in both the science and practice of computing
- To choose the appropriate data structure and algorithm design method for a specified Application
- To understand how the choice of data structures and algorithm design methods impacts the performance of programs
- To solve problems using algorithm design methods such as the greedy method, divide and conquer, dynamic programming, backtracking and branch and bound
- To solve NP-hard and NP-complete problems

Pre-requisites

• Basic knowledge of Data Structures and Computer programming

Course Outcomes

CO1	Classify the problem types and compare orders of growth to represent asymptotic notations.	Understand							
CO2	Apply and inspect recursive and non-recursive algorithms by mathematical notations using sample algorithms.	Analyse							
CO3	Apply 'Brute Force' and 'Divide and conquer' design techniques for sorting and searching problems	Analyse							
CO4	Construct analogous algorithms for graph related problems.	Understand							
CO5	Apply 'Backtracking' and 'Branch and bound' techniques to solve NP-hard problems.	Apply

Course Contents and Lecture Schedule								
S. No.	Topics	No. of hours						
1.0	Basic Concepts of Algorithms							
1.1	Fundamentals of Algorithmic Problem Solving	1						
1.2	Important Problem types	1						
1.3	Fundamentals of the analysis of algorithm efficiency	1						
1.4	Analysis Framework	1						
1.5	Asymptotic Notations	1						
1.6	Asymptotic Notations and Basic Efficiency Classes	1						
1.7	Recurrence relations	1						
1.8	Methods for solving recurrence relations.	2						
2.0	Mathematical Analysis of Algorithms							
2.1	Mathematical Analysis of Non-recursive Algorithms	2						
2.2	Non-recursive Algorithms and Examples	2						
2.3	Mathematical Analysis of Recursive Algorithms	2						
2.4	Fibonacci numbers	1						
2.5	Empirical Analysis of Algorithms.	2						
3.0	Brute Force and Divide & Conquer Techniques							
3.1	Selection Sort	1						
3.2	Bubble Sort	1						
3.3	Brute-force string matching	1						
3.4	Merge sort	1						
3.5	Multiplication of Two n-Bit Numbers	1						
3.6	Quick Sort	1						
3.7	Binary Search	1						
3.8	Binary tree Traversal	2						
4.0	Algorithm Design Paradigm							
4.1	Decrease and Conquer Technique: Insertion Sort	1						
4.2	Depth first Search and Breadth First Search	1						
4.3	Transform and Conquer Technique: Presorting	1						
4.4	Dynamic Programming: Computing a Binomial Coefficient	1						
4.5	Warshall's and Floyd's Algorithm	1						
4.6	The Knapsack Problem and Memory Functions	1						
4.7	Optimal Binary Search trees	1						
4.8	Greedy Technique: Huffman trees.	2						
5.0	NP Hard and NP-Complete Problems							
5.1	P and NP problems	1						
5.2	NP complete problems	1						
5.3	Backtracking: N-Queen's Problem	2						
5.4	Hamiltonian Circuit Problem	2						
5.5	Branch and Bound Techniques	1						
5.6	Traveling salesman problem.	2

61 AM 401	Artificial Intelligence	Category	L	Т	Р	Credit
	Artificial Intelligence	PC	3	0	0	3

- To learn the basic concepts and techniques of Artificial Intelligence
- To develop AI algorithms for solving practical problems
- To interpret the knowledge and reasoning in propositional logic and first order logic
- To learn to represent uncertain knowledge in solving AI problems and ML and deep learning algorithms and models
- To understand the different forms of learning and NLP, computer vision

Pre-requisites

• Basic Knowledge of Computer Programming and Algorithms

Course Outcomes

CO1	Acquire the knowledge on basic concepts and techniques of Artificial Intelligence.	Remember
CO2	Apply Al algorithms for solving practical problems.	Apply
CO3	Analyse human intelligence and Al.	Analyse
CO4	Apply deep learning algorithms and models to implement the system model.	Apply
CO5	Apply basics of Fuzzy logic and neural networks, Al applications, NLP, Computer vision.	Apply

- To understand the phases and process in a Software Development.
- To understand fundamental concepts of requirements engineering and Analysis Modeling.
- To understand the various software design methodologies.
- To learn various testing and maintenance measures
- To learn various project metrics and risk management

Pre-requisites

• NIL

Course Outcomes

CO1	Analyse the key activities in managing a software process and project	Analyse
CO2	Analyse the concepts of requirements engineering and Modeling.	Analyse
CO3	Apply systematic procedure for software design and deployment.	Apply
CO4	Compare and contrast the various testing and maintenance.	Analyse
CO5	Analyse project timeline, estimate project cost and Identify Risk	Analyse

60 AM 403	Database Management	Category	L	Т	Р	Credit
	Systems	PC	3	0	0	3

- To familiarize the students with various data models and query language.
- To gain knowledge on data storage and indexing concepts.
- To expose the fundamentals of transaction processing and recovery concepts.
- To make the students aware of the various current trends in database system.
- To know the current trends of various databases.

Pre-requisites

• Basic knowledge of Data Storage and Management

Course Outcomes

CO1	Apply the knowledge of database systems and Analyse the various data models.	Analyse
CO2	Apply the concept of Data Definition Language and Data Manipulation Language and apply the various Normal Forms in database design	Apply
CO3	Apply the knowledge of secondary storage device and the concepts of hashing, BTree, B+Tree in indexing to retrieve the data	Apply
CO4	Apply the various concurrency control techniques in database transactions and recovery techniques	Analyse
CO5	Analyse the recent databases such and Express the knowledge of data ware housing and data mining	Analyse

1. Dr A GNANABASKARAN - gnanabaskarana@ksrct.ac.in

60 MY 003	Startups and	Category	L	Т	Р	Credit
00 W 1 003	Entrepreneurship	MC	2	0	0	2*

- To Learn basic concepts in entrepreneurship, develop mind-set and skills necessary to explore entrepreneurship.
- To provide practical proven tools for transforming an idea into a product or service that creates value for others.
- To Comprehend the process of opportunity identification through design thinking, identify
 market potential and customers while developing a compelling value proposition solution and
 prototype.
- To create business plan, conduct financial analysis and feasibility analysis to assess the financial viability of a venture ideas & solutions built with domain expertise.
- To Prepare and present an investible pitch deck of their practice venture to attract stakeholders.

Pre-requisites

Basic knowledge of reading and writing in English

Course Outcomes

CO1	Develop an entrepreneurial mindset and appreciate the concepts of design thinking, entrepreneurship and innovation.	Understand
CO2	Apply process of problem -opportunity identification and validation through human centred approach to design thinking in building solutions.	Apply
CO3	Understand market types, conduct market estimation, identify customers, create customer persona, develop the skills to create a compelling value proposition and build a Minimum Viable Product.	Apply
CO4	Create business plan, conduct financial analysis and feasibility analysis to assess the financial viability of a venture.	Apply
CO5	Prepare and deliver an investible pitch deck of their practice venture to attract stakeholders .	Create

Case Study and Fireside Chat – Bodh Gems 4.2 Financial Planning: Types of Costs, Preparing the Financial Plan using Financial Template (Handout week 9) Class Activity - Starting up Costs, COGS, Sales Plan and People Plan	3.6	Class Activity- Fill MVP Framework (Handout week 7) and Learn Validation	1
Business Planning: Components of Business Plan- Sales Plan, People Plan and Financial Plan, Preparing a Business Plan. Case Study and Fireside Chat - Bodh Gems 4.2 Financial Planning: Types of Costs, Preparing the Financial Plan using Financial Template (Handout week 9) Class Activity - Starting up Costs, COGS, Sales Plan and People Plan	4.0	Business Plan, Financial feasibility and Manging growth	
4.2 Financial Planning: Types of Costs, Preparing the Financial Plan using Financial Template (Handout week 9) Class Activity - Starting up Costs, COGS, Sales Plan and People Plan	4.1	Business Planning: Components of Business Plan- Sales Plan, People Plan and Financial Plan, Preparing a Business Plan. Case Study and Fireside Chat	1
	4.2	Financial Planning: Types of Costs, Preparing the Financial Plan using Financial Template (Handout week 9)	1
	4.3		1

