K.S. Rangasamy College of Technology (Autonomous)

CURRICULUM AND SYLLABI

FOR

B.E. Civil Engineering (For the batch admitted in 2023 – 2024)

R2022

Accredited by NAAC A++, Approved by AICTE, Affiliated to Anna University, Chennai.

KSR Kalvi Nagar, Tiruchengode – 637 215. Namakkal District, Tamil Nadu, India.

P. Wywy -CHAIRMAN Board of Studies Faculty of Civil Engineering K.S.Rangasamy College of Technolo ogy TIRUCHENGODE - 637 215

Department of Civil Engineering

VISION OF THE DEPARTMENT

To empower the graduates to excel as a competent professional in the areas of design and development of safe, healthy, sustainable and eco-friendly infrastructure for overall development of the society.

MISSION OF THE DEPARTMENT

- To provide quality education through interdisciplinary research and innovative practices for the Betterment of human society in teaching and learning.
- To develop creative solutions for a wide range of challenges in civil engineering by adopting modern tools and techniques.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

- **PEO1:** Our graduates are professionally competent in their chosen career and use appropriate techniques and modern engineering tools in executing projects.
- **PEO2:** Our graduates apply mathematical, scientific and engineering principles to solve complex problems in civil engineering through lifelong learning.
- **PEO3:** Our graduates work in multidisciplinary projects with professional and ethical responsibilities.

PROGRAMME OUTCOMES (POs)

Engineering Graduates will be able to

- PO1: **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- PO2: **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- PO3: **Design / development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- PO4: **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- PO5: **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations
- PO6: **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- PO7: **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- PO8: **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- PO9: **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- PO10: **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- PO11: **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- PO12: Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

P. Wywy -CHAIRMAN Board of Studies Faculty of Civil Engineering K.S.Rangasamy College of Technolog TIRUCHENGODE - 637 215 ogy

PROGRAMME SPECIFIC OUTCOMES (PSOs)

Engineering Graduates will be able to:

- **PSO1:** The graduates will have the ability to plan, analyse, design, execute cost effective project related to civil engineering structures with conservation and protection of natural resource for sustainable growth.
- **PSO2:** The graduates will have the ability to take up employment, new start-ups, entrepreneurship, research and development, chartered engineering professional to serve the society with honesty and integrity.

MAPPING OF PROGRAMME EDUCATIONAL OBJECTIVES (PEOs) WITH PROGRAMME OUTCOMES (POs)

The B.E. Civil Engineering Programme outcomes leading to the achievement of the objectives are summarized in the following Table.

Programme					Prog	ramme	Outco	omes				
Educational Objectives	P01	PO2	PO3	PO4	PO5	PO6	P07	PO8	PO9	PO10	PO11	PO12
PEO 1	3	1	3	2	2	1	1	1	2	2	3	1
PEO 2	3	3	3	2	2	1	1	1	2	2	3	1
PEO 3	3	2	3	2	2	1	1	1	3	2	3	1

Contributions: 1- low, 2- medium, 3- high

FIRST SEMESTER

* CA evaluation pattern will differ from course to course and for different tests. This will have to be declared in advance to students. The department will put a process in place to ensure that the actual test pape follow the declared pattern.

** End Semester Examination will be conducted for maximum marks of 100 and subsequently be reduced to 60marks for the award of terminal examination marks

P. Wyhy -CHAIRMAN Board of Studies Faculty of Civil Engineering K.S.Rangasamy College of Technolog TIRUCHENGODE - 637 215 ogy

60 EN 001	Professional English	Category	L	Т	Р	Credit
00 EN 001	Professional English – I	HS	1	0	2	2

Objectives

- To help learners improve their vocabulary and to enable them to use words appropriately in different academic and professional contexts
- To help learners develop strategies that could be adopted while reading texts
- To help learners acquire the ability to speak effectively in English in real life and career related situations
- To equip students with effective speaking and listening skills in English
- To facilitate learners to enhance their writing skills with coherence and appropriate format effectively

Pre-requisites

• Basic knowledge of reading and writing in English

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Compare and interpret complex academic texts	Understand
CO2	Recall the denotative and connotative meanings of technical texts	Remember
CO3	Interpret definitions, descriptions, narrations, and essays on various topics	Understand
CO4	Express fluently and accurately in formal and informal communicative contexts	Understand
CO5	Summarize their opinions effectively in both oral and written medium of communication	Understand

60 MA 001	Matrices and Calculus	Category	L	Т	Р	Credit
	Matrices and Calculus	BS	3	1	0	4

Objectives

- To familiarize the students with basic concepts in Cayley-Hamilton theorem and orthogonal
 - transformation.
- To get exposed to the fundamentals of differential calculus in various methods.
- To acquire skills to understand the concepts involved in Jacobians and maxima and minima.
- To solve various linear differential equations and method of variation of parameters.
- To learn various techniques and methods in solving definite and indefinite integrals.

Pre-requisites

- NIL -

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Apply Cayley-Hamilton theorem and reduce the quadratic form into canonical form.	Apply
CO2	Apply differential calculus in solving various Engineering problems.	Apply
CO3	Analyze Jacobian methods and constrained maxima and minima of the functions.	Analyze
CO4	Apply various methods in solving the differential equations.	Apply
CO5	Evaluate definite and indefinite integrals using different techniques.	Evaluate

Course C	Contents and Lecture Schedule	
S. No.	Topics	No. of hours
1.0	Matrices	·
1.1	Characteristic equation	1
1.2	Eigen values and Eigen vectors of a real matrix	1
1.3	Properties of Eigen values and Eigen vectors	1
1.4	Cayley-Hamilton theorem	1
1.5	Tutorial	2
1.6	Orthogonal transformation of a symmetric matrix to diagonal form	1
1.7	Reduction of quadratic form to canonical form by Orthogonal transformation	1
1.8	Nature of quadratic form	1
1.9	Stretching of an elastic membrane	1
1.10	Tutorial	2
2.0	Differentiation	
2.1	Representation of functions	1
2.2	Limit of a functionand Continuity	1
2.3	Differentiation rules (sum, product, quotient, chain rules)	2
2.4	Successive differentiation	1
2.5	Tutorial	2
2.6	Leibnitz's theorem	1
2.7	Maximaandminimaoffunctionsof onevariable	2
2.8	Tutorial	2
3.0	Functions of Several Variables	
3.1	Partial differentiation	1
3.2	Homogeneous functions and Euler's theorem	1
3.3	Jacobians	2
3.4	Tutorial	2
3.5	Taylor's series for functions of two variables	1
3.6	Maxima and minima of functions of two variables	1
3.7	Lagrange's Method of Undetermined Multipliers	2
3.8	Tutorial	2
4.0	Differential Equations	
4.1	Linear differential equations of second and higher order with constant co-efficient	1
4.2	R.H.S is of the form $e^{\alpha x}$, $\sin \alpha x$, $\cos \alpha x$, x^n , $n > 0$	2
4.3	Tutorial	2
4.4	Differential equations with variable coefficients: Cauchy's form of linear equations	2
4.5	Differential equations with variable coefficients: Legendre's form of linear equations	2
4.6	Method of variation of parameters	1
4.7	Tutorial	2
5.0	Integration	
5.1	Definite and Indefinite integrals	1
5.2	Substitution rule	1
5.3	Techniques of Integration: Integration by parts	1
5.4	Integration of rational functions by partial fraction	1
5.5	Tutorial	2

P. Hyperty -CHAIRMAN Board of Studies Faculty of Civil Engineering K.S.Rangasamy College of Technology TIRUCHENGODE - 637 215

5.6	Integration of irrational functions	1
5.7	Improper integrals	1
5.8	Hydrostatic force.	1
5.9	Pressure, moments and centres of mass.	1
5.10	Tutorial	2

Course Designer(s)

- 1. Dr.C.Chandran <u>cchandran@ksrct.ac.in</u>
- 2. Mr. G.Mohan mohan@ksrct.ac.in

List of MATLAB Programmes:

- 1. Introduction to MATLAB.
- 2. Matrix Operations Addition, Multiplication, Transpose, Inverse and Rank.
- 3. Solution of system of linear equations.
- 4. Computation of Eigen values and Eigen vectors of a Matrix.
- 5. Finding ordinary and partial derivatives.
- 6. Solving first and second order ordinary differential equations.
- 7. Computing Maxima and Minima of a function of one variable.
- 8. Computing Maxima and Minima of a function of two variables.

P. Nytury -CHAIRMAN Board of Studies Faculty of Civil Engineering K.S.Rangasamy College of Technology TIRUCHENGODE - 637 215

	Physics for Civil Engineering	Category	L	Т	Р	Credit
60 PH 002	Filysics for Civil Engineering	BS	3	0	0	3

Objectives

- To analyze the crystal structures of solids and to gain knowledge of properties of materials
- To enrich the understanding of properties of materials and their applications in engineering and technology
- To explain the principles of laser, types and demonstrate the applications of laser
- To introduce the concepts of acoustics, production of ultrasonic waves and lighting designs
- To study the advanced materials and nanotechnology for various engineering applications

Pre-requisites

- NIL -

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Realize the basics of crystallography and its importance for varied materials properties	Understand
CO2	Appraise the engineering problems like plastic deformation, slip and twinning by material testing methods	Understand
CO3	Utilize a strong foundational knowledge in lasers and its applications	Apply
CO4	Recognize the characteristics of sound and suggestions for buildings with good acoustics	Apply & Analyse
CO5	Infer the properties of advanced materials and nano materials for potential applications	Apply

60 CH 002	Chemistry for Civil Engineering	Category	L	Т	Ρ	Credit
00 CH 002	Chemistry for Civil Engineering	BS	3	0	0	3

Objectives

- To help the learners to analyse the hardness of water and its removal
- To study an overview of types of corrosion and its control.
- To rationalize the plating techniques and alloys.
- To analyze the concepts, functions and classification of composites
- To recall the basics building material.

Pre-requisites

- NIL -

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Identify the types of hardness of water and its removal.	Apply
CO2	Understand the concept of corrosion and its control	Understand
CO3	Identify the types of coatings, alloys, and their applications.	Apply
CO4	Grasp the important properties of construction materials.	Understand
CO5	Comprehend the definition and importance of composites.	Understand

Course C	contents and Lecture Schedule	
S. No.	Topics	No. of hours
1.0	Water Technology	
1.1	Introduction – Commercial and Industrial Uses of Water	1
1.2	Hardness - Types	1
1.3	Estimation of Hardness of by EDTA Method	1
1.4	Internal Conditioning (Colloidal, Phosphate, Calgon and Carbonate)	1
1.5	External Conditioning (Zoelite Process & Demineralization Process)	2
1.6	Desalination Methods (Reverse Osmosis and Electrodialysis)	2
1.7	Flash Evaporation	1
2.0	Corrosion Chemistry	
2.1	Electrochemical Corrosion	1
2.2	Corrosion due to Dissimilar Metal Cells (Galvanic Cells),	1
2.3	Corrosion due to Differential Aeration	1
2.4	Factors Influencing Corrosion	2
2.5	Microbial Induced Concrete Corrosion and Bio Fouling	2
2.6	Corrosion Control: Cathodic Protection (Sacrificial Anodic Protection,	2
2.0	Impressed Current Cathodic Protection).	2
3.0	Protective Coatings	
3.1	Protective Coatings: Classification.	1
3.2	Metallic Coating: Electroplating – Electroless Plating- Diffusion Coating	1
3.3	Paint: Types and Characteristics of Paints.	1
3.4	Constituents - Drying Process.	1
3.5	Varnishes: Characteristics - Constituents. Enamels and Lacquers (Natural Resins).	1
3.6	Alloys: Properties of Alloys- Significance of Alloying.	1
3.7	Functions and Effect of Alloying Elements - Ferrous Alloys – Nichrome and Stainless Steel.	2
3.8	Heat Treatment of Steel, Non-Ferrous Alloys – Brass and Bronze.	1
4.0	Construction Materials	•
4.1	Classification Of Construction Materials - Soil: Constituent of Soil (Phase, Structure and Texture)	1
4.2	Physical and Chemical Properties Acid, Alkali and Saline Soils	1
4.3	Clay: Classification of Clay - Composition, Particle Shape, Size, Plasticity, CEC, Occurrences.	1
4.4	Important Properties and Uses of China Clay, Bentonites.	1
4.5	Refractories: Definition Classification Properties of Refractories.	1
4.6	Preparation, Properties and Uses of High Alumina Bricks, Magnesite and Zirconia Bricks.	2
4.7	Cement: Manufacture of Portland Cement and Setting.	2
5.0	Modern Building Materials	
5.1	Composites : Introduction: Definition & Need for Composites;	1
5.2	Constitution: Matrix Materials (Polymer Matrix, Metal Matrix and Ceramic Matrix)	2
5.3	Reinforcement (Fiber, Particulates, Flakes and Whiskers).	1
5.4	Properties and Applications of Metal Matrix Composites (MMC)	1
5.5	Ceramic Matrix Composites and Polymer Matrix Composites	1
5.6	Nano Composites: Properties - Applications.	2
5.7	Hybrid Composites: Properties - Applications.	1

60 EE 001	Basic Electrical and Electronics	Category	L	Т	Р	Credit
00 EE 001	Engineering	ES	3	0	0	3

Objectives

- To familiarize the basic concept on electrical circuits and its various parameters
- To facilitate the various types of electrical machines and their uses
- To gain knowledge on Electrical safety
- To provide exposure on the functions of various semiconductor devices
- To familiarize the use of various measuring instruments

Pre-requisites

- NIL -

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Apply the basic laws of electric circuits to calculate the unknown quantities.	Remember
CO2	Acquire knowledge on different electrical machines and select suitable machines for industrial applications.	Remember
CO3	Recognize the significance of various components of low voltage electrical installations and create awareness on electrical safety.	Understand
CO4	Realize the operation and characteristics of semiconductor devices.	Understand
CO5	Understand the operating principles of measuring instruments and choose suitable instrument for measuring the parameters.	Understand

பாடத்தின் நோக்கங்கள்:

- தமிழ் மொழியின் இலக்கணச் செறிவைக் கற்றுணர்தல், வாழ்க்கைத் திறன்கள் மற்றும் நெறிமுறைகள் தெரிதல்.
- தமிழர் பண்பாட்டின் நுண்கலைகள் பற்றிய ஒரு மீள்பார்வை.
- தமிழர்களின் நாட்டுப்புறக்கலைகள் மற்றும் வீரவிளையாட்டுகள் குறித்து அறிதல்
- தமிழர்களின் திணைக் கோட்பாடுகள், சங்ககால வணிகம் மற்றும் சோழர்களின் வெற்றிகள் குறித்த தகவல்களை தெரிதல்.
- இந்திய சுதந்திரப் போராட்டத்தில் தமிழர்களின் பங்களிப்பை உணருதல்

	(Common to Civil, Mech, MCT)	BS	0	0	4	2

- To infer the practical knowledge by applying the experimental methods to correlate with the Physics theory.
- To demonstrate an ability to make physical measurements and understand the limits of precision in measurements
- To analyze the behavior and characteristics of various materials for its optimum utilization
- Test the knowledge of theoretical concepts and develop the experimental skills of the learners.
- To facilitate data interpretation and expose the learners to various industrial and environmental applications

Pre-requisites

• Nil

Course Outcomes

On the su	ccessful completion of the course, students will be able to	
CO1	Apply the concept of stress, strain and elastic limit for a given sample to find their properties	Apply
CO2	Recognize the concept of quantum Physics & magnetic properties by experimental verification	Apply
CO3	Infer the properties of light and fiber optic cable	Apply
CO4	Apply the concepts of chemistry and develop analytical skills for applications in engineering to determine the rate of corrosion	Apply
CO5	Analyze the pH, electrode potential, conductance sample solutions	Analyze

60 EN 002	Professional English II	HS	1	0	2	2

- To help learners improve their vocabulary and enable them to use words appropriately in different academic and professional contexts.
- To help learners develop strategies that could be adopted while reading texts.
- To help learners acquire the ability to speak and write effectively in English in real life and career related situations.
- Improve listening, observational skills, and problem-solving capabilities
- Develop message generating and delivery skills

Pre-requisites

Basic knowledge of reading and writing in English and should have completed Professional English I.

