

Curriculum & Syllabus
of
M.Tech. Nanoscience and Technology

(For the batches admitted in 2008-09 and 2009-10)

K.S.RANGASAMY COLLEGE OF TECHNOLOGY
TIRUCHENGODE – 637 215

**(An Autonomous Institution affiliated to Anna University of Technology Coimbatore
and approved by AICTE New Delhi)**

| | | L | T | P | C | CA | ES | Total | |
| 08510101C | APPLIED NUMERICAL METHODS | 3 | 1 | 0 | 4 | 50 | 50 | 100 | |
| Objective(s) | With the present development of the computer technology, it is necessary to develop efficient algorithms for solving problems in science, engineering and technology. This course gives a complete procedure for solving different kinds of problems that occur in engineering numerically. At the end of the course the students would be acquainted with the basic concepts in numerical methods and their uses. | | | | | | | | |
| 1 | SOLUTION OF EQUATION | | | | Total Hrs | 09 | | | |
| Bisection Method - Method of False Position, Iteration Method, Secant Method and Muller's Method. | | | | | | | | | |
| 2 | SOLUTION OF EQUATION AND EIGEN VALUE PROBLEM | | | | Total Hrs | 09 | | | |
| Solution of Linear Systems: Matrix Inversion Method, Gauss Elimination Method, Gauss-Jordan Method, Gauss - Seidal iteration Method, Solution of Tridiagonal Systems, Eigen value Problems- Eigen values of a symmetric Tridiagonal Matrix, Householder Method, QR Method. | | | | | | | | | |
| 3 | INITIAL VALUE PROBLEMS FOR ORDINARY DIFFERENTIAL EQUATIONS | | | | Total Hrs | 09 | | | |
| Picard's Method of Successive approximations - Eulers Method, Modified Euler's Method Range-Kutta Methods. Boundary-Value Problems- Finite Difference Method, Shooting Method, Cubic Spline Method. | | | | | | | | | |
| 4 | BOUNDARY VALUE PROBLEMS FOR ORDINARY AND PARTIAL DIFFERENTIAL EQUATIONS | | | | Total Hrs | 09 | | | |
| Laplace's Equation: Jacobi's Method, Gauss-Seidal Method ADI method, Parabolic Equations, and Hyperbolic Equations. | | | | | | | | | |
| 5 | NUMERICAL INTEGRATIONS | | | | Total Hrs | 09 | | | |
| Numerical integrations by Trapezoidal and Simpson's 1/3 and 3/8 rules, Two and three point Gaussian quadrature formulas, Double intergrades using trapezoidal and Simpson's rules. Finite Element Method-Rayleigh-Ritz Method, Galerkin Method. | | | | | | | | | |
| Total hours to be taught | | | | | | | 45 | | |

| 08510102C | INTRODUCTION TO QUANTUM CONCEPT | | 3 | 1 | 0 | 4 | 50 | 50 | 100 |
| Objective(s) | Impart the basic knowledge about the Quantum Concepts and understand the various parameters like operator, Eigen function, angular momentum, the variation principles and approximate methods. Understand the quantum concept and apply the nanostructured materials. | | | | | | | | |
| 1 | INTRODUCTION | | | | | Total Hrs | 9 | | |
| Limitation of classical physics - Plank's Quantum hypothesis - Einstein's photoelectric effect - wave nature of particle - The uncertainty principle - Schrodinger's Time dependent and independent wave equations - particle in a box - Harmonic oscillator - rigid rotor. | | | | | | | | | |
| 2 | WAVE MECHANICS | | | | | Total Hrs | 9 | | |
| Linear operator - Hermitian operator - Postulates of Quantum mechanics - Simultaneous measurability of observable - Equations in motion - Linear harmonic oscillator - Operator method - particle moving in a spherically symmetric potential - hydrogen atom - Hydrogen orbitals - Metrics representations of wave functions. | | | | | | | | | |
| 3 | OPERATORS AND COMPUTATION LAWS | | | | | Total Hrs | 9 | | |
| The angular momentum operators - Eigen values and Eigen functions of Land L - Eigen values J and J-spin angular momentum – Addition of angular momenta – Clebsch - Gordan coefficients - Computations. | | | | | | | | | |
| 4 | VARIATION PRINCIPLES | | | | | Total Hrs | 9 | | |
| The variation principle - Variation method for excited states - The ground state of Helium, hydrogen molecule – Deuteron - First orders perturbation – Harmonic perturbation-Transition to continuous states. | | | | | | | | | |
| 5 | APPROXIMATION METHODS | | | | | Total Hrs | 9 | | |
| Klein-Gordon equation - particle in a coulomb field - Dirac's equation for a free particle - plane wave solution - Negative energy states - Magnetic moment of the electron - Radial equation for an electron in general potential - many electrons atoms - Hatree equations - Hatree- Fock equation. | | | | | | | | | |
| Total hours to be taught | | | | | | | 45 | | |