4.4	Class Activity - One Year P&L Projection, Breakeven Analysis, Five year Projection	1
4.5	Understanding Basics of Unit Economics and Analyzing Growth and the Financial Performance	1
4.6	Class Activity - Financial Template - Unit Economics (Handout week 12)	1
5.0	Go to Market Strategies and Funding	
5.1	Introduction to Go to Market Strategies, Start-up Branding and its Elements, Selecting the Right Channel	1
5.2	Creating Digital Presence, Building Customer Acquisition Strategy.	1
5.3	Class Activity: Handout week 10 - Create your GTM Strategy	1
5.4	Choosing a Form of Business Organization Specific to your Venture	1
5.5	Identifying Sources of Funds: Debt & Equity, Map the Start-up Lifecycle to Funding Options	1
5.6	Class Activity - Visit Relevant GOI Websites, Other Sites to Help Students Explore Funding Opportunities and Briefing on Final Submission of the Pitch Deck. Build an Investor Ready Pitch Deck, What Should You Cover in Your Pitch Deck? Art of Pitching and Storytelling.	1

- To learn the basic concepts and techniques of Artificial Intelligence
- To develop AI algorithms for solving practical problems
- To improve programming skills in languages by writing, testing, and debugging code to solve complex problem
- To evaluate the performance of different algorithms in terms of time and space complexity
- To understand their applicability and effectiveness in various scenarios

Pre-requisites

• Basic knowledge of Computer Programming and Algorithms

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Acquire knowledge on the basic concepts and techniques of Artificial Intelligence Interaction.	Apply
CO2	Apply Al algorithms for solving practical problems.	Apply
CO3	Apply human intelligence and AI concepts.	Apply
CO4	Analyse the performance of intelligent system.	Analyse
CO5	Apply basics of Fuzzy logic and neural networks.	Apply

- To present SQL and procedural interfaces to SQL comprehensively
- To perform various commands in RDBMS
- To Perform PL/SQL programming using concept of Cursor Management, Error Handling, Package and Triggers
- To design the applications like payroll
- To apply procedures and functions in PL/SQL

Pre-requisites

• Basic Knowledge of Data Storage and Management

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Apply the Data Definition Language, Data Manipulation Language and Data Control Language commands in RDBMS.	Apply
CO2	Apply the Sub queries to retrieve data from multiple tables.	Apply
CO3	Apply the High-level language extension with Cursors and Triggers.	Apply
CO4	Apply the Procedures and Functions in PL/SQL.	Apply
CO5	Apply the views, joins and Embedded SQL In RDBMS.	Apply

60 IT 003	Design Thinking	Category	L	T	Р	Credit
0011 003	Design Hilliking	PC	2	0	2	3

- To learn design thinking concepts and principles.
- To design thinking methods in every stage of the problem.
- To learn the different phases of design thinking.
- To learn the application of design thinking for the IT industry
- To apply various methods in design thinking to different problems.

Pre-requisites

• Basic knowledge of mathematics and programming.

Course Outcomes
On the successful completion of the course, students will be able to

CO1	Apply design thinking for product development	Understand
CO2	Use design thinking tools	Understand
CO3	Identify need for products and disruption	Apply
CO4	Design innovative products	Analyse
CO5	Apply design thinking to improve on existing products in IT	Apply

book (tictior	n or non-fic	tion). Then	you break	tnem up int	to smaller g	roups (or i	ndividuals)			

to read different parts of the book. Each group (or person) has to read and then create an
overview/trailer of their part of the book to share chronologically with the rest of the class.
Here the design really starts with the creative process driving how you share the
information, plot, characters etc. Perfect use for professional development when you want
to introduce a topic in a fun, engaging way.

- 6. CHILDREN'S STORY DESIGN ACTIVITIES Concept: The University of Arkansas created a series of STEM Challenges that work as great design activities with groups old and young! For example, after reading "The Three Billy Goat's Gruff" they set up a challenge like this: You decide to help the billy goats reach the opposite side of the creek so they can eat. You must create a model structure to help the billy goats get from one side to the other while using the design loop and only the materials provided. Your teacher will also provide you with model billy goats, with specific weights, that your bridge must be able to withstand.
- 7. New Product Development Activity: Student teams were given products ranging from toys to air fresheners. In 2 days, they had to create pitches on how to improve these products. The idea was to give them a clear sense of the scope of what they would do in a product development.

a pro	duct development.

5.0	Future	
5.1	Design Thinking meets the corporation	2
5.2	The New Social Contract	2
5.3	Design Activism	1
5.4	Designing tomorrow	1
Practical		
1	2030 Schools Challenge: Concept: Design thinking is often presented without teaching content. This is very different. Learners get 30 minutes to choose a UN 2030 Goal (there are 17) that is relevant and meaningful to them, then they get into small groups. The group researches the goal quickly, by answering the questions: What does the world need to know about this goal and what can we do about it? The group then creates a short PSA (Public Service Announcement) and shares it widely with an authentic audience. It is fun, fast, and shows the power of design sprints to teach content and skills.	4
2	THE GIFT-GIVING PROJECT VIA STANFORD D-SCHOOL Concept: The Gift-Giving Project is 90-minute (plus debrief) fast-paced project through a full design cycle. Students pair up to interview each other, come to a point-of-view of how they might design for their partner, ideate, and prototype a new solution to "redesign the gift giving experience" for their partner.	4

Cource F	Designer(s)	
	Total	60
7	New Product Development Activity: Student teams were given products ranging from toys to air fresheners. In 2 days, they had to create pitches on how to improve these products. The idea was to give them a clear sense of the scope of what they would do in a product development.	5
6	CHILDREN'S STORY DESIGN ACTIVITIES Concept: The University of Arkansas created a series of STEM Challenges that work as great design activities with groups old and young! For example, after reading "The Three Billy Goat's Gruff" they set up a challenge like this: You decide to help the billy goats reach the opposite side of the creek so t'hey can eat. You must create a model structure to help the billy goats get from one side to the other while using the design loop and only the materials provided. Your teacher will also provide you with model billy goats, with specific weights, that your bridge must be able to withstand.	5
5	"BOOK IN AN HOUR" ACTIVITY (VIA ALL WHO WONDER) Concept: Give a group a book (fiction or non-fiction). Then you break them up into smaller groups (or individuals) to read different parts of the book. Each group (or person) has to read and then create an overview/trailer of their part of the book to share chronologically with the rest of the class. Here the design really starts with the creative process driving how you share the information, plot, characters etc. Perfect use for professional development when you want to introduce a topic in a fun, engaging way.	4
4	INVENT A SPORT (WITH JUST THESE ITEMS) Concept: We've all played sports at some point in our life. Who came up with the rules? Who created the game? Who made the constraints? And who decided the objects to play with? Now, with limited time and resources, your group will create and invent a new sport, and a set of directions for people to actually play the game.	4
3	THE WALLET PROJECT VIA STANFORD D-SCHOOL Concept: Very similar to the Gift- Giving Project, the Wallet Project is 90-minute (plus Tentative 48 debrief) fast-paced project through a full design cycle. Students pair up, show and tell each other about their wallets, ideate, and make a new solution that is "useful and meaningful" to their partner.	4