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Compare and contrast products and ideas in technical texts.	Analyze
CO2	Identify cause and effects in events, industrial processes through technical texts	Analyze
CO3	Analyze problems in order to arrive at feasible solutions and communicate them orally and in the written format.	Analyze
CO4	Report events and the processes of technical and industrial nature.	Apply
CO5	Articulate their opinions in a planned and logical manner, and draft effective résumés in context of job search.	Apply

Course C	Contents and Lecture Schedule	
S. No.	Topics	No. of hours
1	Multiple Integrals	-
1.1	Double integration	1
1.2	Cartesian and polar coordinates	1
1.3	Change of order of integration	1
1.4	Area as double integral	1
1.5	Tutorial	2
1.6	Triple integration in Cartesian coordinates	1
1.7	Change of variables	1
1.8	Cartesian to polar coordinates	1
1.9	Cartesian to Cylindrical coordinates	1
1.10	Tutorial	2
2.0	Vector Calculus	-
2.1	Introduction: Gradient of a scalar point function	1
2.2	Directional derivative	1
2.3	Angle of intersection of two surfaces	1
2.4	Divergence and curl (excluding vector identities)	1
2.5	Tutorial	2
2.6	Solenoidal and irrotational vectors	1
2.7	Application: Green's theorem in the plane	1
2.8	Gauss divergence theorem	1
2.9	Stokes' theorem (statement only)	1
2.10	Tutorial	2
3.0	Analytic Functions and Integrals	
3.1	Analytic function	1
3.2	Necessary and Sufficient conditions (statement only)	1
3.3	Properties	1
3.4	Harmonic function	1
3.5	Tutorial	2
3.6	Construction of an analytic function	1
3.7	Cauchy's Integral theorem (statement only), Cauchy's integral formula	1
3.8	Classification of singularities	1
3.9	Applications : Cauchy's residue theorem.	1
3.10	Tutorial	2
4.0	Partial Differential Equations	-
4.1	Formation of partial differential equations by eliminating arbitrary constants	1
4.2	Formation of partial differential equations by eliminating arbitrary functions	2
4.3	Tutorial	2
4.4	Non- linear partial differential equations of first order	2
4.5	Lagrange's linear equations	1
4.6	Application : Homogeneous Linear partial differential equations with constant coefficients.	2
4.7	Tutorial	2
5.0	Laplace Transform	1
5.1	Conditions for existence	1
5.2	Transforms of elementary functions	1

P. hypur -CHAIRMAN Board of Studies Faculty of Civil Engineering K.S.Rangasamy College of Technology TIRUCHENGODE - 637 215

5.3	Basic properties	1
5.4	Derivatives and integrals of transforms, Initial and final value theorem	1
5.5	Tutorial	1
5.6	Transform of periodic functions	2
5.7	Inverse Laplace transform	1
5.8	Convolution theorem (excluding proof)	1
5.9	Application:Solution of second order ordinary differential equation with constant co-efficient.	1
5.10	Tutorial	2

- 1. Dr. C. Chandran cchandran@ksrct.ac.in
- 2. Dr. K. Prabakaran prabakaran@ksrct.ac.in

List of MATLAB Programmes:

- 1. Evaluating double and triple integrals.
- 2. Area as double integral.
- 3. Volume as triple integral.
- 4. Plotting and visualizing single variable functions.
- 5. Plotting and visualizing functions of two and three variables.
- 6. Evaluating Gradient, divergence and curl.
- 7. Evaluating Laplace & Inverse Laplace transforms.
- 8. Applying Laplace transform techniques to solve differential equations

P. Hyperty -CHAIRMAN Board of Studies Faculty of Civil Engineering K.S.Rangasamy College of Technology TIRUCHENGODE - 637 215

		Category	L	Т	Р	Credit
60 CS 001	C Programming	ES	3	0	0	3

- To learn most fundamental element of the C language and to examine the execution of branching, looping statements,
- To examine the concepts of arrays, its characteristics and types and strings.
- To understand the concept of functions, pointers and the techniques of putting them to use
- To apply the knowledge of structures and unions to solve basic problems in C language
- To enhance the knowledge in file handling functions for storage and retrieval of data

Pre-requisites

NIL

Course Outcomes

On the su	On the successful completion of the course, students will be able to								
CO1	Construct the fundamental building blocks of structured Programming in C	Apply							
CO2	Implement the different operations on arrays and strings	Apply							
CO3	Develop simple real world applications utilizing functions, recursion and pointers.	Apply							
CO4	Demonstrate the concepts of structures ,unions ,user defined data types and preprocessor	Apply							
CO5	Interpret the file concepts using proper standard library functions for a given application	Apply

60 CE 101	Civil Engineers	ES	3	0	0	3

- To introduce the students to use drawing instruments and to draw cones, polygons, Engineering curves etc.
- To introduce the students to use scales and orthographic projections, projections of points & simple lines.
- To make the students draw the projections of the plane inclined to both the planes.
- To make the students draw the projections of the various types of solids in different positions inclined to one of the planes.
- To make the students to understand about Civil Engineering Components and its identification code.

Pre-requisites

Basic knowledge of Higher Secondary Mathematics, Binary Operations & Mathematic Logic.

Course Outcomes

On the su	On the successful completion of the course, students will be able to								
CO1	Use the different drafting instruments to draw the drawings.	Apply							
CO2	Draw the projections of regular points and line.	Apply							
CO3	Draw the projections of solids.	Apply							
CO4	Identifying the building drawing symbols and observations.	Understand							
CO5	Draw details of part of a building.	Apply

01 CE 201	Applied Mechanics	PC	3	1	0	4

- To understand static equilibrium of particles and rigid bodies in two dimensions.
- To comprehend the effect of friction on equilibrium.
- To Understand the properties of section that are needed for the design of structural elements
- To understand the laws of motion, the kinematics of motion and the interrelationship.
- To impart a knowledge about properties of sections, kinetics of particles..

Pre-requisites

Basic knowledge of Physics

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Recall the fundamental knowledge on laws of mechanics and Computation of equilibrium of forces to know the different types of support and reactions	Remember
CO2	Explain the concepts of different types of static frictions and Analyse the truss member by different methods	Understand
CO3	Compute the centroid and second moment of area for various sections	Apply
CO4	Examine the different types of motion in dynamics of particles	Analyse
CO5	Compute the mass, force and acceleration using Newton's law and D'Alembert's principle	Analyse

- To understand the importance of ecosystem and biodiversity.
- To analyze the impacts of pollution, control and legislation.
- To enlighten awareness and recognize the social responsibility in environmental issues.
- To enlighten the waste management

Pre-requisites

Nil

Course Outcomes

On the su	ccessful completion of the course, students will be able to	
CO1	Understand the impacts of pollution on climate change	Understand
CO2	Enhance the awareness the methods of waste management.	Apply
CO3	Examine the value of sustainable future	Evaluate
CO4	Evaluate the clean and green development for environmental problem	Evaluate
CO5	Analyze the role of Geo-science in environmental management	Analyze

Course (Contents and Lecture Schedule	
S. No.	Topics	No. of hours
1.0	Pollution and its impact on climate change	
1.1	Pollution: Sources and impacts of air pollution – green house effect- Global warming- climate change - ozone layer depletion - acid rain	2
1.2	Climate change on various sectors: Agriculture, forestry and ecosystem. – climate change mitigation and adaptation	1
1.3	Action plan on climate change - IPCC, UNFCCC, Kyoto Protocol, Montreal Protocol on Climatic Changes	1
2.0	Integrated Waste Management	
2.1	Waste - Types and classification. Principles of waste management (5R approach) - Swachh Bharat Abhiyan	1
2.2	Commercial waste, plastic waste, domestic waste, e-waste and biomedical waste	1
2.3	Risk management: Collection, segregation, treatment and disposal methods.	1
2.4	Waste water treatment- ASP	1
3.0	Sustainable development practices	
3.1	Sustainable development goals (SDGs) – Green computing- Carbon trading - Green building – Eco- friendly plastic	1
3.2	Alternate energy: Hydrogen – Bio-fuels – Solar energy – Wind – Hydroelectric power	2
3.3	Water scarcity- Watershed management, ground water recharge and rainwater harvesting	1
4.0	Environment and Agriculture	
4.1	Organic farming – bio-pesticides	1
4.2	Composting, bio composting, vermi-composting	1
4.3	Roof gardening and irrigation	1
4.4	Waste land reclamation. Climate resilient agriculture, Green auditing	1
5.0	Geo-science in natural resource management	
5.1	Data base software in environment information, Digital image processing applications in forecasting	2
5.2	GPS, Remote Sensing and Geographical Information System (GIS)	1
5.3	World wide web (www), Environmental information system (ENVIS)	1

1. Dr.T.A.Sukantha - sukantha@ksrct.ac.in

2. Dr.B.Srividhya – srividhyab@ksrct.ac.in

3. Dr.K.Prabha – prabhak@ksrct.ac.in

4. Dr.S.Meenachi – meenachi@ksrct.ac.in

5. Mr.K.Tamilarasu - tamilarasu@ksrct.ac.in

6. Ms.D.Kirthiga - kiruthiga@ksrct.ac.in

P. Lyfury -CHAIRMAN Board of Studies Faculty of Civil Engineering K.S.Rangasamy College of Technology TIRUCHENGODE - 637 215

60 GE 002	தமிழரும் தொழில்நுட்பமும் (அனைத்து துறைகளும்	Category	L	Т	Р	Credit
00 02 002	பொதுவானது)	GE	1	0	0	1*

பாடத்தின் நோக்கங்கள்:

- தமிழர்களின் சங்ககால நெசவு, பானை வனைதல் குறித்து அறிதல்.
- தமிழர்களின் கட்டிடத் தொழில் நட்பம் குறித்து அறிதல்.
- தமிழர்களின் உற்பத்தி முறைகள் குறித்து அறிதல்.
- தமிழர்களின் சங்ககால வேளாண்மை, நீர்ப்பாசனம் குறித்து கற்றல்.
- நவீன அறிவியல் தமிழ் மற்றும் கணித்தமிழ் குறித்த புரிதல்.
- முன்கூட்டிய துறை சார் அறிவு
 - தேவை இல்லை

பாடம் கற்றதின் விளைவுகள்

பாடத்தை வெற்றிகரமாக கற்று முடித்த பின்பு, மாணவர்களால் முடியும் விளைவுகள்

CO1	சங்ககாலத் தமிழர்களின் நெசவு மற்றும் பானை வனைதல் தொழில்நுட்பம்	நினைவு கூர்தல்,
001	குறித்த கற்றுணர்தல்.	புரிதல்
CO2	சங்ககாலத் தமிழர்களின் கட்டிட தொழில்நுட்பம் கட்டுமானப் பொருட்கள்	நினைவு கூர்தல்,
002	மற்றும் அவற்றை விளக்கும் தளங்கள் குறித்த அறிவு.	புரிதல்
CO3	சங்ககாலத் தமிழர்களின் உலோகத் தொழில் நாணயங்கள் மற்றும் மணிகள்	நினைவு கூர்தல்,
005	சார்ந்த தொல்லியல் சான்றுகள் பற்றிய அறிவு.	புரிதல்
004	சங்ககாலத் தமிழர்களின் வேளாண்மை, நீர்ப்பாசன முறைகள் மற்றும் முத்து	நினைவு கூர்தல்,
CO4	குளித்தல் குறித்த தெளிவு.	பரிதல்
		நினைவு கூர்தல்,
CO5	நவீன அறிவியல் தமிழ் மற்றும் கணித்தமிழ் குறித்த புரிந்துகொள்ளலும் மன்றைத் பயன்படுக் தாதலுத்	பரிதல்,
	மற்றும் பயன்படுத்துதலும்.	செயல்படுத்துதல்

00 C3 UP1	Laboratory	PC	0	0	4	2

- To enable the students to apply the concepts of C to solve simple problems
- To use selection and iterative statements in C programs
- To apply the knowledge of library functions in C programming
- To implement the concepts of arrays, functions, structures and pointers in C
- To implement the file handling operations through C

Pre-requisites

NIL

Course Outcomes

On the successful completion of the course, students will be able to

en ale ea		
CO1	Implement computational problems using selection and iterative statements	Apply
CO2	Demonstrate C program to manage collection of related data.	Apply
CO3	Design and Implement different ways of passing arguments to functions, Recursion and implement pointers concepts.	Apply
CO4	Develop a C program to manage collection of different data using structures, Union, user-defined data types and preprocessor directives.	Apply
CO5	Demonstrate C program to store and retrieve data using file concepts.	Apply

- To make the students gain practical knowledge to co-relate with the theoretical studies and to acquire skills on operating the hand tools and instruments.
- To provide hands on training on Fitting, Carpentry, Sheet metal, Welding and machine
- To offer real time activity on plumbing connections in domestic applications tools.
- To provide hands on training on house hold wiring and electronic circuits.
- To provide hands on activities on dismantling, assembling of the computer internal components and peripherals.

Pre-requisites

• Nil

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Perform facing, plain turning and drilling.	Apply
CO2	Make a model of fitting, carpentry, sheet metal and welding joints.	Apply
CO3	Construct the water pipe line in plumbing shop.	Apply
CO4	Trouble shoots the electrical and electronic circuits and realizes the importance of earthing.	Apply
CO5	Identify and install computer internal components and peripherals	Apply

- To help learners improve their vocabulary and to enable them to use words appropriately in different academic and professional contexts
- To help learners develop strategies that could be adopted while reading texts
- To help learners acquire the ability to speak effectively in English in real life and career related situations
- To equip students with effective speaking and listening skills in English
- To facilitate learners to enhance their writing skills with coherence and appropriate format effectively

Pre-requisites

Basic knowledge of reading and writing in English.

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Listen and comprehend complex academic texts	Understand
CO2	Read and infer the denotative and connotative meanings of technical texts	Analyze
CO3	Write definitions, descriptions, narrations, and essays on various topics	Apply
CO4	Speak fluently and accurately in formal and informal communicative contexts	Apply
CO5	Appraise the verbal ability skills in the career development and professional contexts	Analyze

List of Experiments:

Listening*

Listening for general information-specific details - audio / video (formal & informal) - Listen to podcasts/ TED talks/ anecdotes / stories / event narration / documentaries and interviews with celebrities - Listen to a product and process descriptions, advertisements about products or services.

Speaking*

Self-Introduction; Introducing a friend; conversation - politeness strategies - Narrating personal experiences / events; Interviewing a celebrity; reporting / and summarizing of documentaries / podcasts/ interviews - Picture description; giving instruction to use the product; presenting a product - Small Talk; Mini presentations - Group discussions, debates & role plays.

Reading*

Loud reading vs Silent reading, Skimming & Scanning of passages, reading brochures (technical context), social media messages relevant to technical contexts and emails - Biographies, travelogues, newspaper reports and travel & technical blogs - Advertisements, gadget reviews and user manuals - Newspaper articles and Journal reports - Editorials; and opinion blogs

Writing*

Writing letters – informal and formal – basics and format orientation - paragraph texting, short report on an event (field trip etc.) - Definitions; instructions; and product /process description - Note-making / Note-taking; recommendations; transferring information from non-verbal (charts, graphs to verbal mode) - Essay texting

Verbal Ability I*

Reading Comprehension (MCQs) – Cloze Test - Sequencing of sentences – Summarizing and paraphrase – Error Detection – Spelling Test – Sentence Improvement - Preposition

80 WA 007	Numerical Methods	BS	3	1	0	4

- To provide an understanding of the statistical methods and distribution concept by which real life problems are analyzed.
- To learn basic concepts in descriptive statistics.
- To apply numerical techniques for solving system of linear equations.
- To understand and apply the concepts of interpolation and numerical integration.
- To solve initial value problems of ordinary differential equations numerically.

Pre-requisites

Basic knowledge of reading and writing in English

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Understand the basic concepts of probability and random variables.	Understand
CO2	Apply Student's t test, F test and Chi-square test for testing the statistical hypothesis.	Apply
CO3	Compute measures of central tendency, measures of dispersion and correlation coefficient.	Apply
CO4	Employ various iteration techniques for solving algebraic, transcendental and system of linear equations.	Apply
CO5	Apply different techniques to find the intermediate values and to evaluate single definite integrals.	Apply

01 CE 301	Strength of Materials	PC	3	1	0	4

- To learn the fundamental concepts of Stress, Strain and deformation of solids.
- To know bending stress and shear stress distribution in various sections.
- To calculate the deflection of beams under the application of external forces.
- To evaluate the performance of columns.
- To assess the behaviour of shaft, Cylinders and springs.

Pre-requisites

Fundamentals of Mathematics, knowledge of strength of materials and its mechanics

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Understand various types of stresses and strains developed in the member.	Evaluate
CO2	Sketch the bending and shear stress distribution of a member.	Evaluate
CO3	Compute the deflection of beams by different methods and selection of method for determining slope or deflection.	Evaluate
CO4	Describe the failure modes for various types of columns.	Evaluate
CO5	Analyze the members subjected to torsion.	Apply

60 CE 302	Fluid Mechanics and	Category	L	Т	Р	Credit
60 CE 302	Hydraulics Machinery	PC	3	1	0	4

- To be able to study the importance of various properties and characteristics of fluids.
- To solve fluid statics and kinematic problems such as pressure measurement, particle paths and streamlines.
- To derive the equation of conservation of mass and its application.
- To use important concepts of boundary layers theory, continuity equation, Bernoulli's equation and turbulence, and apply the same to problems.
- To understand the various flow measuring devices pumps and turbines and analyse its performance.

Pre-requisites

• Applied Physics.

Course Outcomes

On the successful completion of the course, students will be able to

CO1	State and explain various fluid properties.	Understand
CO2	Apply the knowledge of fluid statics for solving the problems in buoyancy and Pressure measurement.	Apply
CO3	Gain knowledge on fluid kinematics for solving the problems in Stream and Potential functions.	Understand
CO4	Solve problems in flow dimensional analysis and boundary layer.	Analyse
CO5	Analyze the performance of turbines and pumps.	Analyse

- To be familiar with fundamental knowledge on surveying and survey instruments.
- To carry out levelling and calculate area and volume from contour map.
- To conduct Theodolite Surveying for complex surveying and setting out of curves.
- To introduce the concepts of Control Surveying and Survey adjustments
- To know various modern instruments used in surveying.