| 08510103C | INTRODUCTION OF NANO SCALE SCIENCE & TECHNOLOGY | 3 | 0 | 0 | 3 | 50 | 50 | 100 |
| Objective(s) | Impart the basic knowledge on Nanoscience and Technology. Understand the various process techniques available for the processing of Nanostructured materials. Impart knowledge on the exotic properties of nanostructured materials at their nanoscale lengths. Acquire the knowledge above the various nanoparticles process methods and their skills. Study the reactive merits of various process techniques. | | | | | | | |
| 1 | INTRODUCTION | Total Hrs | | | 9 | | | |
| Scientific Revolutions – Types of Nanomachines and Nanotechnology-periodic table-Atomic structure molecules and phase Energy-Molecular and Atomic size-surfaces and dimensional space-Top down and bottom up. | | | | | | | | |
| 2 | NANOMATERIAL SYNTHESIS METHODS | Total Hrs | | | 9 | | | |
| Introduction to Nano scale materials - Synthesis and processing, method of nano structured materials preparation – mechanical grinding, wet chemical synthesis – sol-gel processing, gas phase synthesis, gas condensation processing, chemical vapor condensation – nano composite synthesis – processing. | | | | | | | | |
| 3 | NANOMATERIAL PROPERTIES | Total Hrs | | | 9 | | | |
| Opportunity at the nano scale - Length and time scale in structures-energy landscapes-Inter dynamic aspects of inter molecular forces-Evolution of band structure and Fermi surface. | | | | | | | | |
| 4 | QUANTUM DOTS AND NANOTUBES | Total Hrs | | | 9 | | | |
| Quantum dots - Nano wires-Nano tubes 2D and 3D films Nano and mesopores, micelles, bilayers, vesicles, bio-nano machines-biological membranes. | | | | | | | | |
| 5 | PHYSICAL PROPERTIES OF NANOSTRUCTURED MATERIALS | Total Hrs | | | 9 | | | |
| Influence of Nano structuring on Mechanical - Optical, electronic, magnetic and chemical properties-gram- size effects on strength of metals optical properties of quantum dots and quantum wires-electronic transport in quantum wires and carbon nano tubes-magnetic behavior of single domain particles and nanostructures-surface chemistry of tailored monolayer-self assembling. | | | | | | | | |

| | | L | T | P | C | CA | ES | Total |
| 08510104C | ADVANCED MATERIALS TECHNOLOGY | 3 | 1 | 0 | 4 | 50 | 50 | 100 |
| Objective(s) | Understand the basic ideas about the materials and impart the knowledge about the properties and various applications of dielectric materials magnetic, superconducting material.etc. Impart the knowledge about the new materials like smart materials, shape memory alloys and acquire the various physico-chemical properties of various materials. | | | | | | | |
| 1 | STRUCTURE & BONDS OF SOLIDS | | | Total Hrs | 9 | | | |
| Bonding in solids-Ionic bonding-bond energy of NaCl molecule- Properties of ionic solids-Covalent bond-Properties of Covalent compounds-Metallic bond-Properties of metallic crystals-Intermolecular bonds-Dispersion bonds-dipole bonds-hydrogen bonds structure of solids. Introduction-Lattice Points-Space lattice-basis - crystal structure-unit cell-Lattice Parameter- Primitive cell crystal systems - simple cubic - body centered-Face centered -hexagonal-crystal symmetry-Miller indices. Imperfection-Point defect-Vacancy- Schotty defect-Fresnel defect-Line imperfection-Screw dislocation-Burger vector-Reciprocal lattice. | | | | | | | | |
| 2 | DIELECTRIC MATERIALS | | | Total Hrs | 9 | | | |
| Dielectric Materials: Basic concepts- Langevin's Theory of Polarisation-Clausius-Mossotti Relation-Ferro electricity-Piezoelectricity-Properties of Dielectric in alternating fields- The complex Dielectric Constant and Dielectric Loss-Ionic Polarizability as a function of frequency-Complex dielectric constant of Non-polar solids-Dipolar relaxation-Effects of Dielectrics. | | | | | | | | |
| 3 | MAGNETIC MATERIALS | | | Total Hrs | 9 | | | |
| Magnetic materials: Dia and Paramagnetic materials-Quantum theory of paramagnetic materials-Paramagnetic susceptibility of conduction electrons-Ferro-anti ferromagnetic materials-Superconducting materials. | | | | | | | | |
| 4 | SEMI CONDUCTING & SUPERCONDUCTING MATERIALS | | | Total Hrs | 9 | | | |
| Semi-conducting materials: Semiconductor-Direct and Indirect bonding characteristics-Importance of Quantum confinement-quantum wires and dots-Ferro electric semiconductors-applications-Polymer semiconductors-Photo conductive polymers. | | | | | | | | |
| 5 | NEW MATERIALS | | | Total Hrs | 9 | | | |
| New Materials: Smart materials-shape memory alloys-shape memory effects- Martensitia Transformation functional properties-processing-texture and its nature. | | | | | | | | |
| Total hours to be taught | | | | | | 45 | | |