Course C	contents and Lecture Schedule	
S. No.	Topics	No. of hours
1.0	Verbal & Analytical Reasoning	<u>.</u>
1.1	Seating Arrangements 1 1.2 Analytical Reasoning (PUZZELS)	1
1.2	Machine input and output	1
1.3	Coded Inequality	1
1.4	Eligibility Test	1
1.5	Vehicle Aerodynamics	2
2.0	Quantitative Aptitude - Part – 4	
2.1	Permutation and Combination	1
2.2	Probability	1
2.3	Quadratic equation – Geometry	1
2.4	Clock – Calendar	1
2.5	Logarithmic	2
3.0	Non-Verbal Reasoning	
3.1	Series Completion of Figures – Classification	1
3.2	Courting of figure – Figure matrix	1
3.3	Embedded Figure – Complete Figure	1
3.4	Paper Cutting and Folding	1
3.5	Mirror images and Water Images	2
4.0	Quantitative Aptitude - Part – 5	
4.1	Mensuration of Area, Volume	1
4.2	Mensuration of Volume	1
4.3	Surface area in 2D and 3D Shapes	1
4.4	2D Shapes – Square, Rectangle, Triangle, Circle, etc.	1
4.5	3D Shapes – Cube, Cuboid , Sphere , Cone , etc	2
5.0	Data Interpretation and Analysis	·
5.1	Data interpretation Based on text	1
5.2	Data interpretation Based on Tabulation, Pie chart	1
5.3	Bar graph , And Line graph	1
5.4	Venn Diagram	1
5.5	Data sufficiency	2
	Total	30

10	60 CG 0P5	Comprehensive Test	1	100	-	100	-	100
11	60 CG 0P6	Internship	-	100	-	100	-	100

^{*} CA evaluation pattern will differ from course to course and for different tests. This will have to be declared in advance to students. The department will put a process in place to ensure that the actual test paper follow the declared pattern.

^{**} End Semester Examination will be conducted for maximum marks of 100 and subsequently be reduced to 60 marks for theory End Semester Examination, 50 marks for theory cum practical End Semester Examination and 40 marks for practical End Semester Examination.

60 HS 002	Engineering Economics and	Category	L	Т	Р	Credit
00 H3 002	Financial Accounting	PC	3	0	0	3

- To know about the economic principles underlying demand, supply, and market structure
- To understand the concept related to types of business organization and types of banking
- To know about concepts in financial accounting and capital budgeting
- To understand the different methods of pricing and appraisal of projects
- To know the application of break-even analysis in engineering projects

Pre-requisites

NIL

Course Outcomes

CO1	Understand the basic concepts of economics, demand, supply, and market structure	Understand
CO2	Understand the forms of business organization and functions of commercial and central bank	Understand
CO3	Understand the basis of financial accounting and capital budgeting techniques	Understand
CO4	Apply different types of pricing strategies and comprehensive project feasibility in diverse business	Apply
CO5	Apply break even analysis in engineering projects and business	Apply

60 AM 602	Doon Loarning	Category	L	Т	Р	Credit
	Deep Learning	PC	3	0	0	3

- To introduce the fundamentals of deep learning and the main research activities in this field.
- To learn architectures and optimization methods for deep neural network training.
- To implement and learn various algorithm and test it using tensor flow tool.
- To construct new application using tensor flow tool.
- To learn various applications of Deep Learning.

Pre-requisites

• Basic Knowledge of Machine Learning

Course Outcomes

CO1	Comprehend the fundamentals of deep learning and the main research activities in this field.	Understand
CO2	Acquire Knowledge on architectures and optimization methods for deep neural network training.	Remember
CO3	Implement, apply and test relevant learning algorithms in Tensor Flow.	Apply
CO4	Critically evaluate the method's applicability in new contexts and construct new applications.	Apply
CO5	Acquire knowledge on various application of Deep Learning.	Remember

3.3	Sparse auto encoders, Regularization: Bias Variance Tradeoff, L2 regularization	2
3.4	Early stopping, Dataset augmentation	1
3.5	Encoder Decoder Models, Attention Mechanism	2
3.6	Attention Over images, Batch Normalization	1
4	Deep Learning Models	
4.1	Introduction to CNNs, Architecture	1
4.2	Convolution/pooling layers	1
4.3	CNN Applications, LeNet	1
4.4	AlexNet, ZF-Net, VGGNet, GoogLeNet, ResNet. Introduction to RNNs	1
4.5	Back propagation through time (BPTT)	1
4.6	Vanishing and Exploding Gradients	1
4.7	Truncated BPTT	1
4.8	GRU, LSTMs	2
5	Deep Learning Applications	
5.1	Image Processing	3
5.2	Natural Language Processing	2
5.3	Speech recognition	2
5.4	Video Analytics	2

1. Ms.T.Subbulakshmi - subbulakshmi@ksrct.ac.in

60 AM 603	Web Teebnology	Category		T	Р	Credit
	Web Technology	PC	1	0	4	3

- To Enable the students to learn basic web concepts
- To learn the concepts of scripting languages and server side programming
- To apply the features of XML and JDBC Connectivity
- To Write scripts in JSP and Angular JS
- To make aware of the students about development in web technologies

Prerequisite

NIL

Course Outcomes

<u> </u>	decedial completion of the course, stadente will be able to	
CO1	Outline the features of HTML and employ various style sheet concepts within HTML.	Understand
CO2	Apply the basics concepts of JavaScript and express various types' events.	Apply
CO3	Analyzing the concepts of XML and JDBC.	Analyse
CO4	Gain the knowledge of JSP in server side programming and deploy the features of Angular JS with the various effects of elements and events.	Apply
CO5	Develop the diverse types of applications based on their functionalities and characteristics.	Create

Semester		В	.E- CSE (A				e Learning)		
Semester									
Number N	Semester	H	lours/Wee			Credit			
Introduction* Internet Basic - Introduction to HTML - List - Creating Table - Linking document - Frames - Graphics to HTML Doc - Style sheet - Style sheet basic - Add style to document - Creating Style sheet rules - Style sheet basic - Add style to document - Creating Style sheet rules - Style sheet properties - Font - Text - List - Color and background color - Box - Display properties. Javascript* Introduction to Javascript - Advantage of Javascript - Javascript Syntax - Datatype - Variable - Array - Operator and Expression - Looping Constructor - Function - Dialog box - Events. XML and JDBC* Features of XML, The XML Declaration, Element Tags - Nesting and structure, XML text and text formatting element, Table element, Mark-up Element and Attributes, Document Type Definition (DTD), XML Schema-Introduction - JDBC Architecture - Types of Drivers - Statement - Result Set - Prepared Statement - Connection Modes - Save Point - Batch Updations - Callable Statement. JSP and Angular JS* JSP LifeCycle - JSP Directives: page, include, taglib - Jsp Scripting Elements: declaratives, scriptlets - JSP Actions. Introduction to Angular JS, JSON - HTML and Bootstrap CSS Primer - JavaScript Primer - Single Page Application - MVC Architecture - first Application of AngularJS - Binding - Template Directives - Elements - Events. Applications * e-Business Models - Building an e-Business - e-Marketing - Database connectivity - Online Payments - Security - XML and e-Commerce - m-Business. Text Book(s): 1. Program", Pearson education, Third Edition, 2015. 2. Haggit Attiya and Jennifer Welch, - Distributed Computing - Fundamentals, Simulations and Advanced TopicsII, Second Edition, Wiley, 2016. Reference(s): 1. D.Norton and H. Schildt, "Java 2: The complete Reference", TMH, 2016. 2. Eric Ladd and Jim O'Donnell, et al, "USING HTML 4, XML, and JAVA1.2", PHI publications,		L	Т					ES	
Internet Basic - Introduction to HTML - List - Creating Table - Linking document - Frames - Graphics to HTML Doc - Style sheet - Style sheet basic - Add style to document - Creating Style sheet rules - Style sheet properties - Font - Text - List - Color and background color - Box - Display properties. - To Familiarize Students with Essential Data Visualization Tools and libraries in Python, such as Matplotlib, Seaborn, Plotly, Tableau and Power BI, enabling them to effectively explore and communicate insights from data
- To Equip students with the skills to create a wide range of visualizations, from basic plots like line, scatter and bar plots to advanced techniques such as subplots, 3D plots, and interactive visualizations
- To Enhance Understanding of Statistical Data Visualization concepts and techniques, empowering them to Analyse and interpret complex datasets through visualization
- To Enable students to customize visualizations by exploring options such as color schemes, labels, titles, annotations and interactivity
- To Provide students with hands-on experience through practical exercises and projects, allowing them to apply theoretical concepts learned in the classroom to real-world datasets and scenarios

Pre-requisites

List of Experiments:_

1. Visualization using Matplotlib in Python*

Understand how to create and customize line, scatter, and bar plots with Matplotlib, including colors, labels, titles, annotations, and text.