Pre-requisites

Basic knowledge of properties learnt in Physical Science and Mathematical courses.

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Demonstrate the rudiments of various surveying and its principles.	Remember
CO2	Acquire knowledge on applications of levelling and contouring.	Understand
CO3	Imparts concepts of Theodolite Surveying for complex surveying operations like tachometry, Trigonometry and Setting out of Curves.	Understand
CO4	Construct the procedure for establishing horizontal and vertical control while surveying and practice to obtain probable value.	Apply
CO5	Imparts the knowledge on modern surveying instruments	Apply

60 CE 3P1	Fluid Mechanics and Hydraulics	Category	L	Т	Р	Credit	
	Engineering Laboratory	PC	0	0	4	2	ĺ

To be able to verify the principles studied in theory by performing the experiments in lab.

• To reinforcing the basics of fluid mechanics and machinery by hands on experiment.

- To hands on experiments in calibration of flow meters.
- To evaluate the Performance characteristics of turbines.
- To evaluate the Performance characteristics of pumps.

Pre-requisites

Engineering Mathematics, Physics and Fluid Mechanics.

Course Outcomes

 On the successful completion of the course, students will be able to

 CO1
 Measure the flow in the open channels using orifice and notches.

 CO2
 Measure the flow in pipe section using orificemeter and venturimeter.

CO2	Measure the flow in pipe section using orificemeter and venturimeter	Apply
CO3	Measure and compute the major and minor losses in Pipes.	Apply
CO4	Study the performance of different types of hydraulic Turbines.	Analyse
CO5	Study the performance of different types of pumps	Analyse

60 CE 2D2	Surveying Leberatory	Category	L	Т	Р	Credit
60 CE 3P2	Surveying Laboratory	PC	0	0	4	2

- To Measure the surveying quantities Length, Area and Volume.
- To Learn the horizontal and vertical angle measurements using compass and theodolite.
- To get practice on Graphical surveying by practicing of Plane table surveying.
- To make aware the concept leveling in surveying and contour making.
- To handle the digital surveying instruments GPS and Total station.

Pre-requisites

Engineering Mathematics, Surveying.

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Familiar to chaining, ranging and apply it to take the angular measurement and Identify local attraction and appropriate methods to rectify it.	Apply
CO2	Calculate the irregular traverse area using Plane table methods, Collect the level of different points and calculate the reduced level of the respective points by appropriate methods.	Apply
CO3	Apply the lens principle to find the tachometric constants. Setting out of curve by linear and angular methods and trigonometric leveling.	Apply
CO4	Identify the ground co-ordinates with elevation of earth surface points with help of GPS and Calculate the area and volume using total station.	Apply
CO5	Explain Aerial photo Interpretation through stereo model creation with help of provided aerial photographs	Apply

60 CG 0P2	Development - II	CG	0	0	2	1*

- To help learners improve their vocabulary and enable them to use words appropriately in different academic and professional contexts.
- To help learners develop strategies that could be adopted while reading texts.
- To help learners acquire the ability to speak and write effectively in English in real life and career related situations.
- Improve listening, observational skills, and problem-solving capabilities
- Develop message generating and delivery skills

Pre-requisites

• Basic knowledge of reading and writing in English.

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Compare and contrast products and ideas in technical texts.	Analyze
CO2	Identify cause and effects in events, industrial processes through technical texts	Analyze
CO3	Analyze problems in order to arrive at feasible solutions and communicate them orally and in the written format.	Analyze
CO4	Report events and the processes of technical and industrial nature.	Apply
CO5	Articulate their opinions in a planned and logical manner, and draft effective résumés in context of job search.	Apply

List of Experiments:

Listening*

Evaluative Listening: Advertisements, Product Descriptions, - Audio / video; filling a graphic organiser (choosing a product or service by comparison) - Listening to longer technical talks and completing– gap filling exercises. Listening technical information from podcasts – Listening to process/event descriptions to identify cause & effects, documentaries depicting a technical problem and suggesting solutions - Listening to TED Talks.

Speaking*

Marketing a product, persuasive speech techniques - Describing and discussing the reasons of accidents or disasters based on news reports, Group Discussion (based on case studies), presenting oral reports, Mini presentations on select topics with visual aids, participating in role plays, virtual interviews.

Reading*

Reading advertisements, user manuals and brochures - longer technical texts– cause and effect essays, and letters / emails of complaint - Case Studies, excerpts from literary texts, news reports etc. - Company profiles, Statement of Purpose (SoPs).

Writing*

Professional emails, Email etiquette - compare and contrast essay - Writing responses to complaints Precis writing, Summarizing and Plagiarism- Job / Internship application – Cover letter & Resume

Verbal Ability II*

Reading Comprehension (Inferential fillups) – Spotting Errors – Verbal Analogies – Theme Detection – Change of Voice – Change of Speech – One word substitution

- To provide students with basic understanding of physical and mechanical properties of soil.
- To impart knowledge of basic index and engineering properties of soil
- To identify factors controlling soil behavior and methods to determine soil properties.
- To acquire basic knowledge in engineering design of geotechnical systems
- To Analyse the stability of slopes with protection measures

Pre-requisites

Basic knowledge of properties learnt in Geology courses

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Impart the fundamental concepts of soil mechanics and identify the soil properties.	Remember
CO2	Understand the importance engineering properties such as Consolidation and compaction of soils	Apply
CO3	Understand the knowledge aspects of Shear strength	Understand
CO4	Evaluate the stress developed in the soil medium	Analyse
CO5	Analyse the stability of slopes.	Analyse

Course (Contents and Lecture Schedule	
S. No.	Topics	No. of hours
1.0	Weak Soil and Improvement Techniques	
1.1	Role of ground improvement in foundation engineering	1
1.2	Methods of ground improvement	2
1.3	Geotechnical problems in alluvial soil	1
1.4	Geotechnical problems in lateritic soil	1
1.5	Geotechnical problems in black cotton soil	1
1.6	Selection of suitable ground improvement techniques based on soil conditions	2
1.7	Reclaimed soil for the land reclamation	1
2.0	Dewatereing	
2.1	Dewatering Techniques	1
2.2	Well points	1
2.3	Vacuum and electroosmotic methods	1
2.4	Seepage analysis	1
2.5	Dimensional flow for fully penetrated slots in homogeneous deposits	1
2.6	Dimensional flow for partially penetrated slots in homogeneous deposits	2
2.7	Simple cases	1
2.8	Design	1
3.0	Insitu Treatment of Cohesionless and Cohesive Soils	
3.1	Insitu densification of cohesion-less soils	1
3.2	Insitu densification of consolidation of cohesive soils	1
3.3	Dynamic compaction Vibroflotation	1
3.4	Sand compaction piles	1
3.5	Deep compaction	1
3.6	Consolidation Overview	1
3.7	Preloading with sand drains, and fabric drains, Stone columns and Lime	1
	piles-installation techniques	
3.8	Simple design – relative merits of above methods and their limitations	1
3.9	Combined footings (for two columns only foundations)	1
4.0	Grouting	
4.1	Classifications of Chemical systems	1
4.2	Grouting operations	2
4.3	Grouting applications	1
4.4	Compaction and Techniques	1
4.5	Application and limitations	1
4.6	Plant for preparing grouting materials	2
4.7	Jet Grouting	1
4.8	Geometry and properties of treated soils	1
4.9	Applications of geometry and properties of treated soils	1
5.0	Stabilization	
5.1	Introduction to Soil improvement by adding materials.	1
5.2	Improvement adding materials like lime, fly ash, cement	2
5.3	Improvement adding materials like chemicalsand bitumen	1
5.4	Sand column, stone column, sand drains, prefabricated drains	1
5.5	Soil lime column	1
5.6	Stabilization of soft clay or silt with lime	1
5.7	Bearing capacity and settlement oftreated soils	1
5.8	Improvement in slope stabilitycontrol methods	1
5.9	Soil Structure Interaction and Nailing Techniques.	1

List of MATLAB Programmes:

- 1. Introduction to MATLAB for Ground Improvement Techniques.
- 2. Matrix Operations foralluvial soil and lateritic
- 3. Solution of system forpreparing grouting materials.
- 4. Computation of values for Soil improvement by adding materials.
- 5. Finding bearing capacity and settlement of treated soils.
- 6. Solving Sand compaction piles using differential equations.
- 7. Computing Maxima and Minima of Dynamic compaction Vibroflotation.
- 8. Computing dimensional flow for fully penetrated slots in homogeneous deposits.

60 CE 403	Water Supply and	Category	L	Т	Ρ	Credit
60 CE 403	Waste Water Engineering	PC	3	0	0	3

- To understand the sources and conveyance of water supply system.
- To learn the principles of various water treatment processes.
- To gain knowledge on the sources, characteristics and conveyance of sewage.
- To know the principles of secondary treatment of sewage.
- To acquire knowledge on sewage disposal and sanitation systems

Pre-requisites

Basic knowledge on environmental science.

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Interpret the water demand and elements of water conveyance.	Understand
CO2	Describe the principles of water purification methods.	Remember
CO3	Report the quantity of waste water generated and it's transmitting.	Understand
CO4	Explain the principles of biological processes of sewage treatment.	Apply
CO5	Recognize appropriate sewage disposal methods and sanitation system.	Understand

60 CE 404	Concrete Technology	PC	3	0	0	3

- To acquire knowledge about the properties of concrete making materials
- To perform concrete mix design using IS and ACI methods
- To learn fresh and hardened properties of concrete
- To gain knowledge in manufacture and special concreting methods
- To understand the properties of materials used for making special concrete and its applications

Pre-requisites

Construction Materials and Practices

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Learn the properties of concrete making materials	Remember		
CO2	Design Concrete mix as per IS and ACI codes	Understand		
CO3	Perform various test on fresh and hardened concrete	Apply		
CO4	Outline the manufacturing process of concrete and special concreting methods	Analyse		
CO5	Apply special concrete in construction practices	Apply

Course C	contents and Lecture Schedule	
S. No.	Topics	No. of hours
1.0	Concrete Making Materials	
1.1	Introduction to the course & concrete making materials	1
1.2	Cement: Chemical composition and Properties – Hydration of cement	1
1.3	Various Test on cement	2
1.4	Gel space ratio, Abrahams law and Classification of aggregates	1
1.5	Various test on aggregates and Alkali Aggregate reaction	2
1.6	Water quality parameters and their impact on concrete	1
1.7	Mineral admixtures	1
1.8	Chemical admixtures	1
2.0	Mix Design	
2.1	Principles of concrete mix design	1
2.2	Factors influencing mix design & Nominal and design mix - Differences	1
2.3	IS Method of mix design - Procedure	1
2.4	IS Method of mix design - Problem	2
2.5	ACI Method of mix design - Procedure	1
2.6	ACI Method of mix design - Problem	1
3.0	Properties of Concrete	
3.1	Workability and factors affecting workability	1
3.2	Slump cone and Vee bee consistometer test	1
3.3	Compaction factor and Flow table test	1
3.4	Compressive Strength and Split tensile strength	2
3.5	Flexural Strength, Stress-Strain Curve for concrete - Modulus of elasticity	2
3.6	Durability Properties - Water absorption & Permeability	1
3.7	Durability Properties – Acid resistance	1
4.0	Concreting Manufacture & Methods	
4.1	Manufacturing Process – Batching & Mixing of concrete	2
4.2	Transporting & Placing of concrete	2
4.3	Compacting & Curing of concrete	2
4.4	Ready Mix Concrete	1
4.5	Vacuum dewatering	1
4.6	Underwater concrete	1
4.7	Cold and Hot weather Concreting	1
5.0	Special Concretes	
5.1	Properties and Applications - Lightweight concrete using Artificial aggregates	1
5.2	Ferro-cement	1
5.3	Fiber reinforced concrete	1
5.4	Polymer Concrete	1
5.5	Air entrained concrete	1
5.6	High performance concrete & High strength concrete	1
5.7	Self compacting concrete	1
5.8	Self curing concrete	1
5.9	Geo-polymer concrete	1

60 MY 002	Universal Human Values	MY	2	2	0	3

- To identify the essential complementarily between 'values' and 'skills'
- To ensure core aspirations of all human beings.
- To acquire ethical human conduct, trustful and mutually fulfilling human behaviour
- To enrich interaction with Nature
- To achieve holistic perspective towards life and profession

Pre-requisites

NIL

Course Outcomes

On the successful completion of the course, students will be able to

	•	
CO1	Understand the significance of value inputs in formal	Understand
001	education and start applying them in their life and profession	
CO2	Evaluate coexistence of the "I" with the body.	Analyze
CO3	Identify and evaluate the role of harmony in family, society and	Analyze
003	universal order.	
CO4	Classify and associate the holistic perception of harmony at all	Analyze
004	levels of existence and Nature	
CO5	Develop appropriate human conductand management	Create
005	patterns to create harmonyin professional and personal lives.

S. No.	Topics	No. of hours
1.0	Introduction to Value Education	
1.1	Discussion on Present Education System and Skill Based Education	1
1.2	Understanding Value Education	1
1.3	Self exploration as the process for value education	1
1.4	Basic Human Aspirations - Continuous Happiness and Prosperity	1
1.5	Basic requirements to fulfill Human Aspirations - Right understanding, Relationship and Physical facility	1
1.6	Transformation from Animal Consciousness to Human Consciousness	1
1.7	Sources of Happiness and Prosperity – Harmony and Disharmony	1
1.8	Current Scenario and Role of Education	1
1.9	Outcome of Human Education and Method to fulfill the basic human aspirations	1
2.0	Harmony in the Human Being	
2.1	Understanding Human being - As Co-Existence of the self and the Body - The Needs of the Self and the Body	1
2.2	Understanding Human being - As Co-Existence of the self and the Body - The Activities and Response of the Self and the Body	2
2.3	The body as an instrument of the self	1
2.4	Understanding harmony in the self	1
2.5	Harmony of the self with the body	2
2.6	Programme to ensure self-regulation and health	1
2.0	My Participation (Value) regarding Self and my Body - Correct Appraisal of our	1
2.7	Physical needs	1
3.0	Harmony in the Family and Society	
3.1	Harmony in the Family - Understanding Values in Human Relationships	1
3.2	Family as the basic Unit of Human Interaction	1
3.3	Values in human Relationships	1
3.4	Trust - the foundation value in relationship	1
3.5	Respect as the right evaluation, the Basis for Respect, Assumed Bases for Respect today	1
3.6	Harmony from Family to World Family: Undivided Society	1
3.7	Extending Relationship from family to society, Identification of the Comprehensive Human Goal	1
3.8	Programs needed to achieve the Comprehensive Human Goal: The Five Dimensions of Human Endeavour	1
3.9	Harmony from Family Order to World Family Order – Universal Human Order	1
4.0	Harmony in the Nature / Existence	
4.1	The Four Orders in Nature	1
4.2	Participation of Human Being in Entire Nature	1
4.3	Natural Characteristics - Tendency of Human Living with Animal Consciousness / The Holistic Perception of Harmony in Existence	1
4.4	Present day Problems	1
4.5	Recyclability and self-regulation in Nature	1
4.6	Relationship of Mutual Fulfillment	1
4.7	An Introduction to space, Co-existence of Units in Space	1
4.7	Harmony in Existence – Understanding Existence as Co- Existence	1
4.0	Natural Characteristic of Human Living with Human Consciousness	1
<u>4.9</u> 5.0	Implications of the Holistic Understanding	I
5.0		4
5.1	Natural Acceptance of human values	1
	Definitiveness of Ethical Human Conduct-Development of Human Consciousness	1
5.3	Identification of Comprehensive Human Goal	1
5.4	Basis for Humanistic Education and Humanistic Constitution	1
5.5	Ensuring Competence in professional Ethics	1
5.6	Issues in Professional Ethics-The Current Scenario	1
5.7	Holistic Technologies and Production Systems and management models -Typical Case Studies	2
5.8	Strategies for transition towards value based life and profession	1

- Achieve skill sets to prepare computer aided engineering drawings.
- Understand the details of construction of different building elements.
- Visualize the completed form of the building and the intricacies of construction based on the engineering drawings.

Pre-requisites

Basic knowledge on CADD Software.