| 08510105C | INTRODUCTION OF BIOMATERIALS | 3 | 0 | 0 | 3 | 50 | 50 | 100 | |
| eObjective(s) | Understand the basic properties of biomaterials and the classes of biomaterials implant the knowledge about DNA nanotechnology and nanosensors and understand basic Characterisation techniques related to DNA Nanotechnology. Understand the applications of biomaterials for implant applications. | | | | | | | | |
| 1 | INTRODUCTION | | | | Total Hrs | 9 | | | |
| Biomaterials and biological materials- examples and use - First generation biomaterials-General characteristics naturally occurring biomaterials- pure metals-alloys ceramics-polymer-composites. | | | | | | | | | |
| 2 | SECOND GENERATION BIOMATERIALS | | | | Total Hrs | 9 | | | |
| Second generation bio materials and their properties - Bioactive and biodegradable ceramics-biodegradable polymers-hydro gels. | | | | | | | | | |
| 3 | THIRD GENERATION BIOMATERIALS | | | | Total Hrs | 9 | | | |
| Third generation biomaterials - Characteristics-biomaterials in tissue engineering enzyme conjugate DNA conjugates-micro array technologies-Micro nanotechnology micro fabrication-nanofabrication between biological materials, molecular motors biomolecules and Nanomaterials. | | | | | | | | | |
| 4 | NANOBIOTECHNOLOGY | | | | Total Hrs | 9 | | | |
| Introduction-DNA nanotechnology-structural DNA assembly-Nano pore and nano particles-biological arrays-nano probes for analytical applications-nano sensors- nanoscale organization-characterization-quantum size effects nanobiosensors of the future. | | | | | | | | | |
| 5 | MICROSCOPY | | | | Total Hrs | 9 | | | |
| SEM-TEM-modern - Advances-microanalysis-optical detection of single molecules-applications in single molecules spectroscopy- single molecule DNA detection, sorting, sequencing-DNA nanoparticles studies by AFM-DNA computer-PCR amplification of DNA fragments-Molecular surgery of DNA. | | | | | | | | | |

| 08510106C | COMPUTER PROGRAMME IN C AND C++ | 3 | 0 | 0 | 3 | 50 | 50 | 100 | |
| Objective(s) | | Impart the basic programming in C & C++. | | | | | | | |
| 1 | BASIC CONCEPTS IN C | | | | Total Hrs | 9 | | | |
| Identifiers and Keywords - Constant Variables and Data Types- Operators and Expressions- Data Input and Output – Control Structures – if and Switch statements while, do- while and for statements – goto statement – Arrays – Character strings – Simple programs. | | | | | | | | | |
| 2 | FUNCTION & POINTERS | | | | Total Hrs | 9 | | | |
| User defined Functions - Defining and accessing functions – Passing arguments – Functions prototypes – Recursion – Pointer Declarations – Passing pointers to functions – Operations on pointers. | | | | | | | | | |
| 3 | STRUCTURE & ARRAYS | | | | Total Hrs | 9 | | | |
| User defined data types - Structures – Declaring structures and Accessing members – Array of structures – Unions – files – sequential file processing – random access file processing. | | | | | | | | | |
| 4 | BASIC CONCEPTS IN C++ | | | | Total Hrs | 9 | | | |
| Object Oriented Programming (OOP) - Basic concepts and applications – Structure of C++ program –variable declaration – Differences between C and C++ - Functions in C++ - Function overloading/polymorphism – Classes and objects – Constructors and destructors – Operator overloading – Simple programs. | | | | | | | | | |
| 5 | TYPES OF CLASSES | | | | Total Hrs | 9 | | | |
| Extending classes - Inheritance and its types – Single level, multilevel, multiple and hybrid inheritance – Pointers to Objects and derived classes – Virtual functions. | | | | | | | | | |
| Total hours to be taught | | | | | | 45 | | | |

| Objective(s) | | Understand the relative methods of various characterisation techniques and the basic knowledge about the different characterisation techniques. Impart the knowledge about the characterisation techniques and study each and every technique and acquire the knowledge to use the technique. | | | | | | | |
| 1 | OPTICAL MICROSCOPY | | | | Total Hrs | 9 | | | |
| Optical absorption and emission spectroscopy – Basics - AAS – ICP OES – Electron Microscopy: Scanning electron microscopy – Transmission electron microscopy – Scanning tunneling electron microscopy – Image collection in electron microscopes – Environmental transmission electron microscopy – Electron energy loss spectroscopy at the nanometer scale – In-situ nano measurements. | | | | | | | | | |
| 2 | SCANNING PROBE MICROSCOPY | | | | Total Hrs | 9 | | | |
| Scanning Probe microscopy – Atomic manipulations – Atomic force microscopy – Scanning probe lithography – Optical microscopy – Confocal microscopy – Scanning near field optical microscopy – Secondary ion mass (SIMS) spectrometry – Matrix assisted laser desorption ionization mass spectrometry (MALDIMS). | | | | | | | | | |
| 3 | SPECTROSCOPY | | | | Total Hrs | 9 | | | |
| Spectroscopy of semiconductors – Excitons – Infrared surface spectroscopy – Raman spectroscopy – Brillouin spectroscopy – Dynamic Light Scattering (DLS) – NMR Spectroscopy – ESR spectroscopy – Mossbauer spectroscopy – Thermo gravimetric Analysis (TGA) – Differential Scanning Calorimetry (DSC) – Thermo mechanical Analysis (TMA). | | | | | | | | | |
| 4 | MECHANICAL CHARACTERISATION | | | | Total Hrs | 9 | | | |
| Mechanical Characterization – Modulus and load carrying capability of nano region/ compression - micro hardness – Fatigue – Abrasion and wear resistance – Super plasticity – Nano indentation – Nano tribology – Nano tribometre – Surface Force apparatus – Quartz crystal microbalance – Friction force microscope. | | | | | | | | | |
| 5 | DIFFRACTOMETER | | | | Total Hrs | 9 | | | |
| Neutron and X- ray diffraction – Debye Scherrer formula – Dislocation density – Micro strain macromolecular crystallography using synchrotron radiation – Role for neutron scattering in nano science - Photoluminescence - Thermo luminescence – X-ray absorption Fine Structure (XAFS) – Extended X- ray absorption fine structure (EXAFS) – Electron scattering for chemical Analysis (ESCA). | | | | | | | | | |
| Total hours to be taught | | | | | | 45 | | | |