2. Advanced Visualization using Matplotlib in Python

Explore subplots and multiple axes for complex visualizations, create 3D and surface plots, and implement interactive features like zooming and panning.

3. Visualization using Seaborn in Python

Understand to create visually appealing statistical plots such as scatter plots, pair plots, and box plots, explore Seaborn's built-in themes and styling options, and practice using Seaborn to visualize relationships between variables in datasets.

4. Advanced Visualization using Seaborn in Python

Explore categorical plots like bar plots, violin plots, and swarm plots, learn to create heatmaps and clustermaps for exploring correlations in datasets, and practice customizing Seaborn plots with color palettes, grid styles, and figure aesthetics.

5. Interactive Visualization using Plotly in Python

Gain proficiency in creating interactive line plots, scatter plots, and bubble charts, explore Plotly's interactive features like hover tooltips and zooming, and practice adding interactivity to plots with dropdown menus and sliders.

6. Geospatial Visualization using Plotly in Python

Acquire the skills to plot geographical data on maps using Plotly's mapping functionality, experiment with choropleth maps to visualize spatial distributions of data, and practice adding layers, markers, and annotations to geospatial plots.

7. Visualization using Tableau

Acquire proficiency in connecting to data sources and importing datasets into Tableau, explore its drag-and-drop interface for visualization creation, and practice building interactive dashboards with filters, parameters, and actions.

8. Visualization using Power BI

Acquire structured learning by mastering data import into Power BI Desktop, experimenting with diverse visualization types, and practicing interactive report and dashboard creation with features like slicers, drill-through, and bookmarks, spanning from basic plotting with Matplotlib to advanced visualizations with Plotly, Tableau, and Power BI.

OU AIVI OF 2	Laboratory	PC	0	0	4	2

- To introduce the fundamentals of deep learning and the main research activities in this field
- To learn architectures and optimization methods for deep neural network training
- To Apply Dimensionality Reduction Techniques
- To understand their impact on the convergence and efficiency of neural network training
- To implement Deep Learning Models
- To become proficiency in implementing Neural Network Applications

Pre-requisites

• Basic knowledge of Machine Learning Concepts.

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Apply MLP, Feed Forward Neural Networks with Sigmoid Neurons and Backpropagation in deep learning framework sinteraction	Apply
CO2	Analyse the impact of activation functions (sigmoid, tanh, ReLU) in MLPs and influence of hyper parameters on reconstruction accuracy and model generalization	Analyse
CO3	Analyse the impact of regularization techniques on auto-encoder models	Analyse
CO4	Apply and test relevant learning algorithms in Tensor Flow	Apply
CO5	Analyse the method's applicability in new contexts and construct new application	Analyse

List of Experiments:

- 1. Implement a basic MLP model using a deep learning framework. *
- 2. Construct a Feed Forward Neural Network (FFNN) using Sigmoid Neurons.
- 3. Implement Back propagation to train a simple neural network.
- 4. Investigate the impact of activation functions including sigmoid, tanh, and ReLU on MLPs.
- 5. Evaluate the impact of each hyper parameter on reconstruction accuracy and model generalization
- 6. Implement a sparse auto-encoder architecture using a deep learning framework using Tensor Flow or PyTorch.
- 7. Implement and Analyse the impact of various regularization techniques on auto-encoder models.
- 8. Implementation of Convolution Neural Network in Python using Tensor Flow. *

Design Experiments:

- 1. Implementation of Long Short-Term Memory (LSTM) in Python using Tensor Flow.
- 2. Mini Project work involving the application of Deep Learning.

60 AM 702	Speech and Language	Category	L	Т	Р	Credit
00 AIVI 702	Processing	PC	3	0	0	3

- To be competent with fundamental concepts of natural language processing.
- To be competent with fundamental concepts of automatic speech recognition.
- To understand technologies involved in developing speech and language applications.
- To demonstrate the use of deep learning for building applications in speech and natural language processing
- To acquire knowledge on various models in text analysis.

Pre-requisites

• Basic Knowledge of Deep Learning and Machine Learning concepts.

Course Outcomes

CO1	Outline the significance of various NLP components in text processing and the essential principles governing speech production.	Understand
CO2	Outline methods employed for representing both speech and text.	Understand
CO3	Demonstrate the working of sequence models for text.	Apply
CO4	Apply signal processing techniques to Analyse and depict the speech signal.	Apply
CO5	Apply how sequence models function in text analysis.	Apply

60 AM 703	Explainable Al	Category	L	Т	Р	Credit
00 AIVI 703	Explainable Al	PC	3	0	0	3

- To familiarise concepts related to Explainable Artificial Intelligence (XAI) and interpretable methods, with emphasis on how to build a trustworthy AI system.
- To understand the performance of a machine learning model.
- To understand its ability to produce explainable and interpretable predictions.
- To familiarize the concepts and test procedures for the created model.
- To explore th advantages and obstacles associated with autonomous vehicles.

Pre-requisites

· Basic Knowledge of Al and ML.

Course Outcomes

CO1	Gain insight into the methods and terminologies utilized in Explainable AI.	Understand
CO2	Outline the methods utilized in XAI and apply appropriate XAI models or approaches for the given application.	Apply
CO3	Design and develop XAI use cases for real time applications.	Apply
CO4	Develop test procedures to evaluate the effectiveness of the created model.	Apply
CO5	Explore the advantages and obstacles associated with electric, hybrid, and autonomous vehicles.	Analyse

Course Contents and Lecture Schedule									
S. No.	Topics	No. of hours							
1.0	NCC Organization & National Integration								
1.1	NCC Organization	1							
1.2	History of NCC and NCC Organization	1							
1.3	NCC Training and NCC Uniform	1							
1.4	Promotion of NCC cadet, Aim and advantages of NCC Training	1							
1.5	NCC badges of Rank, Honors' and Awards, Incentives for NCC cadets by central and state govt	2							
1.6	National Integration, Unity in diversity	1							
1.7	Contribution of youth in nation building	2							
1.8	National integration council	1							
1.9	Images and Slogans on National Integration	2							
	Basic Physical Training & Drill								
2.0	, ,	0							
2.1	Basic physical Training – various exercises for fitness (with Demonstration)-	3							
2.2	Food – Hygiene and Cleanliness.	1							
2.3	Drill- Words of commands- position and commands- sizing and forming-	3							
2.4	saluting- marching- turning on the march and wheeling-	3							
2.5	saluting on the march- side pace, pace forward and to the rear- marking time-	3							
2.6	Drill with arms- ceremonial drill- guard mounting (WITH DEMONSTRATION)	3							
3.0	Weapon Training Main Parts of a Rifle								
3.1	Characteristics of .303 rifle	1							
3.2	Characteristics of .22 rifle	2							
3.3	Loading and unloading, position and holding safety precautions	2							
3.4	Range procedure, MPI and Elevation-	2							
3.5	Group and Snap shooting Long/Short range firing (WITH PRACTICE SESSION)	3							
3.6	Characteristics of 5.56 mm rifle	1							
3.7	Characteristics of 7.62mm	1							
4.0	Social Awareness and Community Development								
4.1	Aims of Social service, Various Means and ways of social services	1							
4.2	Family planning , HIV and AIDS	1							
4.3	Cancer its causes and preventive measures	1							
4.4	NGO and their activities, Drug trafficking	1							
4.5	Rural development programmes	1							
4.6	MGNREGA, SGSY, JGSY, NSAP, PMGSY	2							
4.7	Terrorism and counter terrorism, Corruption	1							
4.8	female foeticide, dowry, child abuse	1							
4.9 4.10	RTI Act, RTE Act Protection of children from sexual offences act	1							
4.10	Civic sense and responsibility	1							
5.0	Specialized Subject (ARMY)	l							
5.1	Basic structure of Armed Forces	1							
5.2	Military History, War heroes	1							
5.3	battles of Indo - Pak war	1							
5.4	Param Vir Chakra,	1							
5.5	Career in the Defence forces	2							
5.6	Service tests and interviews.	2

- To enhance the image using various image enhancement methods
- To segment the image and extract the features
- To track object from the extracted video frame to support visual inspection process
- To apply various image enhancement techniques for better visibility and analysis of images
- To perform image segmentation and feature extraction

Pre-requisites

• Basic knowledge of Machine Learning and Visualization techniques.