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Understand about various tools and commands in AUTO CADD Software.	Knowledge
CO2	Develop any type of building drawing using CADD software.	Apply
CO3	Create layout plan, sanction drawings, working drawings using CADD software.	Apply
CO4	Sketch sectional view and elevation for different buildings.	Apply
CO5	Draw the various building components and also other structural Components.	Apply

- To help learners improve their logical reasoning skillsat different academic and professional contexts.
- To help learners relatebasic quantitative problems and solve them.
- To help learnersInfer critically the statements with optimal conclusions and assumptions.
- To Solve the quantitative problems pertaining to calculations of averages, ratio and proportions, and profit and loss effectively
- To compute quantitative problems related to time and work, speed and distance, and simple and compound interest

Pre-requisites

Basic knowledge of Arithmetic and Logical Reasoning

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Deduce the topics in logical reasoning at the preliminary and intermediate level.	Analyze
CO2	Relate basic quantitative problems and solve them effectively at the preliminary level	Apply
CO3	Infer critically the statements with optimal conclusions and assumptions with the data and information given.	Analyze
CO4	Solve the quantitative problems pertaining to calculations of averages, ratio and proportions, and profit and loss effectively at the pre-intermediate level.	Apply
CO5	Compute quantitative problems related to time and work, speed and distance, and simple and compound interest at intermediate level.	Apply

60 AB 001	Notional Codet Corno Air Wing	Category	L	Т	Р	Credit
60 AB 001	National Cadet Corps - Air Wing	HS	2	0	2	3

- To designed especially for NCC Cadets
- To develop character, camaraderie, discipline, secular outlook
- To inculcate spirit of adventure, sportsman spirit
- To teach selfless service amongst cadets by working in teams
- To learning military subjects including weapon training and motivate them to join in triservices

Pre-requisites

• Nil

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Display sense of patriotism, secular values and shall be transformed into motivated youth who will carry out nation building through national unity and social cohesion	Knowledge
CO2	Demonstrate the sense of discipline with smartness and have basic knowledge of weapons and their use and handling	Knowledge
CO3	Illustrate various forces and moments acting on aircraft	Apply
CO4	Outline the concepts of aircraft engine and rocket propulsion	Apply
CO5	Design, build and fly chuck gliders/model airplanes and display static models	Apply

* CA evaluation pattern will differ from course to course and for different tests. This will have to be declared in advance to students. The department will put a process in place to ensure that the actual test paper follow the declared pattern.

** End Semester Examination will be conducted for maximum marks of 100 and subsequently be reduced to 60marks for the award of terminal examination marks

CHAIRMAN Board of Studies Faculty of Civil Engineering K.S.Rangasamy College of Technology TIRUCHENGODE - 637 215

60 CE 501	Structural Analysis - II	Category	L	Т	Р	Credit	
00 CE 301	Structural Analysis - II	PC	3	1	0	4	

- To learn the plastic analysis of structures
- To gain knowledge on the influence line concepts for moving loads
- To analyse the beams and frames using matrix flexibility method
- To understand the concepts of analysis using matrix stiffness method
- To learn basics about finite element method

Pre-requisites

• Strength of Materials, Structural Analysis I

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Examine the indeterminate beams and frames by using plastic theory.	Apply
CO2	Apply Muller Breslau's principle for drawing Influence line diagram of indeterminate structures.	Apply
CO3	Analyse the beams and rigid frames using matrix flexibility method.	Analyse
CO4	Analyse statically indeterminate structures by displacement methods.	Analyse
CO5	Identify the application and characteristics of FEA elements.	Understand

60 CE 502	Foundation Engineering	PC	3	1	0	4

- To provide an exposure to the site investigation and bore-log report
- To impart knowledge in the selection of sites for investigate
- To determine the soil condition and provide the suitable foundation
- To design the pile foundation based on capacity of super structure
- To evaluate the problems for retaining structures

Pre-requisites

• Geology, Soil Mechanics

Course Outcomes

On the successful completion of the course, students will be able to

CO1	State the knowledge on site investigation and soil exploration.	Remember
CO2	Apply the concepts of bearing capacity of shallow foundations in homogeneous deposits.	Understand
CO3	Classify the footings and calculate the contact pressure distribution below footings.	Analyse
CO4	Evaluate the concepts in load carrying capacity of piles, negative skin friction, pile groups and under reamed pile foundations.	Apply
CO5	Review the knowledge of plastic equilibrium in soils and Rankines theory on cohesion less and cohesive soil.	Remember

60 CE 503 Basic F	Basic Reinforced Concrete	Category	L	Т	Р	Credit
60 CE 503	Design	PC	3	1	0	4

- To know the various methods available to design reinforced concrete structures
- To learn the design of slab for different boundary conditions
- To understand the design and detail of flexure members
- To gain the knowledge of limit state design for shear, torsion, bond and anchorage
- To carry out column and footing design using Limit state method

Pre-requisites

• Concrete Technology, Strength of Materials and Structural Analysis

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Illustrate the various design philosophy to be used in the design of structural elements	Understand
CO2	Design one way and two way slab using Limit state method	Apply
CO3	Apply IS codes in design of flexural members	Apply
CO4	Design RC beams for shear, torsion, bond and anchorage	Apply
CO5	Perform the design of RC column and isolated footing	Analyse

- To Learn basic concepts in entrepreneurship, develop mind-set and skills necessary to explore entrepreneurship
- To provide practical proven tools for transforming an idea into a product or service that creates value for others.
- To Comprehend the process of opportunity identification through design thinking, identify market potential and customers while developing a compelling value proposition solution and prototypes
- To create business plan, conduct financial analysis and feasibility analysis to assess the financial viability of a venture ideas & solutions built with domain expertise
- To Prepare and present an investible pitch deck of their practice venture to attract stakeholders

Pre-requisites

• Basic knowledge of reading and writing in English

Course Outcomes

On the successful completion of the course, students will be able to Develop an entrepreneurial mindset and appreciate the concepts of CO1 Understand design thinking, entrepreneurship and innovation Apply process of problem -opportunity identification and validation CO2 through human centred approach to design thinking in building Apply solutions Understand market types, conduct market estimation, identify CO3 customers, create customer persona, develop the skills to create a Apply compelling value proposition and build a Minimum Viable Product Create business plan, conduct financial analysis and feasibility CO4 Apply analysis to assess the financial viability of a venture Prepare and deliver an investible pitch deck of their practice venture CO5 Create to attract stakeholders

S. No.	Topics	No. of hours
1.0	Introduction to Entrepreneurship & Entrepreneur	
1.1	Meaning and concept of Entrepreneurship and the history of Entrepreneurship development	1
1.2	The Entrepreneur: Meaning, the skills required to be an entrepreneur, the entrepreneurial decision process,	1
1.3	Myths of Entrepreneurship, How to Become a Successful Entrepreneur - Dr Romesh Wadhwani (Platform on boarding)	1
1.4	Role models, Mentors and Support system- Masterclass on My Story - Joshua Salins	1
1.5	Role of Entrepreneurship in Economic Development, Agencies in Entrepreneurship Management and Future of Entrepreneurship	1
1.6	Innovation and Creativity, types of innovations, Innovations in current scenario, Concepts of Entrepreneurial Thinking, General Enterprising tendency test	1
2.0	Problem-Opportunity Identification, Customers Discovery and competitive advantage	ve
2.1	Understanding the Problem and opportunity, define problem using Design thinking principles and validate problem. Case study and Fireside chat – Desi Hangover	1
2.2	Identifying a problem for practice venture and filling Problem statement canvas (Handout week 1 - class activity)	1
2.3	Customer and markets discovery, knowing your customer and consumer, Customer segmentation and Exploring market types and estimating the market size. Case study and Fireside chat – Verloop	1
2.4	Creating customer personas & Market estimation (Handout week 2 - class activity)	1
2.5	Importance of Value Proposition, Introduce Value Proposition Canvas, Developing Problem-solution fit. Case study and Fireside chat – Honey Twigs	1
2.6	Competition analysis, Blue ocean strategy, Competitive positioning and understanding unique selling points. Case study and Fireside chat on Inzpira Fill Value Proposition Canvas (Handout week 3 - class activity) and Competition analysis framework (Handout week 5 - class activity) Briefing on Assignment 1 - Milestone 1	1
3.0	Business model and Build your MVP	
3.1	Introduction to Business model and types. Case study and Fireside chat – NUOS	1
3.2	Lean approach, 9 block lean canvas model, riskiest assumptions to Business models	1
3.3	Class Activity- Fill Lean canvas for you idea and understand revenue model (Handout week 6)	1
3.4	Prototyping, Meaning of MLP, Difference between MLP and MVP, How to build an MLP? Different types MLP that you can build. Case study and Fireside chat – KNORISH	1
3.5	Hypothesis testing and MVP Validation, MVP Iteration-Importance of Build - Measure – Learn approach	1
3.6	Class Activity- Fill MVP framework (Handout week 7) and learn validation	1
4.0	Business Plan, Financial feasibility and Manging growth	
4.1	Business planning: components of Business plan- Sales plan, People plan and financial plan, Preparing a business plan. Case study and Fireside chat – Bodh Gems	1
4.2	Financial Planning: Types of costs, preparing the financial plan using financial template (Handout week 9)	1
4.3	Class activity - starting up costs, COGS, Sales plan and people plan template.	1
4.4	Class activity - One year P&L projection, Breakeven Analysis, Five year projection	1
4.5	Understanding basics of Unit economics and analyzing Growth and the	1

P. Nyhun -CHAIRMAN Board of Studies Faculty of Civil Engineering K.S.Rangasamy College of Technology TIRUCHENGODE - 637 215

4.6	Class activity - Financial template - Unit economics (Handout week 12)	1			
5.0	Go To Market Strategies and Funding				
5.1	Introduction to Go to market strategies, start-up branding and its elements, Selecting the Right Channel	1			
5.2	Creating digital presence, building customer acquisition strategy.	1			
5.3	Class activity: Handout week 10 - create your GTM strategy				
5.4	Choosing a form of business organization specific to your venture				
5.5	Identifying sources of funds: Debt & Equity, Map the Start-up Lifecycle to Funding Options	1			
5.6	Class activity - Visit relevant GOI websites, other sites to help students explore funding opportunities and briefing on final submission of the pitch deck Build an Investor ready pitch deck, What Should You Cover in Your Pitch Deck? Art of pitching and storytelling	1

- To acquire knowledge on index properties of soils
- To determine engineering properties of the soils
- To Provide field in-situ test for cohesive soil
- To know the settlement of foundation by consolidation test
- To understand the California Bearing ratio test

Pre-requisites

• Geology, Soil Mechanics Foundation Engineering

Course Outcomes

On the successful completion of the course, students will be able to

CO1	List the basic concepts and the properties of soil.	Understand
CO2	Classify the soils by sieve analysis, hydrometer method and specific gravity.	Apply
CO3	Apply the knowledge of science and techniques in engineering properties of soil.	Apply
CO4	Identify to design and conduct experiments to analyze critically and interpret resulting data related to various engineering properties of soil.	Analyse
CO5	Evaluate the impact of field density of soil and California Bearing Ratio Test.	Remember

List of Experiments:

- 1. Determination of Specific gravity of soil solids
- 2. Determination of Grain size distribution by using Sieve analysis*
- 3. Determination of Grain size distribution by using Hydrometer analysis*
- 4. Determination of Liquid limit, Plastic limit and Shrinkage limit tests
- 5. Performance Test on Field density test by Sand replacement method and Core Cutter Method
- 6. Measurement of Permeability using constant head and falling head methods
- 7. Determination of moisture content, density relationship using standard Proctor compaction test
- 8. One dimensional consolidation test on Determination of co-efficient of consolidation
- 9. Determination of Direct shear test in cohesion-less soil**
- 10. Determination of Unconfined compression test in cohesive soil**
- 11. Measurement of Laboratory vane Shear test in cohesive soil**
- 12. Performance test on California Bearing ratio***

Design Experiments:

- 1. Determine the water content using pycnometer for the sample collection from your place
- 2. Determination of pH of the given soil sample.

- To understand the general quality of water and wastewater
- To evaluate the physico-chemical parameters of water and wastewater
- To estimate the presence of organic matter and nutrients in water and wastewater
- To detect the contamination in water for various uses
- To decide the type of treatment required and evaluate the efficiency of treatment units

Pre-requisites

• Water Supply and Wastewater Engineering

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Estimate the basic parameters of water and wastewater.	Apply
CO2	Determine the chemical parameters present in water and wastewater.	Apply
CO3	Compute the optimum coagulant dosages for water treatment.	Apply
CO4	Analyze the available chlorine in bleaching powder for chlorination.	Analyse
CO5	Determine the parameters used in wastewater treatment plants.	Apply

- To help learners improve their vocabulary and enable them to use words appropriately in different academic and professional contexts.
- To help learners develop strategies that could be adopted while reading texts.
- To help learners acquire the ability to speak and write effectively in English in real life and career related situations.
- Improve listening, observational skills, and problem-solving capabilities
- Develop message generating and delivery skills

Pre-requisites

Basic knowledge of Arithmetic and Logical Reasoning

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Compare and contrast products and ideas in technical texts.	Analyze
CO2	Identify cause and effects in events, industrial processes through technical texts	Analyze
CO3	Analyze problems in order to arrive at feasible solutions and communicate them orally and in the written format.	Analyze
CO4	Report events and the processes of technical and industrial nature.	Apply
CO5	Articulate their opinions in a planned and logical manner, and draft effective résumés in context of job search.	Apply

- To understand the design concept of various structures and detailing of Reinforcements
- To Understand the basic concepts and behavior of continuous flexural members
- To bring about an exposure to advanced topics in structural design comprising of RCC retaining walls, water tanks and Flat slabs
- To study the design of staircases
- To gain design knowledge related to structures, systems that are likely to be encountered in professional practice

Pre-requisites

• Fundamendals of reinforced concrete Design

Course Outcomes

On the successful completion of the course, students will be able to

CO1	To gain design knowledge related to structures, systems that are likely to be encountered in professional practice.	Understand
CO2	Design interior and exterior panels of flat slab.	Understand
CO3	Identify the suitable retaining wall and design cantilever, counter fort retaining wall.	Apply
CO4	Design various types of liquid storage structures as per Indian standard codal provision.	Analyse
CO5	Design and detail the stair case, RCC wall and Deep beam.	Apply

Course Contents and Lecture Schedule

S. No.	Topics	No. of hours
1.0	Design of Continuous Flexural Members	
1.1	Definition and types of flexural members	1
1.2	Analysis and design considerations for moment redistribution	1
1.3	Case studies and practical examples of live load arrangements in different structures	1
1.4	Analysis and design of continuous beams under different loading conditions	2
1.5	Analysis and design considerations for continuous slabs	2
1.6	Real-world case studies highlighting the application of concepts learned	2
2.0	Design of Flat Slabs	
2.1	Overview of flat slabs and their applications in modern construction	1
2.2	Classification of flat slabs based on different parameters	1
2.3	Two-way flat slabs, one-way flat slabs, and their specific characteristics	2
2.4	Behavior and load-carrying capacity of different types of flat slabs	1
2.5	Detailing of flat slab components for efficient load distribution	1
2.6	Structural analysis of interior panels in flat slab systems	1
2.7	Design considerations for interior panels under various loading conditions	1
2.8	Reinforcement detailing for controlling cracking and improving structural performance	1
2.9	Group design projects to apply learned principles in practical scenarios	1
2.10	Sustainable design practices and their application in flat slab construction	1
3.0	Retaining Wall	
3.1	Comparison of different types of retaining walls and their applications	2
3.2	Gravity retaining walls, cantilever retaining walls, counterfort retaining walls, and their specific characteristics	2
3.3	Detailed study of the key components of retaining walls	1
3.4	Analysis of the design process for cantilever retaining walls	1
3.5	Analysis of the role of counterforts in improving the stability and load-bearing capacity of retaining walls	1
3.6	Calculation of forces and moments in counterfort retaining walls for optimal design and performance	1
3.7	Introduction to innovative materials and technologies in the construction of retaining walls	1
4.0	Water Tank	
4.1	Comparison of different types of water tanks and their specific characteristics	2
4.2	Evaluation of factors influencing the design of water tanks, such as water pressure, seismic loads, and environmental factors	1
4.3	Determination of required reinforcement and detailing for circular water tanks resting on the ground	1
4.4	Design of Circular Water Tanks Underground	1
4.5	Detailing of reinforcement and considerations for construction joints in rectangular water tanks resting on the ground	1
4.6	Seismic design considerations for water tanks	1
4.7	Introduction to innovative technologies in water tank design and construction	1

P. hypurg -CHAIRMAN Board of Studies Faculty of Civil Engineering K.S.Rangasamy College of Technology TIRUCHENGODE - 637 215

4.8	Exploration of future trends and advancements in the field of water tank design	2
5.0	Miscellaneous	
5.1	Analysis of different types of staircases, including ordinary and dog-legged	2
5.2	Detailing and reinforcement requirements for ensuring stability and strength of concrete wall	1
5.3	Evaluation of shear, flexural, and axial forces in reinforced concrete walls	1
5.4	Implementation of design considerations for ensuring the stability and performance of combined footings	1
5.5	Understanding the interaction between different structural elements in a building system	1
5.6	Analysis of load transfer mechanisms between staircases, walls, and footings	1
5.7	Presentation and discussion of design projects for constructive feedback	1

60 CE 602	Design of Steel Structures	Category	∟	Т	Р	Credit	
60 CE 602	Design of Steel Structures	PC	З	1	0	4	

- To understand the basic concepts of limit state design of structural members
- To Design bolted and welded connections
- To Learn the design of compression members & tension members
- To understand the concept of lateral buckling and design various elements like, plate girder and beam- column.
- To understand the Design of purlin, elements of truss and gantry girder.