| 08510202C | NANOMATERIALS AND NANOMEDICINE | 3 | 0 | 0 | 3 | 50 | 50 | 100 | |
| Objective(s) | Understand the principle behind nanomedicine and understand the application of Nanomaterials in medicine. Impart knowledge about drug delivery systems and nanosensors. Impart the knowledge to apply the Nanomaterials in different medical applications and gain the knowledge for the solution of right nanomaterials for biomedical applications. | | | | | | | | |
| 1 | BASIC OF NANOBIO MOLECULES | | | Total Hrs | 9 | | | | |
| Structure property relationship of Biological Materials: Nano Structure of proteins and Polysaccharides – Structure property relationship of tissues, bones and teeth - Collagen rich tissues - elastic tissues - Preparation of nano biomaterials – Polymeric scaffolds collagen – Elastins – Mucopolysaccharides – Proteoglycans - Cellulose and derivatives – Dextrans – Alginates – Pectins - Chitin. | | | | | | | | | |
| 2 | TYPES OF NANOBIO MOLECULES | | | Total Hrs | 9 | | | | |
| . Introduction - Development of nano medicines – Nano Shells – Nano pores – Tectodendrimers – Nano particle drug system for oral administration – Drug system for nasal administration – Drug system for ocular administration – Nanotechnology in diagnostic application. | | | | | | | | | |
| 3 | DNA - NANOBIO TECHNOLOGY | | | Total Hrs | 9 | | | | |
| Introduction – Antibody conjugated nanoparticles – Conjugated nanoparticles interaction with biological surfaces – Biomedical nanoparticles – Liposome's – Dentrimers – Different types of drug loading – Drug release – Biodegradable polymers – Applications. | | | | | | | | | |
| 4 | NANOSTRUCTURED MATERIALS IN MEDICINE | | | Total Hrs | 9 | | | | |
| Gold and Silver nanoparticles in cancer targeting and treatment – Nanoparticles in treatment of breast cancer – Chemotherapy – Active and Passive cancer tissue targeting – Micro fluidics – Chemotherapeutic agents – Immunotherapy – Vaccine immunotherapy – Radiotherapy – Thermotherapy – Photo dynamic therapy – Nano particulate targeting. | | | | | | | | | |
| 5 | NANOSENSORS | | | Total Hrs | 9 | | | | |
| Introduction to nano sensors – Organization techniques – Ion sensing at nano particle surface – Cation sensing – Anion sensing – Surface confined chemical sensors – Nanoparticles sensors – Calorimetric sensing – Vapor phase sensing – Raman sensing at surfaces – Electro analytical sensing – Plasma and optical sensing. | | | | | | | | | |

| Objective(s) | Understand the applications of nanomaterials in industries and study the relative methods of various principles and their industrial applications | | | | | | | | |
| 1 | SEMICONDUCTING NANOPARTICLES | | | Total Hrs | | 9 | | | |
| Semiconductor physics - Fabrication techniques - Electronic structure and physical processes in semiconductor nanostructures - Principles and performance of semiconductor nanostructure based electronic and electro - Optical devices. | | | | | | | | | |
| 2 | MAGNETIC NANOPARTICLES | | | Total Hrs | | 9 | | | |
| Revision of magnetism in solids – Property - Nanostructure relationships - Fabrication and properties of nanostructured magnets - Probes of nanomagnetic properties - Electronic magneto – Transport - Micro magnetic modeling. | | | | | | | | | |
| 3 | NEMS & MEMS | | | Total Hrs | | 9 | | | |
| Micro and Nano-Electromechanical systems - Fabrication process - Choice of materials - Calculations - The performance of different structures - Advantages and disadvantages of different approaches - Thermal – Radiation - Magnetic, chemical, and mechanical sensors - Micro actuators. | | | | | | | | | |
| 4 | MOLECULAR ELECTRONICS | | | Total Hrs | | 9 | | | |
| Hybridization – Conjugation – Excitations - Molecular crystals - Conducting vs. semiconducting polymers - Organic electroluminescent displays injection – Transport - Exciton formation – Light emission - Influence of supermolecular order: excimers - H- and J- aggregates – Liquid crystallinity. | | | | | | | | | |
| 5 | APPLICATION OF NANOPARTICLES IN INDUSTRY | | | Total Hrs | | 9 | | | |
| Nanoparticles and Micro – Organism, Nano-materials in bone substitutes & Dentistry, Food and Cosmetic applications, Textiles, Paints, Catalysis, Drug delivery and its applications. | | | | | | | | | |