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Identify the required operations that helps to segment an object from an enhanced image.	Analyse
CO2	Apply various techniques to Analyse and extract features that helps in visual inspection and classification	Apply
CO3	Apply visual inspection process to track object from the extracted video frame.	Apply
CO4	Apply machine learning algorithms for automated visual inspection	Apply
CO5	Evaluate the effectiveness of visual inspection methods through statistical analysis	Analyse

Methodology:

The objective of Project Work & Dissertation is to enable the student to extend further investigative a study on the project

- Three reviews shall be conducted by project review committee (Project coordinator, Project Guide and HOD/Subject experts in the department)
- 2. Student(s) shall make a presentation on the progress made by him / her / them during the reviews
- Student(s) shall submit a project technical report comprising of title, problem statement, importance of work, methodology, experimental work and outcome of the work carried out during the 3rd review
- 4. The work carried out may be either under the guidance of a supervisor from the department or jointly with a supervisor drawn from other department / academic institution / R& D laboratory / Industry
- 5. The project reviews (R1+R2+R3+R4) shall carry a maximum of 60 marks
- 6. The project report shall be submitted as per the approved guidelines given by the college, the viva-voce examination shall carry 40 marks
- 7. Marks are awarded to each student of the project group based on the individual performance in the viva-voce examination

Course Contents and Lecture Schedule								
S. No.	Topics	No. of Hours						
1	Exploratory Data Analysis							
1.1	EDA fundamentals, Understanding data science, Significance of EDA	1						
1.2	Making sense of data	1						
1.3	Comparing EDA with classical and Bayesian analysis	1						
1.4	Software tools for EDA	1						
1.5	Visual Aids for EDA	1						
1.6	Data transformation techniques-merging database, reshaping and pivoting, Transformation techniques.	1						
2	Exploratory Data Analysis using Python							
2.1	Data Manipulation using Pandas	1						
2.2	Pandas Objects, Data Indexing and Selection	1						
2.3	Operating on Data	1						
2.4	Handling Missing Data, Hierarchical Indexing	1						
2.5	Combining datasets – Concat , Append, Merge and Join	1						
2.6	Aggregation and grouping	1						
3	Univariate Analysis							
3.1	Introduction to Single Variable	1						
3.2	Distribution Variables	1						
3.3	Numerical Summaries of Level And Spread	1						
3.4	Scaling and Standardizing	2						
3.5	Inequality	1						
4	Bivariate Analysis							
4.1	Relationships between Two Variables	1						
4.2	Percentage Tables	1						
4.3	Analysing Contingency Tables	1						
4.4	Handling Several Batches	1						
4.5	Scatterplots	1						
4.6	Resistant Lines	1						
5	Multivariate and Time Series Analysis							
5.1	Introducing a Third Variable	1						
5.2	Causal Explanations	1						
5.3	Three-Variable Contingency Tables and Beyond	1						
5.4	Fundamentals of TSA	1						
5.5	Characteristics of time series data, Data Cleaning	1						
5.6	Time-based indexing, Visualizing, Grouping, Resampling.	1						
Practical		•						
1.	Perform exploratory data analysis (EDA) with datasets like email data set. Export all your emails as a dataset, import them inside a pandas data frame, visualize them and get different insights from the data	4						
2.	Working with Numpy arrays, Pandas data frames , Basic plots using Matplotlib	4						
3.	Explore various variable and row filters in R for cleaning data. Apply various plot features in R on sample data sets and visualize	4						
4.	Perform Time Series Analysis and apply the various visualization techniques	4						
5.	Perform Data Analysis and representation on a Map using various Map data sets with Mouse Rollover effect, user interaction, etc	4						
6.	Build cartographic visualization for multiple datasets involving various countries of the world; states and districts in India etc	4						
7.	Perform EDA on Wine Quality Data Set	6

Course Cor	tents and Lecture Schedule	
S. No.	Topics	No. of Hours
1	Fundamentals of Mobile & Web Application Development	1
1.1	Basics of Web and Mobile application development	1
1.2	Native App	1
1.3	Hybrid App	1
1.4	Cross-platform App	1
1.5	What is Progressive Web App	1
1.6	Responsive Web design	1
2	Native App Development Using Java	1
2.1	Native Web App, Benefits of Native App	1
2.2	Scenarios to create Native App	1
2.3	Tools for creating Native App, Cons of Native App	1
2.4	Popular Native App Development Frameworks	1
2.5	Java & Kotlin for Android	1
2.6	Swift & Objective-C for iOS	1
3	Hybrid App Development	1
3.1	Hybrid Web App, Benefits of Hybrid App	1
3.2	Criteria for creating Native App	1
3.3	Tools for creating Hybrid App	1
3.4	Cons of Hybrid App	1
3.5	Popular Hybrid App Development Frameworks	1
3.6	Flutter Basics and Requirements	1
4	Cross-Platform App Development Using React-Native	ı
4.1	What is Cross-platform App, Benefits of Cross-platform App	1
4.2	Criteria for creating Cross-platform App	1
4.3	Tools for creating Cross-platform App, Cons of Cross-platform App	1
4.4	Popular Cross-platform App Development Frameworks	1
4.5	React-Native	1
4.6	Basics of React Native - Native Components, JSX, State, Props	1
5	Deployment of Mobile Application	1 .
5.1	Deployment Process Overview	1
5.2	Preparing for Deployment	1
5.3	App Store Guidelines	1
5.4	Continuous Integration and Continuous Deployment	2
5.5	Testing	1
Practical:	T	
1.	Using react native, build a cross platform application for a BMI calculator	4
2.	Build a cross platform application for a simple expense manager which allows entering expenses and income on each day and displays category wise weekly income and expense	4
3.	Develop a cross platform application to convert units from imperial system to metric system (km to miles, kg to pounds etc.,)	4
4.	Design and develop a cross platform application for day to day task (to-do) management	4
5.	Design an android application using Flutter for a user login screen with username, password, reset button and a submit button. Also, include header image and a label. Use layout managers	4
6.	Design and develop an android application using Flutter to find and display the current location of the user	4
7.	Write programs using Java to create Android application having Databases • For a simple library application • For displaying books available, books lend, book reservation. Assume that student information is available in a database which has been stored in a database server	6

60 AM E13	Ethical Hacking	Category	L	T	Р	Credit
	Ethical Hacking	PE	2	0	2	3

- To understand the basics of computer based vulnerabilities
- To explore different foot printing, reconnaissance and scanning methods
- To expose the enumeration and vulnerability analysis methods
- To understand hacking options available in Web and wireless applications
- To explore the options for network protection
- To practice tools to perform ethical hacking to expose the vulnerabilities

Pre-requisites

• Basic Knowledge of Network Protocols and Architectures.

Course Outcomes

CO1	Acquire knowledge on basics of computer-based vulnerabilities	Understand	
CO2	Acquire knowledge on different foot printing, reconnaissance and scanning methods.	Apply	
CO3	Demonstrate the enumeration and vulnerability analysis methods	Analyse	
CO4	Acquire knowledge on hacking options available in Web and wireless applications.	Analyse	
CO5	Acquire knowledge on the options for network protection.	Remember

OU AIVI E 14	Reality/Virtual Reality	PE	2	0	2	3

- To impart the fundamental aspects and principles of AR/VR technologies
- To know the internals of the hardware and software components involved in the development of AR/VR enabled applications
- To learn about the graphical processing units and their architectures
- To gain knowledge about AR/VR application development
- To know the technologies involved in the development of AR/VR based applications

Pre-requisites

• Basic Understanding of spatial Mathematics and Physics concepts.