Pre-requisites

• Strength of Materials, Structural Analysis

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Identify the concepts of bearing & friction type bolted connections and welded connections	Apply
CO2	Illustrate the design of tension members	Apply
CO3	Design the compression members and plate girders.	Apply
CO4	Outline the design concepts of laterally supported and laterally unsupported beams	Apply
CO5	Analyze the different types of truss for the calculated loads	Apply

Course	Contents and Lecture Schedule	
S.No	Торіс	No.of Hours
1.0	Introduction	
1.1	Properties of steel and Structural steel sections	1
1.2	Limit State Design Concepts and Loads on Structures	1
1.3	Connections using rivets, welding, bolting	1
1.4	Design of bolted and welded joints-Concepts	1
1.5	Design of bolted and welded joints- Solve the problems	1
1.6	Eccentric connections - Concepts	1
1.7	Eccentric connections- Solve the problems	1
1.8	Efficiency of joints Concepts	1
1.9	Efficiency of joints- Solve the problems	1
2.0	Tension Members	
2.1	Types of sections – Net area	1
2.2	Net effective sections for angles and Tee in tension	1
2.3	Design of connections in tension members- Concepts	1
2.4	Design of connections in tension members- Solve the problems	1
2.5	Use of lug angles	1
2.6	Design of tension splice- Concepts	1
2.7	Design of tension splice- Solve the problems	1
2.8	Concept of shear lag- Concepts	1
2.9	Concept of shear lag- Solve the problems	1
3.0	Compression Members	
3.1	Types of compression members	1
3.2	Basis of current codal provision for compression member design	1
3.3	Slenderness ratio – Design of single section and compound section compression members- Concepts	1
3.4	Design of single and compound section- Concepts	1
3.5	Design of single and compound section- Solve the problems	1
3.6	Design of laced and battened type columns- Concepts	1
3.7	Design of laced and battened type columns- Solve the problems	1
3.8	Design of column bases- Concepts	1
3.9	Design of column bases- Solve the problems	1
4.0	Beams	I
4.1	Design of laterally supported and unsupported beams- Concepts	1
4.1	Design of laterally supported and unsupported beams- Concepts Design of laterally supported and unsupported beams-Solve the problems	1
4.3	Built up beams- Concepts with problems	1
4.4	Beams subjected to uniaxial and biaxial bending- Concepts with problems	1
4.4	• • • •	1
4.5	Design of plate girders- Concepts with problems Design of plate girders- Solve the	1
4.6	Intermediate and bearing stiffeners- Concepts with problems	1
4.7		2
	Flange and web splices- Concepts with problems	2
5.0	Roof Trusses and Industrial Structures	4
5.1 5.2	Roof trusses	1
	Roof- Concepts	1
5.3	Side coverings- Concepts	2
5.4	Design of purlin and elements of truss- Concepts	1
5.5	Design of purlin and elements of truss- Solve the problems	1
5.6	Design end bearing- Concepts	1
5.7	Design end bearing- Solve the problems	1
5.8	Design of gantry girder- Concepts	1
5.9	Design of gantry girder- Solve the problems	1

60 CE 603	Highway, Railway and Airport	Category	L	Т	Р	Credit
00 CE 003	Engineering	PC	3	0	0	3

- To gain knowledge about planning, design, construction of highway
- To study the essentials materials used in Highway
- To understand the basic concepts of practices and maintenance of pavement.
- To acquire knowledge of location and planning and design of track of railway.
- To gain knowledge about planning, geometrics of the elements of airport.

Pre-requisites

Basic knowledge of surveying.

Course Outcomes

On the su	On the successful completion of the course, students will be able to							
CO1	Describe the engineering survey and highway geometric design	Remember						
CO2	Select the suitable highway materials and pavements.	Understand						
CO3	Explain the importance of highway construction and maintenance works	Understand						
CO4	Infer the importance of railways, signaling and the layouts of railway station and yards.	Apply						
CO5	Describe the airport planning and geometric design	Apply

S.No	Торіс	No.of Hours
1	Highway Planning and Geometric Design	
1.1	History of road development in India	1
1.2	Classification of highways	1
1.3	Engineering surveys for alignment	1
1.4	Highway geometrics and their standards	1
1.5	Super elevation and Transition curves	2
1.6	Sight distances and gradients	2
1.7	Horizontal curves and Vertical curves	1
2	Highway Materials and Design of Pavements	
2.1	Highway materials, their requirements and testing	1
2.2	Design principles and IRC recommendations	1
2.3	Pavement components and their role	1
2.4	Factors affecting the design of pavements	1
2.5	Design practice for flexible pavement CBR method	2
2.6	Design practice for flexible pavement IRC method	2
2.7	Rigid pavements	1
3	Highway Construction Practice and Maintenance	
3.1	Water bound macadam road, Bituminous road and Concrete road	2
3.2	Modern materials and methods of construction	1
3.3	Highway drainage and Its types	1
3.4	Pavement distress in flexible pavements	1
3.5	Pavement distress in rigid pavements	1
3.6	Pavement evaluation by deflection measurements	1
3.7	Strengthening of pavements and Highway maintenance	1
3.8	Over lay design by Benkelman Beam method (procedure only)	1
4	Railways Planning and Railway Track Operation	
4.1	Role of Indian Railways in National Development	1
4.2	Private railway coaches in India	1
4.3	Rails: Types, rail fastenings, Rail joints; Gauges, coning of wheels, creeps and kinks	2
4.4	Sleepers and Ballast: Function, Materials, Density	1
4.5	Working Principle of Signaling	1
4.6	Layouts of railway station and yards, Rolling stock, Tractive power	2
4.7	Track Resistance, Level Crossing and Underground Railways.	1
5	Airport Planning and Design	
5.1	Components of Airports , Planning, size and site selection	1
5.2	Design of Components and Run Way Design	2
5.3	Factors affecting runway length, basic runway length, and corrections to runway length	1
5.4	Taxiway Design, Controlling factors, taxiway geometric elements	1
5.5	Aprons - locations, size, gate positions, aircraft parking	2
5.6	Terminal Area Design and elements and requirements	1
5.7	Terminal building functions, space requirements, location planning concepts.	1

60 CE 604	Hydrology and Water Resources	Category	L	Т	Ρ	Credit
	Engineering	PC	3	0	0	3

- To develop basic understanding about different components of hydrologic cycle
- To learn the concepts of hydrograph and groundwater hydraulics
- To impart knowledge on various irrigationmethods and crop water requirements
- To create understanding about features of various types of dams and reservoirs
- To understand the techniques offlood and drought management

Prerequisite

Fundamentals of Mathematics and knowledge of fluid mechanics

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Demonstrate various components of hydrologic cycle.	Remember
CO2	Analyze the hydrograph and groundwater hydraulics.	Apply
CO3	Summarize the irrigation methods and crop water requirements.	Understand
CO4	Illustrate the types of reservoirs and dam elements.	Analyse
CO5	Outline the flood and drought management techniques	Understand

- To acquire knowledge on properties of fresh concrete
- To know the test on hardened concrete
- To impart knowledge on Non-destructive testing methods
- To understand the test on aggregates
- To learn the various test on Bitumen

Pre-requisites

Courses – Construction Materials & Practices, Concrete Technology, Materials Testing Laboratory & Highway, Railway and Airport Engineering

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Experiment the various test on fresh concrete	Apply
CO2	Perform various test for hardened concrete	Apply
CO3	Demonstrate the different non-destructive test available for concrete	Apply
CO4	Comprehend the properties of aggregates	Apply
CO5	Identify the test available for testing bitumen	Apply

- To learn software packages for performing analysis of structures
- To learn software packages for performing design of structures
- To analyse and design concrete structures using software packages
- To analyse and design steel structures using software packages
- To know the design concepts of different structural elements by using excel sheet.

Pre-requisites

- Structural Analysis Fundamentals
- Understanding of Load Analysis
- Reinforced Concrete Design
- Understanding of Building Codes and Standards

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Practice software packages for analysis and design	Apply
CO2	Learn to analyse a beam for various load combinations	Analyse
CO3	Analyse and design of 2D RCC and Steel structures	Analyse
CO4	Perform analysis and design of 3D RCC and steel structures	Analyse
CO5	Prepare excel sheet for design of structural elements	Apply

Assessment Pattern

The overall knowledge of the candidate in various courses he/she studied shall be evaluated with multiple choice questions.

*SDG:4- Quality Education

K.S.RANGASAMY COLLEGE OF TECHNOLOGY, TIRUCHENGODE - 637215

(An Autonomous Institution affiliated to Anna University)

B.E. / B.Tech. Degree Programme

SCHEME OF EXAMINATIONS

(For the candidates admitted from 2023-2024 onwards)

SEVENTH SEMESTER

S.	Course	Name of the Course	Duration of	Weig	htage of Mark	S	Minimur for Pass Seme Exa	s in End ester
No.	Code	Name of the Course	Internal Exam	Continuous Assessment*	End Semester Exam **	Max. Marks	End Semester Exam	Total
			THEO	RY				
1	60 HS 002	Engineering Economics and Financial Accounting	2	40	60	100	45	100
2	60 CE 701	Prestressed Concrete	2	40	60	100	45	100
3	60 CE 702	Construction Planning and Management	2	40	60	100	45	100
4	60 CE E*	Professional Elective III	2	40	60	100	45	100
5	60 CE E*	Professional Elective IV	2	40	60	100	45	100
6	60 AC 001	Research Skill Development	2	40	60	100	45	100
7	60 AB 00*	NCC\NSS\NSO\YRC\RRC \Yoga\Fine Arts	-	100	-	100	-	-
			PRACTI	CAL				
8	60 CE 7P1	Estimation and Quantity Surveying Laboratory	3	60	40	100	45	100
9	60 CE 7P2	Project Work - I	3	100	-	100	-	100
10	60 CG 0P6	Internship	3	100	-	100	-	100

* CA evaluation pattern will differ from course to course and for different tests. This will have to be declared in advance to students. The department will put a process in place to ensure that the actual test paper follow the declared pattern.

** End Semester Examination will be conducted for maximum marks of 100 and subsequently be reduced to 60marks for the award of terminal examination marks

CHA Board of Studies Faculty of Civil Engineering Rangasamy College of Technology TIRUCHENGODE - 637 215

60 HS 002	Engineering Economics and	Category	L	Т	Р	Credit
00 13 002	Financial Accounting	HS	3	0	0	3

- To know about the economic principles underlying demand, supply, and market structure
- To understand the concept related to types of business organization and types of banking
- To know about concepts in financial accounting and capital budgeting
- To understand the different methods of pricing and appraisal of projects
- To know the application of break-even analysis in engineering projects

Pre-requisites

• NIL

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Understand the basic concepts of economics, demand, supply, and market structure	Understand
CO2	Understand the forms of business organization and functions of commercial and central bank	Understand
CO3	Understand the basis of financial accounting and capital budgeting techniques	Understand
CO4	Apply different types of pricing strategies and comprehensive project feasibility in diverse business	Apply
CO5	Apply break even analysis in engineering projects and business	Apply

60 CE 701	Prestressed Concrete	Category	L	Т	Р	Credit
00 CE 701	Frestressed Concrete	PC	3	1	0	4

- To gain knowledge on types and methods of prestressing and advantages of prestressing concrete
- To know the design concepts for prestressed concrete elements using IS: 1343 codal provisions
- To study on design of continuous member and other special structural elements like prestressed sleepers, prestressed concrete pipes, prestressed poles
- To understand about flexural members and its design concepts
- To know about special elements in concrete structures and its design philosophies

Pre-requisites

• Concrete Technology

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Evaluate the internal forces and deflection in prestressed concrete.	Apply
CO2	Design the pre-stressing layout and understand the behavior of pre- stressed concreteelements under practical loading conditions	Understand
CO3	Practice the Analysis and design of continuous beams and extend the knowledge onconcept of linear transformation	Analyse
CO4	Outline the design of tension and compression members in prestressing	Remember
CO5	Illustrates the design of composite members and partial prestressing	Understand

Course (Contents and Lecture Schedule	
S. No.	Topics	No. of hours
1.0	Principles of Prestressing	
1.1	Introduction	1
1.2	Materials for prestressed concrete	1
1.3	Systems and methods of prestressing	1
1.4	Analysis of sections	1
1.5	Stress concept	1
1.6	Strength concept	1
1.7	Load balancing concept	1
1.8	Effect of loading on the tensile stresses in tendons	1
1.9	Introduction on Composite Prestressed member.	1
2.0	Losses and Deflection of Prestressed Concrete Members	
2.1	Analysis method losses	1
2.2	Elastic shortening	1
2.3	Friction – Anchorage slip	1
2.4	Force variation Diagram	1
2.5	Creep of concrete – Shrinkage of concrete	1
2.6	Relaxation of steel. Effect of tendon profile on deflections	1
2.7	Factors influencing deflections	1
2.8	Short term deflection uncracked members	1
2.9	Predictions of long-term deflections.	1
3.0	Design of Flexural Members	
3.1	Behavior of flexural members, determination of ultimate flexural strength	2
3.2	Codal provisions	1
3.3	Design of flexuralmembers. Design for shear based on IS 1343 code	2
3.4	Determination of anchorage zone stresses in post	2
3.5	Tensioned beams by Magnel's method and IS 1343 code method	1
3.6	Design of anchorage zone reinforcement	1
4.0	Design of Continuous Beams	
4.1	Analysis and design of continuous beams	2
4.2	Methods of achieving continuity	2
4.3	Concept of linear transformations	2
4.4	Concept of concordant cable profile.	2
4.5	Concept of cap cables	1
5.0	Design of Special Elements	
5.1	Circular Prestressing	2
5.2	Design of prestressed concrete tanks	2
5.3	Types and design of prestressed concrete pipes	2
5.4	Types and design of Poles	2
5.5	Types and design of sleepers	1

- To impart knowledge on construction planning
- To make the students understand about the scheduling procedures
- To know the cost control and monitoring in construction industry
- To understand the quality and safety in construction
- To gain knowledge on project information system.

Pre-requisites

• Nil

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Study about the Choice of Technology and Resource Requirements for Work Activities.	Remember
CO2	Recognize the construction planning schedules, crashing and time cost trade-offs.	Analyse
CO3	Examine the cost of the project, control the cost of the project by creating cash flows and budgeting.	Understand
CO4	Recall the quality control and safety in construction.	Remember
CO5	Acquire knowledge about project information system.	Understand

Course C	Contents and Lecture Schedule	
S. No.	Topics	No. of hours
1.0	Construction Planning	
1.1	Basic Concepts in the Development of Construction Plans	1
1.2	Choice of Technology and Construction Method	2
1.3	Work Tasks	1
1.4	Defining Precedence Relationships among Activities	2
1.5	Estimating Activity Durations	1
1.6	Estimating Resource Requirements for Work Activities	1
1.7	Coding Systems	1
2.0	Scheduling Procedures and Techniques	·
2.1	Introduction about scheduling procedures	1
2.2	Network analysis	1
2.3	Activity and Event oriented network	1
2.4	Critical Path Method and PERT	2
2.5	Scheduling Calculations	1
2.6	Use of Advanced Scheduling Techniques	1
2.7	Crashing and Time/Cost Trade-offs	1
2.8	Application of software in project management.	1
3.0	Cost Control and Monitoring and Accounting	
3.1	Introduction to cost control and Accounting	1
3.2	Project Budget	1
3.3	Forecasting for Activity Cost Control	1
3.4	Financial Accounting Systems and Cost Accounts	2
3.5	Control of Project Cash Flows	1
3.6	Schedule Control	1
3.7	Schedule and Budget Updates	1
3.8	Relating Cost and Schedule Information	1
4.0	Quality Control and Safety during Construction	
4.1	Introduction to quality and Importance of quality	1
4.2	Quality control, inspection and assurance	2
4.3	Planning and control of quality during design of structures	1
4.4	Quality and Safety Concerns in Construction	1
4.5	Concept of Safety in Construction Industry	1
4.6	Importance of Construction Safety	1
4.7	Safety Benefits to Employers, Employees and Customers	1
4.8	Approaches to improve Construction Safety.	1
5.0	Organization and use of Project Information	I
5.1	Types of Project Information	1
5.2	Accuracy and Use of Information	1
	5	1
5.3	Computerized Organization and Use of Information Organizing Information in Databases	2
5.4	Relational Model of Databases	
5.5		1
5.6	Other Conceptual Models of Databases	1
5.7	Centralized Database Management Systems	1
5.8	Databases and Applications Programs	1
5.9	Information Transfer	1

- To identify research problems, formulate hypotheses, collect data and test hypotheses
- To prepare and submit quality manuscripts and understand peer review process
- To utilize software tools for effective manuscript preparation and visualization of research data
- To familiarize different journal metrics and author-level quality indicators
- To protect creative works, inventions, and branding elements using IPR

Pre-requisites

• Nil

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Develop structured scientific approach to plan and execute research work	Apply
CO2	Comply with the journal requirements to publish research findings effectively	Understand
CO3	Apply various software tools during the manuscript preparation	Apply
CO4	Select suitable journals to publish the work using different publication metrics	Analyse
CO5	Apply the appropriate form of IP protection to a specific invention or creation	Apply

- To understand the basic units, concepts, techniques and applications of Estimation and Costing
- To gain knowledge on specifications and various item of work in building construction
- To analyse the rates for various items of work and to prepare an abstract estimate
- To study about how to prepare a detailed estimate for a residential building and calculate the quantities for various items of works involved in building, water supply and sanitary works
- To investigate the software application in preparing estimation and quantity surveying **Pre-requisites**
 - Fundamentals knowledge in Mathematics and basic properties of construction materials

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Assess building elements by length, area and volume in accordance with the principles of quantity surveying.	Understand
CO2	Select the appropriate method of building estimate.	Understand
CO3	Demonstrate the different types of specifications which specifies description and requirements.	Apply
CO4	Categories the schedule of rates for different works and detailed estimate.	Analyse
CO5	Prepare a technical report in such a manner that the report gives an idea about the entire work and the results arrived from software and manual calculation.	Apply

Introduction and Methods of Building Estimate*

General – Units of measurements – Estimation: Requirement of estimation, Types of estimate – Simple problems on building: Steps, Boundary walls using long wall, short wall and center line method – Lump sum items.