| Objective(s) | Understand the basic about the semiconductor & magnetic materials. Impart the knowledge about the nanostructured semiconducting materials. Understand the different applications of nano semiconductor & nanomagnetic particles in different areas. | | | | | | | | |
| 1 | BASICS OF NANOELECTRONICS | | | Total Hrs | 9 | | | | |
| Physical fundamentals – Quantization of action, charge and flux – electrons in potential well – photons interacting with electrons in solids – diffusion processes – basic information theory – data & bits – data processing - Size Effects on structure and Morphology of free or Supported Nanoparticles – Size and confinement Effects – Fraction of surface atoms – Specific surface energy and surface stress. | | | | | | | | | |
| 2 | QUANTUM CONCEPTS IN NANOELECTRONICS | | | Total Hrs | 9 | | | | |
| Size dependent absorption spectra - Blue shift with smaller sizes - Phonons in nanostructures - Contacts at Nano level – AFM, ISTM tip on a surface - Electronic states in crystal energy bands - Concepts of 2D nanostructures (quantum wells) - 1 D nanostructures (quantum wires) OD nanostructures (quantum dots) - Artificial atomic clusters - Size dependent properties. | | | | | | | | | |
| 3 | NANOMATERIALS PROCESSING | | | Total Hrs | 9 | | | | |
| Nanosystems Synthesis - Molecular beam epitaxy – MOCVD - Chemical routes - Nanoparticles on polymers - Pulsed laser deposition - Ion beam assisted techniques including embedded nanoparticles - RF sputtering. | | | | | | | | | |
| 4 | PROPERTIES OF NANOPARTICLES | | | Total Hrs | 9 | | | | |
| Charging of quantum dots - Coulomb blockade - Quantum mechanical treatment of quantum wells - Wires and dots - Widening of band gap in quantum dots - Strong and weak confinement - Properties of coupled quantum dots - Optical scattering from nano defects. | | | | | | | | | |
| 5 | NANOCOMPOSITES | | | Total Hrs | 9 | | | | |
| Nanocomposites Electronic and atomic structure of aggregates and nanoparticles Theory and modeling of nanoparticles fictionalization processes – Nanoelectronics with super conducting devices – Microscopic characteristics and model – Switching devices – Application of super conducting devices. | | | | | | | | | |
| Total hours to be taught | | | | | | 45 | | | |

| Objective(s) | | Understand the basic about nanolithography and impart the knowledge for the different lithography techniques. Impart knowledge about the lithography application of different industries and study the use of AFM in nano lithography | | | | | | | |
| 1 | BASICS IN LITHOGRAPHY | | | | Total Hrs | | 9 | | |
| Lithography – Printing – Chemical process – Refinements – The modern process – Optical, micro, nanolithography – Lithography in artistic medium – Nanometer design for electronic circuits – Applications of nanolithography. | | | | | | | | | |
| 2 | OPTICAL LITHOGRAPHY | | | | Total Hrs | | 9 | | |
| Optical lithography – Light sources – Photo mask and alignment - Resolution in projection systems – Positive and negative photo resists – Ultraviolet lithography – X ray Lithography - Proximity printing – X ray masks – X ray sources – Synchrotron radiation – X ray projection – X ray resists. | | | | | | | | | |
| 3 | ION BEAM LITHOGRAPHY | | | | Total Hrs | | 9 | | |
| Ion beam lithography - Focused ion beam – Point sources of Ion – Ion column – Beam writing – Masked Ion Beam Lithography – Ion projection Lithography - Electron Lithography – Electron optics – Raster scan and vector scan – Electron proximity / Projection Printing - Electron resists – Electron Beam Applications. | | | | | | | | | |
| 4 | MICROLITHOGRAPHY | | | | Total Hrs | | 9 | | |
| Microlithography – Microchips - Immersion lithography – Semiconductor processing – MEMS design - Nanolithography - Nanosphere lithography – Molecular self-assembly nanoimprint lithography - Dip-pen nanolithography - Soft lithography - Stereo -lithography - Nanoscale 3D shapes – NEMS design. | | | | | | | | | |
| 5 | NANOLITHOGRAPHY TOOLS | | | | Total Hrs | | 9 | | |
| Tools for nanolithography - Molecular manipulation by STM and AFM - LB film resists - Nanopattern synthesis – Nano scratching – Resist & imaging layers. | | | | | | | | | |

| Objective(s) | Understand the basic knowledge of Nanobiotechnology and DNA structures. Understand the application of nanomaterials in biotechnology and acquire the knowledge about the DNA, proteins, amino acids, drug delivery, biomedicine etc., | | | | | | | | |
| 1 | INTRODUCTION | | | Total Hrs | | 9 | | | |
| Interdisciplinary areas of Biotech and Nanoscience - Biological systems – Cells – Cellular components - Nucleic acids and proteins refinement and application of instruments – To generate and manipulate nanostructured materials to basic and applied studies. | | | | | | | | | |
| 2 | INTERPHASE SYSTEMS | | | Total Hrs | | 9 | | | |
| Interphase systems of devices for medical implants – Microfluidic systems – Microelectronic silicon substrates – Nano-biometrics – Introduction – Lipids as nano-bricks and mortar: self assembled nanolayers. | | | | | | | | | |
| 3 | PROTEIN BASED NANOSTRUCTURES | | | Total Hrs | | 9 | | | |
| Protein based nanostructures building blocks and templates – Proteins as transducers and amplifiers of biomolecular recognition events – Nanobioelectronic devices and polymer nanocontainers – Microbial production of inorganic nanoparticles – Magnetosomes. | | | | | | | | | |
| 4 | DNA BASED NANOSTRUCTURES | | | Total Hrs | | 9 | | | |
| DNA based nanostructures – Topographic and Electrostatic properties of DNA and proteins – Hybrid conjugates of gold nanoparticles – DNA oligomers – Use of DNA molecules in nanomechanics and Computing. | | | | | | | | | |
| 5 | APPLICATION OF NANOBIO TECHNOLOGY | | | Total Hrs | | 9 | | | |
| Semiconductor (metal) nanoparticles and nucleic acid and protein based recognition groups – Application in optical detection methods – Nanoparticles as carrier for genetic material – Nanotechnology in agriculture – Fertiliser and pesticides. | | | | | | | | | |