Course Outcomes

CO1	Acquire foundational knowledge of AR and VR concepts.	Understand
CO2	Identify the tools and technologies pertaining to AR/VR.	Remember
CO3	Insights into the working principle of AR/VR related Sensor devices.	Understand
CO4	Develop the various models using modeling techniques.	Apply
CO5	Develop AR/VR applications in different domains.	Apply

Маррі	Mapping with Programme Outcomes

Modelling and Annotation in AR – Navigation in AR – Wearable Devices for AR. Practical: 1. Study of tools like AR toolkit, Vuforia and Blender 2. Use the primitive objects and apply various projection types by handling camera 3. Download objects from asset store and apply various lighting and shading effects 4. Model three dimensional objects using various modelling techniques and apply textures over them 5. Create three dimensional realistic scenes and develop simple virtual reality enabled mobile applications which have limited interactivity 6. Add audio and text special effects to the developed application 7. Develop VR enabled applications using motion trackers and sensors incorporating full haptic interactivity 8. Develop AR enabled applications with interactivity like E learning environment, Virtual walkthroughs and visualization of historic places

Course Con	tents and Lecture Schedule	
S. No.	Topics	No. of Hours
1	Introduction	
1.1	Introduction to Virtual Reality, Introduction to Trajectories and Hybrid Space	1
1.2	Three I's of Virtual Reality, Components of VR System	1
1.3	Introduction to AR Technologies	1
1.4	Input Devices – 3D Position Trackers, Types of Trackers	1
1.5	Gesture Interfaces – Types of Gesture Input Devices	1
1.6	Output Devices – Graphics Display, Human Visual System and Personal Graphics Displays	1
2	VR Modeling	
2.1	Fundamentals of Modeling	1
2.2	Geometric Modeling	1
2.3	Kinematics Modeling	1
2.4	Transformation Matrices, Object Position, Transformation Invariants, Object Hierarchies	1
2.5	Viewing the 3D World	1
2.6	Physical Modeling, Behavior Modeling, Model Management	1
3	VR Programming	•
3.1	VR Programming	1
3.2	Toolkits	1
3.3	Scene Graphs	1
3.4	World Toolkit	1
3.5	Java 3D	1
3.6	Comparison of World Toolkit and Java 3D	1
4	Applications	I
4.1	Human Factors in VR , Methodology and Terminology	1
4.2	VR Health and Safety Issues	1
4.3	VR Applications in Various Fields	1
4.4	Military VR Applications	1
4.5	VR Applications in Manufacturing and Robotics	1
4.6	Information Visualization	1
5	Augmented Reality	I
5.1	Introduction to Augmented Reality	1
5.2	Computer Vision for AR	1
5.3	Interaction in AR	1
5.4	Modelling and Annotation in AR	1
5.5	Navigation in AR	1
5.6	Wearable Devices for AR	1
Practical:		l
1.	Study of tools like AR toolkit, Vuforia and Blender	4
2.	Use the primitive objects and apply various projection types by handling camera	4
3.	Download objects from asset store and apply various lighting and shading effects	4
4.	Model three dimensional objects using various modelling techniques and apply textures over them	4
5.	Create three dimensional realistic scenes and develop simple virtual reality enabled mobile applications which have limited interactivity	4
6.	Add audio and text special effects to the developed application	2
7.	Develop VR enabled applications using motion trackers and sensors	4
8.	incorporating full haptic interactivity Develop AR enabled applications with interactivity like E learning	4
О.	environment, Virtual walkthroughs and visualization of historic places	4

60 AM E15	Cyber Security	Category	L	Т	Р	Credit
OU AIVI E13	Cyber Security	PE	2	0	2	3

- To learn cybercrime and cyberlaw
- To understand the cyber-attacks and tools for mitigating them
- To understand information gathering
- To learn how to detect a cyber-attack
- To learn how to prevent a cyber-attack

Pre-requisites

Basic Knowledge of Network Security Protocols and Architectures.

Course Outcomes

CO1	Delve into the fundamental aspects of cybersecurity, cybercrime and cyber law.	Understand
CO2	Categorize different attack types and gain practical expertise in utilizing associated tools for execution.	Apply
CO3	Apply various tools to perform information gathering.	Apply
CO4	Apply intrusion techniques to detect intrusion.	Apply
CO5	Apply intrusion prevention techniques to prevent intrusion.	Apply

60 AM E22	Cloud Services	Category	L	T	Р	Credit
OU AIVI EZZ	Management	PE	2	0	2	3

- To Introduce Cloud Service Management terminology, definition & concepts
- Compare and contrast cloud service management with traditional IT service management
- Identify strategies to reduce risk and eliminate issues associated with adoption of cloud services
- Select appropriate structures for designing, deploying and running cloud-based services in a business environment
- Illustrate the benefits and drive the adoption of cloud-based services to solve real world problems

Pre-requisites

· Basic Understanding of IT Concepts.

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Gain proficiency in leveraging cloud technologies to automate and develop business solutions.	Understand
CO2	Acquire proficiency in Cloud Service Strategy and Architecture.	Understand
CO3	Employ Cloud services and technologies to solve the real world problems.	Apply
CO4	Analyse cloud service pricing models and cost structures to optimize expenditure of cloud-based solutions.	Analyse
CO5	Develop effective IT and cloud governance frameworks, to assess the impact of cloud services on organizational objectives.	Apply

60 AM E25	Quantum Computing	Category	L	Т	Р	Credit
		PE	2	0	2	3

- To know the background of classical computing and quantum computing.
- To learn the fundamental concepts behind quantum computation.
- To study the details of quantum mechanics and its relation to Computer Science.
- To gain knowledge about the basic hardware and mathematical models of quantum computation.
- To learn the basics of quantum information and the theory behind it.

Pre-requisites

· Basic Understanding of Quantum Mechanics Principles.

Course Outcomes

CO1	Acquire Knowledge on the basics of quantum computing.	Understand
CO2	Acquire Knowledge on the background of Quantum Mechanics.	Understand
CO3	Analyse the computation models.	Analyse
CO4	Develop the circuits using quantum computation, environments and frameworks.	Apply
CO5	Gain Insights into the quantum operations such as noise and error—correction.	Understand

60 AM E26	Soft Computing	Category	L	Т	Р	Credit
	Soft Computing	PE	2	0	2	3

- To introduce the ideas of fuzzy sets, fuzzy logic and use of heuristics based on human experience
- To provide the mathematical background for carrying out the optimization associated with neural network learning
- To learn various evolutionary Algorithms
- To become familiar with neural networks that can learn from available examples and generalize to form appropriate rules for inference systems
- To introduce case studies utilizing the above and illustrate the Intelligent behaviour of programs based on soft computing

Pre-requisites

• Basic Knowledge of Al Concepts and basic Understanding of Calculus, Statistics.

Course Outcomes

CO1	Acquire Knowledge on the fundamentals of fuzzy logic operators and inference mechanisms.	Understand
CO2	Gain Insights into the neural network architecture for AI applications such as classification and clustering.	Understand
CO3	Apply the functionality of Genetic Algorithms in Optimization problems.	Apply
CO4	Apply hybrid techniques involving Neural networks and Fuzzy logic.	Apply
CO5	Apply soft computing techniques in real world applications.	Apply

OU AIVI E33	Social Network Security	PE	3	0	0	3

- To develop semantic web related simple applications
- To explain Privacy and Security issues in Social
- To explain the data extraction and mining of social networks
- To discuss the prediction of human behavior in social communities
- To describe the Access Control, Privacy and Security management of social networks

Pre-requisites

• Understanding of Network Protocols and Security Measures.