Specifications*

General specification – Detailed specifications for various items of works: Earth work excavation, Cement concrete, Damp proof course, Formwork, Brick masonry, Flooring, False ceiling, Plastering, Painting and wood work, Sanitary and water supply, Interior, Electrical item.

Rate Analysis**

Rate analysis: Purpose, Requirement – Schedule of rates and data book – Procedure of rate analysis – Requirement of labour and materials for different works – Obtaining rates for various items of work: Cement mortar, Cement concrete, Plastering, Flooring, Weathering course, Pointing and Painting.

Detailed Estimation**

Estimation of activities: Earth work, Plain cement concrete, Masonry work, Reinforced cement concrete, Bar bending, Scaffolding, Centering, Concreting, Stair case, Plastering, Wall, Ceiling, Flooring, Woodwork, Wall protective works, Paints, Electrical work, Water supply and Sanitary works – Principles of report preparation.

Software Application**

Introduction to software application in different type of estimates – Calculation of different quantities by Excel spread sheet – Calculation of different quantities by using estimation software – Application of estimator software.

List of Experiments:

- 1. Estimate the quantity of a single storey building.
- 2. Estimate the quantity of a double storey building.
- 3. Estimate of septic tank for 25 user.
- 4. Analysis the rate for 12 mm thick plaster with Cement Mortar 1:6. Assume plastering area was 100 sq.m.

Textbook(s):

1.	Birdie. G. S., "Estimating and Costing", Dhanpat Rai Books Publisher, New Delhi, 2014.
2.	Dutta, B.N., "Estimating and Costing in Civil Engineering", UBS Publishers & Distributors Pvt.Ltd, New Delhi, 2010.

- To develop the ability to identify and solve a specific problem in the field of Civil Engineering
- To search for a related field in which the members will conduct their project.
- To acquire collaborative skills through working in a team to achieve common goals.
- To develop the skills to communicate effectively and present ideas clearly and coherently to a specific audience, both in writing and verbally.
- To identify the appropriate project, acquire knowledge in that area, and complete preliminary work for phase II of the project.

Pre-requisites

• Nil

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Review the literature and data collection for available resources.	Apply
CO2	Select the title and collect relevant information related with selected title	Apply
CO3	Retrieve literature based on the survey and initiate partial system design.	Apply
CO4	Work as an individual or in a group in development of technical projects.	Analyse
CO5	Prepare and present the project report	Apply

	Repair and Rehabilitation of	Category	L	Т	Ρ	Credit
60 CE E11	Structures	PE	3	0	0	3

- To impart broad knowledge in the area of repair and rehabilitation of structures
- To gain knowledge on quality of concrete and durability aspects
- To understand the properties of repair materials
- To obtain the knowledge about corrosion of structures
- To know the causes of deterioration and assessment of distressed structures

Pre-requisites

• Nil

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Develop the Knowledge about assessment procedure for evaluating a damaged structure	Remember
CO2	Demonstrate the various types of distress in concrete structures	Understand
CO3	Identify the best Materials and Techniques for Repair.	Remember
CO4	Describe corrosion protection techniques and forensic engineering	Remember
CO5	Summarise the demolition techniques carried out for a structure.	Understand

Course C	Contents and Lecture Schedule	
S. No.	Topics	No. of hours
1.0	Maintenance and Repair Strategies	
1.1	Definition - Maintenance, Repair, Rehabilitation, Retrofitting.	1
1.2	Need, Merit and Demerits for Repair, Rehabilitation, Retrofitting.	1
1.3	Importance of maintenance for Repair, Rehabilitation, Retrofitting.	1
1.4	Facts of maintenance of Repair, Rehabilitation, Retrofitting.	2
1.5	Various aspects of inspection	2
1.6	Assessment procedure for evaluating a damaged structures,	1
1.7	Causes and deterioration of concrete.	1
2.0	Serviceability and Durability of Concrete	
2.1	Quality assurance for concrete construction	1
2.2	Need for quality assurance and Compressive Strength Test	1
2.3	Split tensile strength and Flexural strength test	1
2.4	Permeability and Thermal Properties	1
2.5	Cracks - Types, Causes and Effects due to cracking	2
2.6	Effect duo to climate, Temperature, Corrosion	1
2.7	Chemicals, Effects of cover thickness Design and construction Errors.	2
3.0	Repair and Rebahilitaion of Structures	
3.1	Criteria for material selection	1
3.2	Methodology of selection and Special concretes	1
3.3	Polymer concrete and Sulphur infiltrated concrete	1
3.4	Fiber reinforced concrete and High strength concrete,	1
3.5	High performance concrete and Vacuum concrete	1
3.6	Self-compacting concrete and Special cement	1
3.7	Expansive cement and Ferro cement	1
3.8	Destructive and Non-destructive testing techniques.	2
4.0	Forensic Engineering	
4.1	Crack repair techniques	1
4.2	Stitching, Routing and sealing, Resin injection	1
4.3	Dry packing, Polymer impregnation, Vacuum impregnation	1
4.4	Autogenous healing, Flexible sealing, Drilling and plugging	2
4.5	Bandaging. Repair distressed due to corrosion, wear, fire, leakage	1
4.6	Methods of corrosion protection - Corrosion inhibitors, Corrosion resistant steels	1
4.7	Reinforcement coating Cathodic protection and Rust eliminators. Forensic engineering –	1
4.8	Introduction, Failure of structures, Review of construction theory	1
5.0	Demolition Techniques	
5.1	Plates, Conversation to composite construction, Post stressing	1
5.2	Jacketing, Bonded overlays,	1
5.3	Reinforcement addition and Strengthening of substructures	1
5.4	Shoring and Underpinning	2
5.5	Engineered demolition techniques	1
5.6	Demolition process, selection of techniques – Case studies	1
5.7	Strengthening of superstructure	2

	Engineering	PE	3	0	0	3

- To apply the energy conservation technique in various applications.
- To Gain knowledge in the working of solar photo voltaic system.
- To understand the need of wind energy conversion techniques.
- To analyze the performance of Bio-mass and Bio-gas plants.
- To describe the working of fuel cells and Hydrogen energy.

Pre-requisites

Nil

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Gain knowledge on the challenges and problems associated with the use of various energy sources and energy conservation techniques.	Remember
CO2	Analyse the performance of various solar collectors and working of solar photo voltaic system.	Remember
CO3	Classify the performance of wind energy systems and performance of Bio- mass and Bio-gas plants.	Understand
CO4	Recognize the functioning of Geothermal, ocean and small hydro plants	Apply
CO5	Determine the System sizing and battery charging Techniques and working of fuel cells.	Understand

S.No.	Topics	No. of hours
1.0	Statistics on Energy Sources	I
1.1	Role and potential of non-renewable and renewable source- Importance of renewable energy sources	1
1.2	Advantages and disadvantages of non-conventional energy sources-Salient features of non-conventional energy sources, Hidal Energy, Nuclear Energy and Thermal Energy	1
1.3	Availability of resources and future trends	1
1.4	Energy scenario in India	1
1.5	Growth of energy sector and its planning in India .Global environmental crisis	1
1.6	Impact of renewable energy generation on environment, Kyoto protocol, Carbon Credit, CDM	1
2.0	Solar Energy	
2.1	Introduction-Solar radiation at the earth's surface-Solar Radiation measurements- Estimation of average solar Radiation	1
2.2	Solar energy collectors – Classifications – Flat plate collectors - Concentrating collectors - Comparison	1
2.3	Solar greenhouse - Solar thermal Electric power plant.	1
2.4	Principles of photovoltaic conversion-PV system components-types of solar cells	1
2.5	PV cell-module and array-array design-equivalent circuit-V and P-V characteristics	1
2.6	Solar Photo Voltaic applications- Solar energy policies and regulations of India.	1
3.0	Wind Energy	
3.1	Introduction- Basic principle sofwind energy conversion :Nature of the wind, power in the wind forces on the blades	1
3.2	wind data and energy estimation - site selection	1
3.3	classification of wind energy conversion systems - Advantages and Disadvantages	1
3.4	Types of wind machines - Horizontal axis machine -	1
3.5	Vertical axis machine - Generating system - Energy Storage	1
3.6	Application of wind energy - Safety and environmental aspects.	1
4.0	Other Renewable Energy Sources	
4.1	Bio energy - Introduction Biomass conversion technologies	1
4.2	types of bio gas plants – applications – Biomass energy programme in India.	1
4.3	Tidal energy – Basic principle of tidal power – components and operations of tidal power plant	1
4.4	Geothermal energy-Geothermal Sources–Prospects of geothermal energy in India Ocean energy resources	1
4.5	principles of ocean thermal energy conversion (OTEC)-	1
4.6	Methods of Ocean thermal electric power generation	1
5.0	Waste to Energy and Grid Connected Systems	
5.1	Energy produced from sewage, Industrial effluents	1
5.2	Municipal Solid Waste, Industrial sludge, Energy Audit and rating	1
5.3	Case studies. Basics of stand-alone and grid-connected systems	1
5.4	hybrid systems-synchronization with grid	1
5.5	Battery-types-Battery charging and charge regulator-Fuel cells	1
5.6	Hydrogen energy-Small hydro resources-basic operation and schematic only.	1

- To provide students with a comprehensive understanding of smart city concepts
- To familiarize students with the integration of smart technologies in urban infrastructure systems
- To enable students to comprehend the role of Information and Communication Technologies (ICT) in optimizing transportation system
- To educate students on sustainable water and energy management practices in smart cities
- To emphasize the importance of resilience and sustainability in urban infrastructure design and planning, equipping students with the knowledge

Pre-requisites

• Urban Planning, Transportation Engineering, Geotechnical Engineering

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Comprehensive Understanding of Smart City Concepts.	Apply
CO2	Proficiency in Integrating Smart Technologies in Urban Infrastructure.	Apply
CO3	Competence in Applying Information and Communication Technologies (ICT) in Transportation Systems.	Apply
CO4	Ability to Implement Sustainable Water and Energy Management Practices.	Apply
CO5	Aptitude for Designing Resilient and Sustainable Urban Infrastructure.	Apply

S. No.	Topics	No. of hours						
1.0	Water Quality							
1.1	Physical properties of water	1						
1.2	Chemical properties of water	1						
1.3	Major Ions in Water	1						
1.4	Investigation of Water Quality	2						
1.5	Sampling collections and Data collections for water quality	1						
1.6	Water quality data storage, analysis and inference	2						
1.7	Software for analysis	1						
2.0	Water Quality Control							
2.1	Standards of Water Quality	1						
2.2	Effluent standards	2						
2.3	Treatment methods for water and wastewater	2						
2.4	Storm water quality control	2						
2.5	Concepts of BMPs and LID	1						
2.6	Computer Models	1						
3.0	Water Pollution							
3.1	Sources and Types of pollution	1						
3.2	Organic and inorganic pollutants	1						
3.3	Relation between BOD and DO	2						
3.4	Impacts of water resources	1						
3.5	NPS Pollution and control	2						
3.6	Water treatment technologies	1						
3.7	Eutrophication control	1						
4.0	Modeling							
4.1	Types of models and Model development	1						
4.2	Calibration and verification of models	1						
4.3	Surface water quality modeling	2						
4.4	Ground water quality modeling	2						
4.5	Unsaturated zone modeling	1						
4.6	Application of optimization techniques to water quality management	2						
5.0	Water Quality Management							
5.1	Principles of water quality	1						
5.2	Water quality classification	2						
5.3	Water quality standards	2						
5.4	Water quality indices	2						
5.5	Water quality models	2

	Planning	PE	3	0	0	3

- To provide a basic knowledge on architecture and town planning.
- To provide basic knowledge on zoning regulation and building regulation
- To understand the basic components of buildings and plan
- To apply the software tools for planning
- To execute the design for extreme condition

Pre-requisites

• Nil

Course Outcomes

On the su	On the successful completion of the course, students will be able to									
CO1	Understand the elements and principles of architecture.	Understand								
CO2	Classify the residential, industrial and public building.	Understand								
CO3	Prepare a plan of residential buildings.	Analyse								
CO4	Apply GIS and remote sensing techniques in urban and regional planning	Apply								
CO5	Acquire knowledge about design of building for abnormal loads.	Understand

60 CE E21	Dynamics and Earthquake	Category	L	Т	Р	Credit
60 CE E21	Engineering	PE	3	0	0	3

- To learn the basics of various dynamic forces and its effects on the structure
- To enhance the ability to identify the mode shapes of the structure under dynamic loading
- To understand the concepts of engineering seismology
- To understand the fundamentals on response of structural buildings
- To enhance the ability to design an earthquake resistant structure by using IS codal provisions

Pre-requisites

Advanced Reinforced Concrete Design

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Understand the theory of vibrations and determine response of structures	Understand
CO2	Illustrate the concepts of two degrees of freedom system and multi degree of freedom system	Apply
CO3	Recognize the concepts of engineering seismology	Apply
CO4	Evaluate the response spectra and design spectra of an earthquake	Analyse
CO5	Describe design guidelines for earthquake resistant masonry buildings.	Understand

60 CE E22	Air Pollution Management	Category	L	Т	Р	Credit
00 CE E22	All Foliution Management	PE	3	0	0	3

- To know the nature and characteristics of air pollutants, noise pollution and basic concepts of air quality management
- To understand the pollutant dispersion concepts and computer models
- To design stacks and particulate air pollution control devices to meet applicable standards
- To manage the air pollution through preventive measures and impact assessment
- To identify, formulate and solve air and noise pollution problems

Pre-requisites

• Environmental Studies and Climate Change

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Define the sources of air pollution and sampling methods	Remember
CO2	Describe the dispersion of air pollutants	Understand
CO3	Express the particulate and gaseous pollutant control techniques	Understand
CO4	Summarize the air quality management principles	Understand
CO5	Evaluate the indoor air quality and noise pollution effects	Apply

- To learn the fundamental concepts of Construction of Bridges.
- To know composite bridge structures.
- To evaluate the substructure under various soil conditions.
- Understand the process of bridge management, including inspection.
- Understand and be able to calculate demands on a bridge

Pre-requisites

• Advanced reinforced concrete design

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Understand various types of bridges.	Understand
CO2	Improve the software techniques for various load conditions.	Apply
CO3	Compute the analysis and design of bridges.	Analyse
CO4	Describe the various methods of foundation for bridges.	Understand
CO5	Evaluate the long span bridge design and construction.	Analyse

S. No.	Topics	No. of hours
1.0	Introduction	
1.1	Types of bridges & Materials of construction	1
1.2	Codes of practice (Railway and Highway Bridges)	1
1.3	Aesthetics & Loading standards (IRC, RDSO, AASHTO)	1
1.4	Recent developments box girder bridges	1
1.5	Historical bridges (in India and overseas). Planning and layout of bridges: Hydraulic design	1
1.6	Geological and geotechnical considerations	1
1.7	Design aids	1
1.8	Computer softwares	1
1.9	Expert systems	1
2.0	Concrete bridges	
2.1	Bridge deck and approach slabs	2
2.2	Slab design methods	1
2.3	Design of bridge deck systems	1
2.4	Slab-beam systems (Guyon- Massonet and Hendry Jaeger methods)	2
2.5	Box girder systems	1
2.6	Analysis and design	1
2.7	Detailing of box girder systems	1
3.0	Steel and composite bridges:	
3.1	Introduction to composite bridges	1
3.2	Advantages and disadvantages (composite bridges)	1
3.3	Orthotropic decks	1
3.4	Box girders	1
3.5	Composite steel	1
3.6	concrete bridges	1
3.7	Analysis and design	1
3.8	Truss bridges	1
3.9	Construction methods of Slab culverts, Simply supported bridges and cantilever bridges.	1
4.0	Applications of Science and Technology for Disaster Management	L
4.1	Piers, Columns and towers	1
4.2	Analysis and design - Shallow and deep foundations	2
4.3	Caissons ,Abutments and retaining walls	1
4.4	Bridge appurtenances, Expansion joints - Design of joints	1
4.5	Types and functions of bearings - Design of elastomeric bearings	1
4.6	Railings	1
4.7	Drainage system	1
4.8	Lighting	1
5.0	Long span bridges	
5.1	Design principles of continuous box girders	1
5.2	Curved and skew bridges	1
5.3	Cable stayed and suspension bridges	1
5.4	Seismic resistant design	1
5.5	Seismic isolation and damping devices. Construction techniques: Cast in-situ, Prefabricated ,Incremental launching	1
5.6	Free cantilever construction & Inspection	1
5.7	Maintenance and rehabilitation	1
5.8	Current design and construction practices.	2