| 08510208P | TECHNICAL REPORT PREPARATION AND PRESENTATION I | 0 | 0 | 2 | 0 | 100 | 00 | 100 | |
| Objective(s) | To provide exposure to the students to refer, read and review the research articles in referred journals and conference proceedings. To improve the technical report writing and presentation skills of the students. | | | | | | | | |
| Methodology | <ul style="list-style-type: none"> Each student is allotted to a faculty of the department by the HOD By mutual discussions, the faculty guide will assign a topic in the general / subject area to the student. The students have to refer the Journals and conference proceedings and collect the published literature. The student is exposed to collect at least 20 such Research papers published in the last 5 years. Using OHP/Power point, the student has to make presentation for 15-20 minutes followed by 10 minutes discussion. The student has make two presentations, one at the middle and the other near the end of the semester. The student has to write a Technical report for about 30-50 pages (Title page, One page Abstract, review of research paper under various subheading, Concluding remarks and List of References). The technical report has to b submitted to the HOD one week before the final presentation, after the approval of the faculty guide. | | | | | | | | |
| Execution | Week | Activity | | | | | | | |
| | I | Allotment of Faculty Guide by the HOD | | | | | | | |
| | II | Finalizing the topic with the approval of Faculty Guide | | | | | | | |
| | III-IV | Collection of Technical papers | | | | | | | |
| | V – VI | Mid semester presentation | | | | | | | |
| | VII – VIII | Report writing | | | | | | | |
| | IX | Report Submission | | | | | | | |
| | X-XI | Final presentation | | | | | | | |
| Evaluation | <ul style="list-style-type: none"> 100 % Continuous Assessment 3hrs/week and 2 credits | | | | | | | | |
| | Component | | | | | Weightage | | | |
| | Phase – I Presentation | | | | | 25 % | | | |
| | Phase – II Presentation | | | | | 25 % | | | |
| | Report preparation and Submission | | | | | 30 % | | | |
| | Final presentation | | | | | 20 % | | | |

| Objective(s) | To understand the development of nanoelectronics. To study the principle behind the nanodevices. To explore the application of nanodevices. To understand and study the molecular and bioelectronics on nano application. | | | | | | | | |
| 1 | QUANTUM DEVICES | | | | Total Hrs | 9 | | | |
| Quantum Electronic devices – upcoming electronic devices – Electrons in mesoscopic structures – Short-channel MOS Transistor – split Gate Transistor – Electron wave transistor – Electron spin transistor – Quantum cellular Automata – Quantum Dot array – Quantum computer- Bit and Qubit – Coherence and Entanglement – Quantum Parallelism. | | | | | | | | | |
| 2 | TUNNELING DEVICES | | | | Total Hrs | 9 | | | |
| Tunneling element – Tunnel Effect and Tunneling Elements-Tunneling Diode – Resonant Tunneling Diode – Three -Terminal Resonate Tunneling Devices-Technology of RTD-Digital circuits design based on RTDs – Memory Applications – Basics Logic Circuits – Dynamic Logic Gates - Digital circuits design based on RTBT – RTBT Mobile – RTBT Threshold Gate – RTBT Multiplexer – Single Electron Transistor(SET) – Principle – Coulomb Blockade- Performance – Technology- Circuit Design- Writing and Drivers – Logic and Memory Circuits – SET adder as an Example of a Distributed Circuit – Comparison between FET and SET. | | | | | | | | | |
| 3 | SUPERCONDUCTING DEVICES AND PHOTONICS | | | | Total Hrs | 9 | | | |
| Basics - Macroscopic characteristics – Macroscopic model- Super conducting switching Devices – Cryotron-Josephson Tunneling Devices- Elementary circuits – Associative or Content – Addressable Memory - SQUID – Flux Quantum device –LC –Gate – Magnetic Flux Quantum – Quantum cellular Automata- Quantum computer with Single Flux devices – SFQD- RSFQD – Application of superconducting devices – Intergrated Electronics – Comparison of FET Electronics. Introduction to Photonics - Principle- Fabrication –application. | | | | | | | | | |
| 4 | UNCERTAINTY OF NANODEVICES | | | | Total Hrs | 9 | | | |
| Limits of Integrated Electronics- Survey of Limits – Replacement of Technologies – Energy Supply and Heat Dissipation – Parameter Spread as Limiting Effect – Limits due to Thermal Particle motion- Debye Length – Thermal Noise- Reliability of as Limiting Factor – Physical limits – Thermodynamic Limits - Relativistic Limits – Equal Failure Rates by Tunneling and Thermal Noise – Final Objectives of Integrated Electro Systems - Removal of uncertainty by Nanomachines – Uncertainties in Nanosystems- Uncertainties in the Development of Nanoelectronics. | | | | | | | | | |
| 5 | MOLECULAR AND BIOELECTRONICS | | | | Total Hrs | 9 | | | |
| Bioelectronics – molecular processor – DNA Analyser molecular electronics – switches based on fullerenes and nanotubes – polymer electronic – self Assembling circuits – optical molecular memories – DNA computer – Information Processing with chemical reaction – Nanomachines – Parallel Processing - Drexler – Smalley debate – realistic projection- Synergy of Nano-Bio-Info. | | | | | | | | | |