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Develop semantic web related simple applications.	Apply
CO2	Address Privacy and Security issues in Social Networking.	Apply
CO3	Acquire Knowledge on data extraction and mining of social networks.	Understand
CO4	Apply the prediction of human behavior in social communities.	Apply
CO5	Gain insights into the applications of social networks.	Understand

- · To introduce the broad perspective of linear and nonlinear editing concepts
- · To understand the concept of Storytelling styles
- · To be familiar with audio and video recording
- To apply different media tools
- To learn and understand the concepts of AVID XPRESS DV 4

Pre-requisites

• Proficiency in Video Editing Software.

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Outline the strengths and limitations of Nonlinear editing.	Understand
CO2	Design the infrastructure and significance of storytelling.	Apply
CO3	Apply suitable methods for recording to CDs and VCDs.	Apply
CO4	Delving into the advanced editing and training techniques	Remember
CO4	requires a nuanced understanding of their core principles.	
CO5	Design and develop projects using AVID XPRESS DV 4.	Apply

M

60 AM E36	Como Theory	Category	L	T	Р	Credit
OU AIVI ESO	Game Theory	PE	3	0	0	3

- To introduce the student to the notion of a game, its solutions concepts, and other basic notions and tools of game theory, and the main applications for which they are appropriate, including electronic trading markets
- To formalize the notion of strategic thinking and rational choice by using the tools of game theory, and to provide insights into using game theory in 41 modelling applications
- To draw the connections between game theory, computer science, and economics, especially emphasizing the computational issues
- To introduce contemporary topics in the intersection of game theory, computer science, and economics
- To apply game theory in searching, auctioning and trading

Pre-requisites

• Foundation in Probability and Statistics Concepts.

Course Outcomes

CO1	Outline the notion of a strategic game and equilibria and identify the characteristics of main applications of these concepts.	Remember
CO2	Comprehend the use of Nash Equilibrium for other problems.	Understand
CO3	Identify key strategic aspects and connect them to relevant game theoretic concepts in a real-world scenario.	Remember
CO4	Identify some applications that need aspects of Bayesian Games.	Remember
CO5	Develop a typical Virtual Business scenario using Game theory.	Apply

60 AM E41	Business Analytics	Category	L	T	Р	Credit
		PE	1	0	4	3

- To understand the Analytics Life Cycle
- To comprehend the process of acquiring Business Intelligence
- To understand various types of analytics for Business Forecasting
- To model the supply chain management for Analytics
- To apply analytics for different functions of a business

Prerequisite

• Proficiency in Python and SQL.

Course Outcomes

CO1	Acquire knowledge on the real world business problems and model with analytical solutions.	Understand
CO2	Analyse the business processes for extracting Business Intelligence.	Analyse
CO3	Apply predictive analytics for business fore-casting.	Apply
CO4	Apply analytics for supply chain and logistics management.	Apply
CO5	Apply analytics for marketing and sales.	Apply

Mappi	Mapping with Programme Outcomes

- To understand the fundamentals of web application security
- To focus on wide aspects of secure development and deployment of web applications
- To learn how to build secure APIs
- To learn the basics of vulnerability assessment and penetration testing
- To get an insight about Hacking techniques and Tools

Prerequisite

• Basic Understanding of Web Technology.

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Acquire the basic concepts of web application security and the need for it.	Understand
CO2	Apply the process for secure development and deployment of web applications.	Apply
CO3	Acquire the skill to design and develop Secure Web Applications that use Secure APIs.	Apply
CO4	Analyse the importance of carrying out vulnerability assessment and penetration testing.	Analyse
CO5	Apply the skill to think like a hacker and to use hacker's tool sets.	Apply

Mapping with Programme Outcomes POs **PSOs** COs 1 6 10 11 12 3 5 8 9 CO1 2 2 2 CO2 2 2 2 3 _ -_ --CO3 2 2 3 2 CO4 2 3 2 3 --_ -_ -CO5 2 2 3 3 3 - Strong; 2 - Medium; 1 - Some

Course C	Contents and Lecture Schedule	
S. No.	Topics	No. of hours
1	Fundamentals of Web Application Security	
1.1	The history of Software Security, Recognizing Web Application Security Threats	1
1.2	Web Application Security, Authentication and Authorization	1
1.3	Session Management , Input Validation	1
2	Secure Development and Deployment	
2.1	Web Applications Security - Security Testing, Security Incident Response Planning	1
2.2	The Microsoft Security Development Lifecycle (SDL), OWASP Comprehensive Lightweight Application Security Process (CLASP)	1
2.3	The Software Assurance Maturity Model (SAMM)	1
3	Secure API Development	
3.1	API Security- Session Cookies, Token Based Authentication, Securing Natter APIs: Addressing threats with Security Controls	1
3.2	Rate Limiting for Availability, Encryption, Audit logging, Securing service-to-service APIs: API Keys, OAuth2	1
3.3	Securing Micro service APIs: Service Mesh, Locking Down Network Connections, Securing Incoming Requests	1
4	Vulnerability Assessment And Penetration Testing	
4.1	Vulnerability Assessment Lifecycle, Vulnerability Assessment Tools: Cloud-based vulnerability scanners, Host-based vulnerability scanners	1
4.2	Network-based vulnerability scanners, Database based vulnerability Scanners, Types of Penetration Tests: External Testing, Web Application Testing	1
4.3	SSID or Wireless Testing, Mobile Application Testing	1
5	Hacking Techniques And Tools	
5.1	Social Engineering, Injection, Cross-Site Scripting(XSS), Broken Authentication and Session Management	1
5.2	Cross-Site Request Forgery, Security Misconfiguration, Insecure Cryptographic Storage, Failure to Restrict URL Access	1
5.3	Tools: Comodo, OpenVAS, Nexpose, Nikto, Burp Suite, etc	1
6	Project	
6.1	Problem Identification	10
6.2	Solution for Problem	15

60 AM E43	Modern Cryptography	Category	L	Т	Р	Credit
OU AIVI E43	Modern Cryptography	PE	1	0	4	3

- To learn about Modern Cryptography
- To focus on how cryptographic algorithms and protocols work and how to use them
- To build a pseudorandom permutation
- To construct Basic cryptanalytic techniques
- To provide instruction on how to use the concepts of block ciphers and message authentication codes

Prerequisite

• Basic Understanding of Cryptographic Algorithms.

Course Outcomes

CO1	Acquire knowledge on the basic principles of cryptography and general cryptanalysis.	Understand
CO2	Apply the concepts of symmetric encryption and authentication.	Apply
CO3	Acquire knowledge on the public key encryption, digital signatures and key establishment.	Understand
CO4	Articulate the cryptographic algorithms to compose, build and Analyse simple cryptographic solutions.	Analyse
CO5	Apply Message Authentication Codes.	Apply

	Digital Marketing	PE	1	0	4	3

- To primary objective of this module is to examine and explore the role and importance of digital marketing in today's rapidly changing business environment
- To focuses on how digital marketing can be utilized by organizations and how its effectiveness can be measured

Prerequisite

• Understanding of basic Marketing Principles and Strategies.

Course Outcomes

CO1	Outline the role and importance of digital marketing in today's rapidly changing business environment.	Understand
CO2	Focuses on how digital marketing can be utilized by organizations and how its effectiveness can be measured.	Apply
CO3	Identify the key elements of a digital marketing strategy.	Remember
CO4	Analyse the effectiveness of a digital marketing campaign can be measured.	Analyse
CO5	Apply advanced practical skills in common digital marketing tools such as SEO, SEM, Social media and Blogs.	Apply

- To know the theoretical background of cognition
- To understand the link between cognition and computational intelligence
- To explore probabilistic programming language
- To study the computational inference models of cognition
- To study the computational learning models of cognition

Pre-requisites

• Basic Knowledge on Neural Networks.

