Objective(s)		To impart the fundamental knowledge about operations management, viz., forecasting models, methods of aggregate planning models, methods of scheduling, process planning focusing group technology, classification, coding system, expediting and monitoring.							
1.	FORECASTING				Total Hrs		6		
<ul style="list-style-type: none"> ❖ Simple moving average ❖ Weighted moving average ❖ Simple exponential smoothing ❖ Linear regression analysis ❖ Survey method ❖ Delphi technique ❖ Forecasting error 									
2.	CAPACITY PLANNING				Total Hrs		5		
<ul style="list-style-type: none"> ❖ Measurement of capacity ❖ Estimating future capacity needs ❖ Factors influencing effective capacity ❖ Factors favoring over capacity & under capacity 									
3.	AGGREGATE PLANNING METHODS				Total Hrs		10		
<ul style="list-style-type: none"> ❖ Nature of Aggregate planning decisions ❖ Aggregate planning strategies ❖ Linear Programming ❖ Transportation method ❖ Heuristic method ❖ Trial and error method 									
4.	SCHEDULING				Total Hrs		9		
<ul style="list-style-type: none"> ❖ Forward scheduling ❖ Backward scheduling ❖ Single machine sequencing with Independent jobs ❖ Parallel machine models ❖ Flow shop scheduling ❖ Job shop scheduling ❖ Dispatching 									
5.	PROCESS PLANNING				Total Hrs		5		
<ul style="list-style-type: none"> ❖ Group Technology ❖ Classification and coding systems for process planning ❖ Expediting and monitoring.

		L	T	P		C	CA	ES
10MBA EP7	VALUE ENGINEERING AND WASTE CONTROL	3	0	0	3	50	50	100
Objective(s)	A technique to be learned to achieve improvements in design, performance, life producibility, maintainability, service and warranty. Improvement in size, sharpe, features, style appearance, Characteristics. Improvements in quality – reliability, quality per cost. Improvement in cost of production, use maintenance and ownership. Improvement of all kinds, all types , in all areas, and on all facets, continuous and continuing improvements							
1.	Unit – I				Total Hrs	8		
<ul style="list-style-type: none"> ❖ Nature and Significance of Value Engineering ❖ Relation of Value Engineering to other operations principles ❖ Problem Recognition and Definition. The role of Creativity ❖ The Criteria for Comparison. The meaning and analysis of function ❖ The anatomy of functions ❖ Basic vs unnecessary functions ❖ Using and evaluating functions. 								
2.	Unit – II				Total Hrs	8		
<ul style="list-style-type: none"> ❖ The role of Management in Value Engineering ❖ Integral Part of Value Engineering Programme ❖ Responsibilities ❖ Organisation of Value Engineering ❖ Budgeting ❖ Auditing ❖ Merit recognition\Techniques of Value Engineering ❖ Developing alternatives in decision making ❖ Measuring Benefits\Reporting results – follow up. 								
3.	Unit – III				Total Hrs	7		
<ul style="list-style-type: none"> ❖ Decision process ❖ Linear Programming ❖ Utility ❖ Gant charts ❖ Pert charts and Technique network logic critical path method. Use of control charts. 								
4.	Unit – IV				Total Hrs	7		
<ul style="list-style-type: none"> ❖ Organisation and staffing for Value Engineering ❖ Level of Value Engineering ❖ Small plant value Engineering activity ❖ Size and Skills of Value Engineering staff. Training of value engineers ❖ Introduction of peripheral Personnel. 								
5.	Unit – V					5		
<ul style="list-style-type: none"> ❖ Value Engineering at work ❖ Variety Reduction quality performance, reliability and market values, and in decreasing direct labour costs, Material Cost and Capital Cost.