The student has make two presentations, one at the middle and the other near the end of the semester. The student has to write a mini project report for about 30-50 pages (Title page, One page Abstract, review of research paper under various subheading, Concluding remarks and List of References). The project report has to be submitted to the HOD one week before the final presentation, after the approval of the faculty guide. | | | | | | | |
| Execution | Week | Activity | | | | | | |
| | I | Allotment of Faculty Guide by the HOD | | | | | | |
| | II | Finalizing the topic with the approval of Faculty Guide | | | | | | |
| | III-IV | Collection of Scientific papers | | | | | | |
| | V – VI | Mid semester presentation | | | | | | |
| | VII – VIII | Report writing | | | | | | |
| | IX | Report Submission | | | | | | |
| | X-XI | Final presentation | | | | | | |
| Evaluation | <ul style="list-style-type: none"> 100 % Continuous Assessment 3 hrs/week and 2 credits | | | | | | | |

| Objective(s) | To provide exposure to the students to refer, read and review the research articles in referred journals and conference proceedings. To improve the technical report writing and presentation skills of the students. | | | | | | | | |
| Methodology | <ul style="list-style-type: none"> Each student is allotted to a faculty of the department by the HOD By mutual discussions, the faculty guide will assign a topic in the general / subject area to the student. The students have to refer the Journals and conference proceedings and collect the published literature. The student is exposed to collect at least 20 such Research papers published in the last 5 years. Using OHP/Power point, the student has to make presentation for 15-20 minutes followed by 10 minutes discussion. The student has make two presentations, one at the middle and the other near the end of the semester. The student has to write a Technical report for about 30-50 pages (Title page, One page Abstract, review of research paper under various subheading, Concluding remarks and List of References). The technical report has to be submitted to the HOD one week before the final presentation, after the approval of the faculty guide. | | | | | | | | |

| 08510341E | MICRO ELECTRO MECHANICAL SYSTEMS (MEMS) AND NANO ELECTROMECHANICAL SYSTEMS (NEMS) | 3 | 0 | 0 | 3 | 50 | 50 | 100 |
| Objective(s) | To explore the knowledge on Silicon Technology. To understand the principle, architecture, fabrication and application of MEMS. To study the properties of materials used for MEMS design. To explore the basic principle and fabrication and application of NEMS. To explore the application of NEMS & MEMS | | | | | | | |
| 1 | POTENTIAL OF SILICON TECHNOLOGY | | | Total Hrs | 9 | | | |
| Development of microelectronics – nanostructure region – complexity problem – challenges in nanoelctronics - Semiconductor as based materials – band diagram of semiconductor – inhomogeneous semiconductor band diagram - different types of transistor integration -microminiaturization process-methods and limits- scaling – milestone of silicon technology – limits - microelectronic and mechanical systems (MEMS) – micromechanics technology – micromechanics for nanoelctronics – integrated optoelectronics. | | | | | | | | |
| 2 | MICRO ELECTRO MECHANICAL SYSTEMS (MEMS) | | | Total Hrs | 9 | | | |
| Silicon micromachining – bulk micromachining – surface micromachining - Microsystems fabrication techniques – photolithography – ion implantation – diffusion – oxidation – CVD – PVD – sputtering – single crystal reactive etching – LIGA – x-ray based fabrication – packaging of MEMS devices – three level microsystem packaging – device level packaging – system level packaging – interface in microsystem packaging – packaging technology – sealing – 3D packaging – assembly of microsystem - selection of packaging materials. | | | | | | | | |
| 3 | MATERIALS AND DESIGN OF MEMS | | | Total Hrs | 9 | | | |
| Single crystal silicon - Poly silicon – silicon dioxide – silicon nitride – germanium based materials- metals-silicon carbide-diamond - III-V materials – piezoelectric materials. Design – considerations – selection of materials – selection of manufacturing process – process design – photolithography – thin film fabrication – geometry shaping – mechanical design – thermo mechanical loading thermo mechanical stress analysis – dynamic analysis – interfacial fracture analysis – mechanical designing methods – computer aided designing. | | | | | | | | |
| 4 | APPLICATION OF MEMS AND NEMS | | | Total Hrs | 9 | | | |
| Inertial sensors – accelerometer – gyroscope - micromechanical pressure sensors – pizo resistive – capacitive - micro robotics – micro channel heat sinks – optical MEMS – visual display – precision optical platform – optical data switching – RF MEMS – MEMS variable capacitors – MEMS switches – Resonators. | | | | | | | | |
| 5 | NANO ELECTROMECHANICAL SYSTEMS (NEMS) | | | Total Hrs | 9 | | | |
| Introduction – nano machining of NEMS based upon electron beam lithography – Nano electromechanical systems fabrication – nano imprint lithography – polymeric nano fiber templates – focused ion beam doping wet chemical etching – stencil lithography and sacrificial etching – large scale integration – future challenges - applications. | | | | | | | | |
| Total hours to be taught | | | | | | 45 | | |