Course Outcomes

CO1	Acquire Knowledge on the underlying theory behind cognition.	Understand
CO2	Apply Computational Methods to sync with cognition elements.	Apply
CO3	Apply mathematical functions using Web PPL.	Apply
CO4	Develop applications using cognitive inference model.	Apply
CO5	Develop applications using cognitive learning model.	Apply

60 AM E51	Image and Video	Category	L	T	Р	Credit
OU AIVI EST	Analytics	PE	3	0	0	3

- To understand the basics of image processing techniques for computer vision
- To learn the techniques used for image pre-processing
- To discuss the various object detection techniques
- To understand the various Object recognition mechanisms
- To elaborate on the video analytics techniques

Pre-requisites

• Proficiency in Python Libraries such as OpenCV and Tensorflow.

Course Outcomes

CO1	Acquire the basics of image processing techniques for computer vision and video analysis.	Understand
CO2	Identify the techniques used for image pre-processing.	Remember
CO3	Acquire knowledge on various object detection techniques.	Understand
CO4	Gain insights into the various face recognition mechanisms and implement it using Facenet.	Apply
CO5	Acquire Knowledge on deep learning-based video analytics.	Understand

Course Contents and Lecture Schedule								
S. No.	Topics	No. of hours						
1.0	Introduction							
1.1	Computer Vision	1						
1.2	Image Representation and Image Analysis Tasks	1						
1.3	Image Representations	1						
1.4	Digitization	1						
1.5	Properties	1						
1.6	Color Images	1						
1.7	Data Structures for Image Analysis	1						
1.8	Traditional And Hierarchical Image Data Structures	2						
2.0	Image Pre-Processing							
2.1	Local Pre-Processing	1						
2.2	Image Smoothing	1						
2.3	Edge Detectors	1						
2.4	Zero-Crossings of The Second Derivative	1						
2.5	Scale In Image Processing	1						
2.6	Canny Edge Detection	1						
2.7	Parametric Edge Models, Edges in Multi-Speralct Images	1						
2.8	Local Pre-Processing in The Frequency Domain	1						
2.9	Image Restoration	1						
3.0	Univariate Analysis	,						
3.1	Object Detection, Object Detection Methods	1						
3.2	Deep Learning Framework for Object Detection	1						
3.3	Bounding Box Approach	1						
3.4	Deep Learning Architectures-R-CNN	1						
3.5	Deep Learning Architectures-Faster R-CNN	1						
3.6	You Only Look Once (YOLO), Salient Features	1						
3.7	Loss Functions	1						
3.8	YOLO Architectures	2						
4.0	Face recognition and gesture recognition							
4.1	Face Recognition, Introduction	1						
4.2	Applications of Face Recognition	1						
4.3	Process of Face Recognition	1						
4.4	Deep Face Solution by Facebook	1						
4.5	Face Net for Face Recognition	1						
4.6	Implementation Using Face Net	2						
4.7	Gesture Recognition	2						
5.0	Video Analytics							
5.1	Video Processing	1						
5.2	Use Cases of Video Analytics	1						
5.3	Vanishing Gradient and Exploding Gradient Problem	1

60 AM E52	DovOns	Category	L	Т	Р	Credit
60 AM E52	DevOps	PE	3	0	0	3

- To introduce DevOps terminology, definition & concepts
- To understand the different Version control tools like Git, Mercurial
- To understand the concepts of Continuous Integration/ Continuous Testing/ Continuous Deployment
- To understand Configuration management using Ansible
- Illustrate the benefits and drive the adoption of cloud-based Devops tools to solve real world problems

Pre-requisites

• Basic Knowledge of Linux Systems and Command-line Interface.

Course Outcomes

CO1	Acquire Knowledge on DevOps principles and concepts.	Understand				
CO2	Perform Continuous Integration and Continuous Testing and Continuous Deployment Using Jenkins by Building And Automating Test Cases Using Maven & Gradle.					
CO3	Ability to Perform Automated Continuous Deployment.	Apply				
CO4	Ability to Do Configuration Management Using Ansible.	Apply				
CO5	Acquire to Leverage Cloud Based DevOps Tools Using Azure DevOps. Understand

- To know the importance and need for software security
- To know about various attacks
- To learn about secure software design
- To understand risk management in secure software development
- To know the working of tools related to software security

Pre-requisites

• Basic Knowledge on Software Development life cycles.

Course Outcomes

CO1	Identify various vulnerabilities related to memory attacks.	Remember
CO2	Gain Insights into the various security principles in software development.	Understand
CO3	Acquire knowledge on risk management system.	Understand
CO4	Involve selection of testing techniques related to software security in the testing phase of software development.	Apply
CO5	Apply tools for securing software.	Apply

60 AM E54	Visual Effects	Category	L	T	Р	Credit
OU AIVI E34	Visual Ellects	PE	3	0	0	3

- To get a basic idea on animation principles and techniques
- To get exposure to CGI, colour and light elements of VFX
- To have a better understanding of basic special effects techniques
- To have a knowledge of state of the artvfx techniques
- To become familiar with popular compositing techniques

Pre-requisites

• Basic Knowledge of Design Principles and Visual Storytelling.

Course Outcomes

CO1	Acquire knowledge on the animation basics.	Understand
CO2	Apply CGI, color and light elements in VFX applications.	Apply
CO3	Apply special effects using state-of-the-art tools.	Apply
CO4	Apply popular visual effects techniques using advanced tools.	Apply
CO5	Apply Compositing tools for creating VFX for a variety of applications.	Apply

60 AM E56	Ethics & Al	Category	L	Т	Р	Credit
OU AIVI ESO	Eulics & Al	PE	3	0	0	3

- To study the morality and ethics in Al
- To learn about the Ethical initiatives in the field of artificial intelligence
- To study about AI standards and Regulations
- To study about social and ethical issues of Robot Ethics
- To study about AI and Ethics- challenges and opportunities

Pre-requisites

• Understanding of ethical theories and Al Concepts.

Course Outcomes

CO1	Acquire knowledge about morality and ethics in Al.	Understand
CO2	Acquire knowledge on ethical initiatives in AI and analyse it in vaious fields.	Analyse
CO3	Acquire knowledge about AI standards and Regulations like AI Agent, Safe Design of Autonomous and Semi-Autonomous Systems.	Understand
CO4	Gain insights into robots and roboethics.	Understand
CO5	Analyse the real time application ethics, issues and its challenges	Analyse

60 AM L01	Exploratory Data	Category	L	T	Р	Credit
OU AIVI LUT	Analysis	OE	3	0	0	3

- To outline an overview of exploratory data analysis
- To implement data visualization using Matplotlib
- To perform univariate data exploration and analysis
- To apply bivariate data exploration and analysis
- To use Data exploration and visualization techniques for multivariate and time series data

Pre-requisites

· Basic Understanding of Statistics and Probability.

Course Outcomes

CO1	Acquire knowledge on the fundamentals of exploratory data analysis.	Understand
CO2	Apply the data visualization using Matplotlib.	Apply
CO3	Apply univariate data exploration and analysis.	Apply
CO4	Apply bivariate data exploration and analysis.	Apply
CO5	Apply Data exploration and visualization techniques for multivariate and time series data.	Apply

60 AM L02	Al for Energy Conservation	Category	L	T	Р	Credit
OU AIVI LUZ	and Management	OE	1	0	4	3

- To provide a knowledge of artificial intelligence (AI) applications in climate change
- To explore the role of AI in monitoring greenhouse gas emissions for sustainable innovations
- To equip students with knowledge of energy systems for Al-driven sustainability initiatives
- To identify the risks, barriers, and ethical considerations associated with implementing AI for emissions reduction
- To analyse the use of AI in key sectors, including manufacturing, food systems, and transportation

Pre-requisites

• NIL.

Course Outcomes

CO1	Demonstrate an AI technologies in climate change mitigation efforts.	Understand
CO2	Apply AI's in monitoring, decision-making in various sectors to reduce	Apply
CO2	emissions.	
CO3	Analyze and suggest policies and frameworks of power and energy sector that	Analyse
CO3	support.	
CO4	Identify barriers and ethical concerns in AI in manufacturing and materials	Analyse
CO4	innovation.	-
CO5	Design Al-driven strategies and solutions in manufacturing, and food systems.	Analyse