- T To understand the principles and history of transportation planning
- To analyze transportation policies, regulations, and stakeholder roles
- To apply data analysis techniques for traffic and travel demand modeling
- To evaluate the design of transportation infrastructure and its sustainability
- To assess urban and regional transportation challenges and their impact

Pre-requisites

• Highway, Railway and Airport Engineering

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Comprehend transportation planning's fundamentals: history, policies, stakeholders, sustainability	Understand							
CO2	Develop skills to analyze data for traffic and travel demand modeling	Apply							
CO3	Assess transport modes, challenges, and vital intermodal and sustainable choices	Understand							
CO4	Apply urban planning, including design, management, and integration	Apply							
CO5	Analyze networks, policies, economics, and regional sustainability	Apply

- To acquire knowledge on various facilities like lifts and escalators and machinery involved in buildings
- To study the principles of electrical and air conditioning installations
- To gain exposure in Modern theory of lighting
- To improve skills about basic refrigeration principles and applications
- To provide exposure on the principles of fire safety regulations and National Building Code

Pre-requisites

• NIL

Course Outcomes

On the su	ccessful completion of the course, students will be able to	
CO1	Discuss the application of hot water boilers, vibrators, motors and concrete mixtures.	Remember
CO2	Classify the wiring and earthling system.	Understand
CO3	Describe the modern theory of light and colour in various types of buildings.	Remember
CO4	Summarize the refrigeration principles and air conditioning systems in buildings.	Apply
CO5	Infer the causes of fire, fire safety regulation and installation.	Understand

60 CE E26	Engineering	PE	3	0	0	3

- To develop an understanding of systems analysis and apply to problems in Water Resources Engineering
- To learn how to apply various methods of water resources economics to problems in Water Resources Engineering
- To know about surface and sub-surface water quality management
- To learn the legal aspects of water and environment systems
- To introduce the student to the concept of Mathematical approaches for managing the water resources syste

Pre-requisites

• Nil

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Apply concepts of systems analysis for planning of water resources systems and minor levels	Apply
CO2	Perform basic economic analysis between alternate water resources perform basic.	Understand
CO3	Apply knowledge for practical implementation of water resources system related solutions in field	Apply
CO4	Evaluate the economic feasibility of water resources engineering projects	Analyse
CO5	Develop analytical skills to formulate and solve stochastic problems for decision making under uncertainty	Understand

Course C	Contents and Lecture Schedule	
S. No.	Topics	No. of hours
1.0	Introduction	1
1.1	Basics of Planning	
1.2	Definition of Planning	1
1.3	Significance and importance of Planning	1
1.4	Need for water resources system.	1
1.5	Issues in Planning	1
1.6	Process of Planning	1
2.0	Planning for Water Resouces Development	
2.1	Statement of objectives	1
2.2	Data requirements	1
2.3	Project formulation	1
2.4	Environmental considerations in planning	1
2.5	Pitfalls in project planning	1
2.6	Conservation and augmentation of water resources	1
2.7	Multipurpose projects	1
2.8	Functional requirements in multi-purpose project	1
2.9	Compatibility of multipurpose uses	1
3.0	Water Resources Systems	
3.1	Concepts of systems engineering in water resources	1
3.2	Objectives and Function of Water Resources Systems	1
3.3	Production function of Water Resources systems	2
3.4	Linear, non-linear and dynamic programming	2
3.5	Sensitivity analysis and Stochastic models	2
3.6	Application of water resources systems engineering to practical problems	1
4.0	Economic Analysis of Water Resources System	
4.1	Principles of Engineering Economy	1
4.2	Capital, Interest and Interest Rates	1
4.3	Time Value of Money	1
4.4	Depreciation and its importance's	2
4.5	Benefits of Cost Evaluation	2
4.6	Discounting Techniques	1
4.7	Economic and Financial Evaluation	1
4.8	Socio-Economic Analysis	
5.0	Advanced Optimization Techniques	
5.1	Integer and parametric linear programming	1
5.2	Goal programming models with applications	1
5.3	Discrete differential Programming	2
5.4	Incremental dynamic programming	1
5.5	Linear decision rule models with application	2
5.6	Stochastic dynamic programming models	1

1. Dr. J .Abdul Bari - abdulbari@ksrct.ac.in

P. hypur -CHAIRMAN Board of Studies Faculty of Civil Engineering K.S.Rangasamy College of Technology TIRUCHENGODE - 637 215

60 CE E27	Climatic Changes and	Category	L	Т	Р	Credit
	Adaptation Measures	OE	3	0	0	3

- To make them aware of the fundamental factors caused for global warming
- To provides clear picture of the atmosphere and its heat transfer through various atmospheric activities.
- To impart knowledge on climatic change impacts in various sectors and its influences scaling the life standard of the influenced human society.
- To understand the role of international bodies like WMO, UNFCCC and IPCC in and adaptation measures for the sustainable earth.
- To strongly emphasis the necessary of innovative technologies to adopt at various levels of each stage in economic growth

Pre-requisites

• Environmental science and engineering

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Summarize the key concepts, definitions on key perspectives of all causes for global warming.	Remember
CO2	Evaluate the mechanisms of Atmosphere and its components connected with global warming	Understand
CO3	Analyze the impact of global warming in climatic change in various fields.	Apply
CO4	Explain various international conferences on carbon emission rate on different regions of world	Remember
CO5	Identify various mitigation and Adaptive measurement planes for climatic change	Understand

Course C	Contents and Lecture Schedule	
S. No.	Topics	No. of hours
1.0	Earth's Climate System	nours
1.1	Introduction to earth climate system	1
1.2	Role of ozone in environment	1
1.3	ozone layer	1
1.4	ozone depleting gases	1
1.5	Green house Effect	1
1.6	Radioactive effects of greenhouse Gases	1
1.7	The hydrological cycle	1
1.8	Green house gases and global warming	1
1.9	Carbon cycle.	
2.0	Atmosphere and its Components	
2.1	Introduction about atmosphere and its components	1
2.2	Importance of Atmosphere	1
2.3	Physical Chemical Characteristics of Atmosphere	1
2.4	Vertical structure of the atmosphere	1
2.5	Composition of the atmosphere	1
2.6	Atmospheric stability	1
2.7	Temperature profile of the atmosphere	1
2.8	Lapse rates	1
2.9	Temperature inversion and effects of inversion on pollution dispersion.	1
3.0	Impacts of Climate Change	
3.1	Causes of climate change	1
3.2	Change of temperature in the environment	1
3.3	Melting of ice ole	1
3.4	Sea level rise and Impacts of climate change on various sectors	1
3.5	Agriculture, forestry and ecosystem	1
3.6	Water resources	1
3.7	Human health, Industry, Settlement and Society	1
3.8	Methods and scenarios and projected Impacts for different regions	1
3.9	Uncertainties in the projected Impacts and risk of irreversible changes.	1
4.0	Observed Changes and its Causes	
4.1	Climate change and Carbon credits	1
4.2	CDM- Initiatives in India	1
4.3	Kyoto protocol	1
4.4	Intergovernmental panel on climate change	1
4.5	Climate sensitivity and feedbacks	1
4.6	The montreal protocol	1
4.7	UNFCCC – IPCC	1
4.8	Evidences of changes in climate and environment	1
4.9	Global scale and in India	1
5.0	Climate Change Mitigation and Adaptation Measures	
5.1	Difference between climate change mitigation and adaptation and carbon trading	1
5.2	Biodiesel, natural compost and Eco- friendly plastic	1
5.3	Alternate energy – hydrogen ,bio-fuels, solar energy and wind energy	3
5.4	Mitigation efforts in India	1
5.5	Adaptation measures	1
5.6	Building flood defences and raising the levels of dykes	1
5.7	Choosing tree species and forestry practices etc.	1

1. Dr. S. Ramesh - rameshs@ksrct.ac.in

P. hypur -CHAIRMAN Board of Studies Faculty of Civil Engineering K.S.Rangasamy College of Technology TIRUCHENGODE - 637 215

60 CE E31	Smart Materials and Smart	Category	L	Т	Р	Credit
	Structures	PE	2	0	2	3

- To give an insight into the latest developments regarding smart materials and their use in structures
- To provide exposure with a structure which can self-adjust their stiffness with load
- To gain knowledge and understanding of various aspects of measuring techniques
- To Recognize the functioning of sensors, actuators
- To apply the concept signal processing and control systems

Pre-requisites

• Nil

Course Outcomes

On the successful completion of the course, students will be able to Discriminate the functions and response of instrumented structures and CO1 Remember the role of effectors and actuators in smart structures. Apply the concept of Whetstone Bridge in strain measurement and CO2 Remember describe the strain measuring techniques using electrical strain gauges Differentiate the Piezoelectric and Electro strictive Material in smart CO3 Understand structures. CO4 Outline the applications of sensors and actuators in smart structures. Apply Apply the concepts of data acquisition and signal processing in CO5 Understand smart structure to minimize the realistic engineering constraint

- To understand the solid and hazardous waste sources, characteristics
- To impart knowledge on waste characterization and sampling
- To develop basic understanding about collection and transfer of solid wastes
- To learn the processing techniques of solid wastes
- To know the disposal methods of solid wastes

Pre-requisites

• Environmental Engineering

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Identify the sources, characteristics, impacts of solid wastes.	Remember
CO2	Evaluate the composition and source reduction methods.	Understand
CO3	Summarize the methods of collection and transport of solid wastes.	Analyse
CO4	Outline the waste processing techniques & equipments.	Remember
CO5	Explain the disposal methods of solid wastes.	Remember

60 CE E33	Ground Improvement	Category	L	Т	Р	Credit
00 CE E33	Techniques	PE	2	0	2	3

- To learn the basics of various factors influencing compaction
- To know Treatment of various soil conditions.
- To evaluate the behavior of stabilization of soil
- To understand the concepts of basic mechanism of reinforced earth.
- To enhance the ability to design and Stabilization of expansive clays

Pre-requisites

- Foundation Engineering
- Soil Mechanics

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Understand various types of ground improvement.	Remember
CO2	Solve the dewatering techniques.	Understand
CO3	Compute the Dynamic compaction Virilization.	Remember
CO4	Describe the various methods of grouting for treated.	Apply
CO5	Analyse the Soil improvement by adding materials.	Analyse

Course Contents and Lecture Schedule
Course Contents and Lecture Schedule

S. No.	Topics	No. of Hours
1.0	Dewatering	
1.1	Introduction – about dewatering	1
1.2	Basic definitions, Scope and necessity of ground improvement in	1
1.2	Geotechnical engineering basic concepts	1
1.3	Drainage for dewatering, Ground Water lowering by well points and deep wells	1
1.4	Ground Water lowering by vacuum and electro osmotic methods	1
1.5	Viscous damping	1
1.6	Stabilization by thermal and freezing techniques and applications	1
2.0	Compaction and Sand Drains	
2.1	In-situ compaction of granular and cohesive soils	1
2.2	Shallow, Deep compaction methods and Sand piles	1
2.3	Concept, design, factors influencing compaction	1
2.4	Blasting and dynamic consolidation	1
2.5	Preloading with sand drains, fabric drains, wick drains etc	1
2.6	Theories of sand drain, Design and relative merits of various methods	1
3.0	Stone Column, Lime Piles and Soil Nailing.	
3.1	Introduction to Stone column and lime piles	1
3.2	Functions and Methods of installation	1
3.3	Design, estimation of load carrying capacity and settlement.	1
3.4	Root piles and soil nailing	1
3.5	methods of installation, Design and Applications	1
3.6	Soil liquefaction mitigation methods, case studies	1
4.0	Earth Reinforcement	
4.1	Earth reinforcement	1
4.2	Principles and basic mechanism of reinforced earth	1
4.3	Simple design	1
4.4	Synthetic and natural fibre-based Geotextiles and their applications	1
4.5	Filtration, drainage, separation.	1
4.6	Erosion control and case studies.	1
5.0	Grouting	
5.1	Grouting and Types of grout	1
5.2	Suspension and solution grouts	1
5.3	Basic requirements of grout. Grouting equipment	1
5.4	Methods of injection and Use of jet grouting and grout monitoring	1
5.5	Electro – Chemical stabilization and Stabilization with cement	1
5.6	Lime - Stabilization of expansive clays and case studies.	1
Practical		
1.	Identify the Parts of Grouting and Guniting	4
2.	Check the Condition of Groundwater and drainage	2
3.	Identify and check the circuit connection of Starting, Charging System and Lighting System of an Grouting plant	2
4.	Do the Blasting and dynamic consolidation of selected area	2
5.	Identify the estimation of load carrying capacity and settlement	4
6.	Identify the mechanics of sand drains and installation	2
7.	Identify the Parts of soil nailing tools with modelling	4
8.	Check the natural fibre-based Geotextiles, tensile strength	4
9.	Identify the Parts of Chemical stabilization and strength of equipment	2
10.	Identify the Soil liquefaction and mitigation	4

	Development	PE	2	0	2	3

- To acquire basic knowledge on issues related to urban planning
- To gain knowledge about various process of urban planning and development
- To learn the formulation of urban plans and approval process
- To select the various urban planning projects and execute in the field
- To analyze the rules and legislation related to urban planning

Pre-requisites

• Fundamentals of planning and basic rules about planning

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Urban design terminologies, basic issues & definition	Remember
CO2	Relevance of Urban design in Planning & Architecture.	Remember
CO3	Urban design Theory and Principles.	Remember
CO4	Designing of appropriate rural development policies and programs and need for integrated approach to planning.	Analyse
CO5	History of urban planning and rules, legislation, policy making in modern cities and to assess the project.	Remember

- To understand project quality management principles and factors in construction for efficient project delivery.
- To learn quality systems standards and implementation processes for effective project quality assurance.
- To master quality control methodologies specific to construction projects for compliance and excellence.
- To explore quality assurance and control techniques to minimize risks and optimize project outcomes.
- To acquire knowledge of quality improvement techniques to drive innovation and efficiency in construction practices.

Pre-requisites

Construction Materials & Management

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Demonstrate the project quality management principles for successful project delivery.	Understand
CO2	Implement quality systems standards and procedures for certification in construction projects.	Apply
CO3	Execute quality control measures to ensure compliance with standards and client satisfaction.	Apply
CO4	Improve quality assurance processes using analysis techniques to enhance project outcomes.	Analyse
CO5	Utilize improvement techniques for optimized construction activities and environmental considerations.	Apply

- To introduce the student to the Characteristics of different aquifers.
- To make the students understand about groundwater well hydraulics.
- To understand the techniques of development and management of groundwater.
- To know the quality of groundwater and regulatory requirements.
- To impart knowledge on groundwater conservation measures.

Pre-requisites

Nil

Course Outcomes

On the successful completion of the course, students will be able to

CO1	State the aquifer properties and its dynamics.	Remember
CO2	Solve well design and practical problems.	Understand
CO3	Demonstrate a model for groundwater management.	Apply
CO4	Describe the importance of groundwater quality concepts and legislations.	Apply
CO5	Execute the conservation measures of groundwater.	Understand

60 CE E41	Prefabricated Structures	Category	L	Т	Ρ	Credit
00 CE E41	Freiablicated Structures	PE	3	0	0	3

- To understand the principles and advantages of prefabrication in construction
- To analyze the behavior of prefabricated structural components
- To apply design principles for disuniting structures and cross section efficiency
- To develop skills in designing joints for different structural connections
- To gain knowledge on design of prefabricated structures subjected to abnormal loads

Pre-requisites

• Strength of Materials and Structural Analysis & Design

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Integrate prefabrication principles for efficient construction, ensuring optimal material use and standardized systems.	Understand
CO2	Analyze and integrate prefabricated components effectively into structural designs for optimal performance.	Analyse
CO3	Implement design strategies to address structural disunity, optimize cross-sections, and accommodate joint flexibility.	Apply
CO4	Design various structural joints accurately, considering dimensions and expansion requirements for resilience.	Apply
CO5	Evaluate structures for abnormal loads, incorporating code provisions to prevent progressive collapse and ensure safety.	Analyse

60 CE E45	Broject Management	Category	L	Т	Р	Credit
60 CE E45	Project Management	PC	3	0	0	3

- To understand the fundamental principles and importance of project management, including key processes and stakeholder roles.
- To develop project plans, including WBS, and create detailed project schedules with accurate time, cost, and resource estimates.
- To identify, assess, and manage project risks, including the development of risk response strategies and maintaining a risk register.
- To manage project execution by leading teams, ensuring effective communication, monitoring performance, and controlling changes.
- To conduct project closure activities, evaluate success against criteria, and implement lessons learned for continuous improvement.

Pre-requisites

Construction Management

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Articulate the fundamental concepts, importance, and methodologies of project management.	Remember
CO2	Develop comprehensive project plans, including Work Breakdown Structures (WBS), time, cost, and resource estimates, and create effective project schedules.	Understand
CO3	Identify, assess, and develop strategies to manage project risks.	Apply
CO4	Effectively manage project execution by developing and leading project teams, monitoring performance, and controlling changes.	Analyse
CO5	Conduct thorough project closure activities, evaluate project success against defined criteria, and implement lessons learned for continuous improvement in project management practices.	Understand

60 CE E46	Integrated Water Resources	Category	L	т	Р	Credit
	Management	PC	3	0	0	3

- To make the students understand about integrated water resources management process.
- To introduce the student to the public private partnerships.
- To understand the health impacts related to water management.
- To know the agricultural activities in the context of water management.
- To impart knowledge on regulatory framework regarding water management.

Pre-requisites

• Hydrology and Water Resources Engineering

Course Outcomes

On the successful completion of the course, students will be able to

CO1	State the needs, complexity and key elements of IWRM process.	Remember
CO2	Explain the water economics and PPP options.	Understand
CO3	Describe the link between water and human health.	Understand
CO4	Interpret the water management for irrigation and food production.	Apply
CO5	Demonstrate the international and national regulatory settings on water.	Apply

60 CE E48	Disastar Managament	Category	L	Т	Р	Credit
60 CE E48	Disaster Management	PE	3	0	0	3

- To learn about various types of natural and man-made disasters.
- To impart the knowledge of pre- and post-disaster management for some of the disasters.
- To demonstrate various information and organizations in disaster management in India.
- To get exposed to technological tools and their role in disaster management.
- To understand the basics of Hazard and Vulnerability of structures

Pre-requisites

• Repair and Rehabilitation of Structures

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Outline the basic information and precautions regarding various disasters.	Remember
CO2	Decide first action to be taken under various disasters.	Analyse
CO3	Identify the organizations in India which are dealing with disasters.	Understand
CO4	Select IT tools to help in disaster management.	Apply
CO5	Increase the understanding of financial management of disaster risks.	Remember

OU CE EST	Tail Structures	PE	3	0	0	3

- To understand the context and development of Tall buildings
- To analyze and design vertical structural systems
- To evaluate the behavior of High-Rise Structures
- To perform approximate analysis and design
- To explore advanced structural systems and innovations

Pre-requisites

• Strength of Materials and Structural Analysis & Design

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Apply fundamental principles and advanced concepts in the design and analysis of high-rise building structures	Apply
CO2	Evaluate various vertical structural systems	Analyse
CO3	Demonstrate proficiency in the approximate analysis and design of bearing wall buildings, rigid frame structures, and other high-rise structural systems	Apply
CO4	Conduct approximate analysis and design of various structural systems	Analyse
CO5	Synthesize knowledge to explore and develop innovative structural solutions	Analyse

- To acquire knowledge on the concepts of various physico-chemical and biological treatment units with operation and maintenance aspects.
- To study the methods of transporting water and wastewater along with distribution • schemes.
- Identify suitable locations for wind energy development based on thorough resource . assessment.
- Expand access to solar energy by overcoming barriers to entry,
- Develop strategies for integrating high levels of solar energy into the electrical grid effectively, including grid modernization

Pre-requisites

Nil

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Point out the physico-chemical treatment systems and their kinetics and Outline the biological treatment systems with their kinetics	Remember
CO2	Describe the principles of municipal and industrial physico-chemical treatment units, membrane processes and advanced techniques.	Remember
CO3	Express the principles of aerobic and anaerobic biological treatment of wastewater	Understand
CO4	Point out the transmission operations of water and design the distribution system with loss minimization and leak detection techniques.	Apply
CO5	Illustrate the operations and planning of treatment plants	Understand

- Student gains knowledge on various IRC guidelines for designing rigid and flexible pavements
- To gain knowledge to assess quality and serviceability conditions of roads
- To gain the knowledge of maintenance of pavements
- To develop on pavement design
- To gain knowledge on stabilization of rural roads

Pre-requisites

• Transportation Engineering

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Get knowledge about types of rigid and flexible pavements	Remember
CO2	Able to design of rigid pavements	Analyse
CO3	Able to design of flexible pavements	Analyse
CO4	Determine the causes of distress in rigid and flexible pavements	Remember
CO5	Understand stabilization of pavements, testing and field control	Understand

- To provide the technical, economical and sociological understanding of a watershed.
- To provide a comprehensive discourse on the engineering practices of watershed management for realizing the higher benefits of watershed management.
- To solve erosion, water and wind erosion problems
- To examine Soil Conservation Measures: Agronomical and Mechanical
- To Design of Small Water Harvesting Structures and to Evaluate of Watershed Management

Pre-requisites

• Hydrology And Water Resources Engineering

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Apply the knowledge of overall concepts of watershed	Remember
CO2	Analyse for technical measures for soil erosion	Analyse
CO3	Describe the water harvesting techniques	Understand
CO4	Assess watershed management for realizing the higher benefits of watershed management.	Remember
CO5	Explore potential applications of Remote sensing and GIS in watershed management	Understand

- To provide knowledge on various sources of wastes.
- To gain knowledge on various waste characterization techniques and its analysis methods.
- To know about various management concepts of wastes from various sources.
- To analyze different waste processing technologies.
- To learn about various disposal methods with its remediation techniques.

Pre-requisites

• Basic knowledge about types of waste and its basic properties.

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Study the methods of waste management system and to analyze their draw backs comparing with statutory rules.	Understand
CO2	Understand the composition and characterization of various wastes.	Understand
CO3	Evaluate different elements of waste management concepts.	Apply
CO4	Analyze different processing technologies and to study the various methods of waste to energy conversion.	Analyse
CO5	Summarize the various disposal methods with its remediation techniques.	Apply

1.2	Elements of integrated waste management and roles of stakeholders	1
1.3	Salient features of Indian legislations on management and handling of municipal solid wastes, hazardous wastes	2
1.4	Salient features of Indian legislations on management and handling of biomedical wastes, lead acid batteries	2
1.5	Salient features of Indian legislations on management and handling of electronic wastes, plastics and fly ash	2
1.6	Financing waste management	1
2.0	Waste Characterization and Source Reduction	
2.1	Waste generation rates and variation	1
2.2	Composition, physical, chemical and biological properties of solid wastes and Hazardous Characteristics	2
2.3	TCLP tests	1
2.4	Waste sampling and characterization plan	1
2.5	Source reduction of wastes	1
2.6	Waste exchange - Extended producer responsibility	1
2.7	Recycling and reuse Practical: Composition of MSW, Determination of Physical and Chemical Properties of MSW.	2
3.0	Storage, Collection and Transport of Wastes	
3.1	Handling and segregation of wastes at source	1
3.2	Storage and collection of municipal solid wastes	1
3.3	Analysis of Collection systems	1
3.4	Need for transfer and transport	1
3.5	Transfer stations Optimizing waste allocation	2
3.6	Compatibility, storage, labeling and handling of hazardous wastes	2
3.7	Hazardous waste manifests and transport.	1
4.0	Waste Processing Technologies	
4.1	Objectives of waste processing	1
4.2	Material separation and processing technologies	1
4.3	Biological & chemical conversion technologies	1
4.4	Methods and controls of Composting	2
4.5	Thermal conversion technologies	1
4.6	Energy recovery – Incineration, solidification & stabilization of hazardous wastes	2
4.7	Treatment of biomedical wastes.	1
5.0	Waste Disposal	
5.1	Waste disposal options - Landfills - Landfill Classification, types and methods	2
5.2	Disposal in landfills - Site selection, design and operation of sanitary landfills, secure landfills and Landfill bioreactors	3
5.3	Leachate and landfill gas management	1
5.4	Landfill closure and environmental monitoring	1
5.5	Rehabilitation of open dumps – landfill remediation.	2

60 CE L02	Climatic Changes and	Category	L	Т	Р	Credit
	Adaptation Measures	OE	З	0	0	3

- To make them aware of the fundamental factors caused for global warming
- To provides clear picture of the atmosphere and its heat transfer through various atmospheric activities.
- To impart knowledge on climatic change impacts in various sectors and its influences scaling the life standard of the influenced human society.
- To understand the role of international bodies like WMO, UNFCCC and IPCC in and adaptation measures for the sustainable earth.
- To strongly emphasis the necessary of innovative technologies to adopt at various levels of each stage in economic growth

Pre-requisites

• Environmental science and engineering

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Summarize the key concepts, definitions on key perspectives of all causes for global warming.	Remember
CO2	Evaluate the mechanisms of Atmosphere and its components connected with global warming	Understand
CO3	Analyze the impact of global warming in climatic change in various fields.	Apply
CO4	Explain various international conferences on carbon emission rate on different regions of world	Remember
CO5	Identify various mitigation and Adaptive measurement planes for climatic change	Understand

60 CE L03	Application of Remote Sensing	Category	L	Т	Р	Credit
00 CL 203	and GIS in Engineering	OE	3	0	0	3

- To know the basic principles of Remote Sensing (RS) and sensors
- To understand the basic operations and data types in Geographical Information System (GIS)
- To acquire knowledge on the image processing and data analysis techniques
- To learn the applications of RS & GIS in urban planning
- To gain knowledge on the applications of RS & GIS in agriculture, forestry and earth sciences

Pre-requisites

• Nil

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Interpret the earth surface features and sensor properties in Remote Sensing (RS)	Understand
CO2	Use different data types in Geographical Information System (GIS)	Understand
CO3	Relate the image processing techniques and data analysis using RS & GIS	Understand
CO4	Solve the problems related to urban planning using RS & GIS	Apply
CO5	Execute the projects in agriculture, forestry and earth sciences with the help of RS & GIS	Understand

1. Dr. D.Sivakumar - sivakumard@ksrct.ac.in

List of MATLAB Programmes:

- 1. Introduction to MATLAB.
- 2. Machine Operations Vehicle Traffic, Highway Capacity.
- Solution of system of linear equations for Effectiveness of Safety Design Features.
 Computation of Road Safety in Urban Transport
- 5. Finding ordinary and partial Safety Tools for Safety Management Systems.

60 CE L05	Environment and Ecology	Category	L	Т	Р	Credit
60 CE L05	Environment and Ecology	OE	3	0	0	3

- Understand the scope and multidisciplinary nature of environmental studies.
- Evaluate the role of biodiversity in shaping ecosystems.
- Identify endangered and endemic species and understand their conservation importance.
- Understand the role of biomonitoring in assessing aquatic ecosystem health.
- Evaluate integrated ecological engineering systems through case studies.

Pre-requisites

Nil

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Demonstrate an understanding of the multidisciplinary nature of environmental studies.	Understand
CO2	Describe the structure and function of various ecosystems.	Understand
CO3	Identify and analyze endangered and endemic species, understanding their conservation significance.	Apply
CO4	Apply ecological principles to propose rehabilitation strategies for damaged ecosystems.	Apply
CO5	Recognize the role of engineers in promoting public awareness, education, and participation for ecosystem protection.	Analyse

Course C	Contents and Lecture Schedule	
S. No.	Topics	No. of hours
1.0	Environmental Studies, Ecosystem and Biodiversity	
1.1	Definition of the environment and its segments.	1
1.2	Overview of environmental studies and its scope.	1
1.3	Multidisciplinary Nature and Public Awareness	1
1.4	Discussion on the multidisciplinary nature of environmental studies.	1
1.5	Importance of public awareness in environmental issues.	1
1.6	Environmental Ethics and Ecosystem Basics	2
1.7	Introduction to environmental ethics.	2
2.0	Ecosystem Functions	
2.1	Introduction to Biodiversity	1
2.2	Values of biodiversity.	1
2.3	Identification of endangered and endemic species.	1
2.4	Overview of biodiversity hotspots and India as a mega biodiversity nation.	2
2.5	Threats, Impact, and Conservation	2
2.6	Analysis of threats to biodiversity and the impact of biodiversity loss.	2
3.0	Ecological Engineering Methods	
3.1	Discussion on conservation methods (in-situ and ex-situ).	1
3.2	Introduction to case studies.	1
3.3	Ecosystem Functions	1
3.4	Energy Flow and Nutrient Cycling	1
3.5	Explanation of energy flow and nutrient cycling.	1
3.6	Analysis of food chains and food webs.	2
3.7	Diversity, Stability, and Productivity	1
3.8	Discussion on biodiversity and ecosystem stability.	1
4.0	Ecological Effects of Industrialisation	
4.1	Differentiation between immature and mature ecosystems.	1
4.2	Overview of primary productivity and biochemical cycling.	1
4.3	Habitat Ecology	1
4.4	Exploration of habitat ecology in different environments.	1
4.5	Ecological Engineering Methods	1
4.6	Understanding the role of biomonitoring in aquatic ecosystems.	2
4.7	Principles of ecosystem rehabilitation.	1
4.8	Detailed study of methods such as step cropping, bio-wind screens, wetlands,	1
5.0	ponds, and Root Zone Treatment for wastewater. Case Studies and Public Awareness	
5.1	Analysis of the reuse of treated wastewater through ecological systems.	2
5.2	Industrialisation and Ecological Effects	2
	Examination of the ecological effects of exploration, production, extraction,	1
5.3	processing, manufacture, and transport.	
5.4	In-depth analysis of case studies on integrated ecological engineering systems.	2
5.5	Recognizing the role of engineers in promoting public awareness, education, and participation for ecosystem protection.	1

00 CE L00	Infrastructure	OE	3	0	0	3

- To explain the importance of sustainable built environment
- To emphasis the significance of sustainable development and construction
- To introduce the techniques and for assessing environmental impact
- To perform the service life and life cycle assessments
- To develop strategies to improve infrastructure resilience and reduce vulnerability to various risks

Pre-requisites

• Fundamentals of reinforced concrete design

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Understand the Concept of Infrastructure and Its Types.	Understand
CO2	Examine Regulatory Frameworks and Standards.	Understand
CO3	Explore Environmental Assessment Tools and Methodologies.	Apply
CO4	Understand the Impact of Climate Change on Infrastructure.	Analyse
CO5	Conduct Resilience and Vulnerability Assessments.	Apply

Course C	Contents and Lecture Schedule						
S. No.	Topics	No. of hours					
1.0	Introduction to Infrastructure and Sustainable Development						
1.1	Present the definition of infrastructure and its significance	1					
1.2	Discuss the broad categories of infrastructure (e.g., social, economic, environmental)	1					
1.3	Group activity: Identify and categorize local examples of infrastructure	1					
1.4	Provide an overview of various types of infrastructure	2					
1.5	An the interdependence of different infrastructure components	2					
1.6	The significance of communication networks and transportation systems	2					
2.0	Regulations, Standards, and Sustainability						
2.1	Regulatory Frameworks for Sustainable Infrastructure	1					
2.2	Importance of regulations and standards in sustainable infrastructure	1					
2.3	Regulatory frameworks for sustainable infrastructure	2					
2.4	The purpose, development, and evolution of regulations	1					
2.5	Case studies demonstrating the impact of regulatory frameworks on infrastructure projects	1					
2.6	International standards for construction and management	1					
2.7	Compliance processes and certification requirements	1					
2.8	The role of certification in ensuring adherence to standards	1					
	Group exercise: Analyze a hypothetical project and identify the international						
2.9	standards applicable						
2.40	Various case studies showcasing successful implementation of regulations in	1					
2.10	sustainable infrastructure projects						
3.0	Indicators of Sustainability and Environmental Assessment						
3.1	Overview of Sustainable Development Goals (SDGs)	2					
3.2	Life cycle stages: cradle-to-grave analysis	2					
3.3	Application of MFA in infrastructure planning and management	1					
3.4	Introduction to various environmental assessment tools (e.g., LEED, BREEAM)	1					
3.5	Green infrastructure and its benefits	1					
3.6	Overview of global and local sustainability policies	1					
3.7	Cost-benefit analysis for sustainable infrastructure	1					
4.0	Climate Change and Infrastructure						
4.1	Overview of climate change and its impact on infrastructure	2					
4.2	Understanding Vulnerability and Resilience	1					
4.3	Climate Modeling and Impact Assessment	1					
4.4	Reducing greenhouse gas emissions in infrastructure projects	1					
4.5	Sustainable and low-carbon construction practices	1					
4.6	Nature-based solutions for adaptation in infrastructure	1					
4.7	Case studies of successful climate-resilient water projects	1					
4.8	Student presentations on researched case studies	1					
4.9	Overview of climate change and its impact on infrastructure	2					
5.0	Safety and Vulnerability of Infrastructure						
5.1	Importance of risk assessment in project planning and management	2					
5.2	Risk Identification and Classification	1					
5.3	Risk Analysis and Quantification 1						
5.4	Vulnerability Analysis and Improvement Strategies	1					
5.5	Emergency Response Planning for Infrastructure	1					
5.6	Crisis Communication and Stakeholder Engagement	1					
5.7	In-depth analysis of selected case studies in various infrastructure sectors	1

- To learn about various types of natural and man-made disasters.
- To impart the knowledge of pre- and post-disaster management for some of the disasters.
- To demonstrate various information and organizations in disaster management in India.
- To get exposed to technological tools and their role in disaster management.
- To understand the basics of Hazard and Vulnerability of structures

Pre-requisites

• Repair and Rehabilitation of Structures

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Outline the basic information and precautions regarding various disasters.	Remember
CO2	Decide first action to be taken under various disasters.	Analyse
CO3	Identify the organizations in India which are dealing with disasters.	Understand
CO4	Select IT tools to help in disaster management.	Apply
CO5	Increase the understanding of financial management of disaster risks.	Remember