| Objective(s) | To provide exposure to the students on biophysics in nanotechnology. To explore the cancer therapy and drug delivery system. To study the various devices used for nanotechnology | | | | | | | | |
| 1 | IMAGING TECHNIQUES | | | | Total Hrs | 9 | | | |
| Medical diagnostics – Imaging – MRI – Principal, Instrumentation, Operation and Imaging - NMR – Principal, Instrumentation, Operation and imaging - Nanotechnology based diagnostics including imaging - Applications. | | | | | | | | | |
| 2 | NANO BIOACTIVE GLASSES | | | | Total Hrs | 9 | | | |
| Introduction - Nano Bioactive glasses – Preparation – Methods - Nanobioactive glass powders – Properties – Mechanical-measurement of bioactivity – <i>In vitro</i> studies - coating on metallic implant – Characterisation - Implant applications. | | | | | | | | | |
| 3 | CANCER TREATMENT | | | | Total Hrs | 9 | | | |
| Gold and Silver nanoparticles in cancer targeting and treatment - Nanoparticles in treatment of breast cancer – Chemotherapy: Active and Passive cancer tissue targeting – micro fluidics – Chemotherapeutic agents – Immunotherapy – Vaccine immunotherapy – Radiotherapy – Thermotherapy – Photo dynamic therapy – Nano particulate targeting. | | | | | | | | | |
| 4 | DRUG DELIVERY | | | | Total Hrs | 9 | | | |
| Introduction, Antibody conjugated nanoparticles – Conjugated nanoparticles interaction with biological surfaces – Biomedical nanoparticles – Liposomes - Dendrimers - Different types of drug loading, drug release and Biodegradable polymers – Applications. | | | | | | | | | |
| 5 | NANOSENSORS | | | | Total Hrs | 9 | | | |
| Introduction to nano sensors – Organization techniques – Ion sensing at nano particle surface – cation sensing – anion sensing – surface confined chemical sensors – nanoparticle sensors – calorimetric sensing – vapor phase sensing – Raman sensing at surfaces – electro analytical sensing – plasma and optical sensing. | | | | | | | | | |

| 08510351E | NANOSAFETY AND ENVIRONMENTAL ISSUES | 3 | 0 | 0 | 3 | 50 | 50 | 100 |
| Objective(s) | To provide exposure to the students on safety and environmental issues of nano science and technology. To explore the toxic effects of nanotechnology on human health and life. To analyze the various issues on environmental effects and explore suitable remedial measures. | | | | | | | |
| 1 | NANOSAFETY – INTRODUCTION | | | Total Hrs | | 9 | | |
| Identification of Nano - Specific Risks- Responding to the Challenge -Human health hazard – Risk reduction – Standards – Safety – transportation of NP– Emergency responders. Risk assessment –Environmental Impact – Predicting hazard – Materials Characterization. Risk Assessment related to nanotechnology – Environmental and policy making- Ecotoxicity measurement of Polychlorinated biphenyl and intermediates in their degradation | | | | | | | | |
| 2 | NANOTOXICOLOGY | | | Total Hrs | | 9 | | |
| Inhalation of nanomaterials – Overview. Introduction- Inhalation deposition and Pulmonary clearance of Insoluble Solids – Bio –persistence of Inhaled solid material. Systemic Translocation of inhaled Particles. Pulmonary effects of SWCNT- Pulmonary Inflammatory Responses to SWCNTs <i>In Vivo</i> - Interactions of pulmonary Inflammation with oxidative stress – Interactions of SWCNTs with Macrophages | | | | | | | | |
| 3 | EXPERIMENTAL AND FIELD ISSUES | | | Total Hrs | | 9 | | |
| Nanoparticle exposure and systematic cardiovascular effects – experimental data – respiratory particulate matter exposure and cardiovascular toxicity, Nanoparticles – Hypothesis and research approaches. SWCNT – Experimental data. Toxicity of polymeric nanoparticles with respect to their application as drug carriers. Particle exposure through the indoor air environment –Measurement of PM and experimental study. | | | | | | | | |
| 4 | NANOSAFETY | | | Total Hrs | | 9 | | |
| Needs for regulations, training and education for health protection and environmental security of nanotechnologies – definitions and essence – general benefits – benefits for health and medical practice – potential risks – The approaches to assessment of exposure to the nanotechnology. Bioethics and legal aspects of potential health and environmental risks in nanotechnology – Legal regulatory considerations of nanotechnology. | | | | | | | | |
| 5 | CHALLENGES AND FUTURES | | | Total Hrs | | 9 | | |
| Nanotechnology – the frame of worker training, public education, and participation – Introduction – Nanotoxicity – Workers protection – International documents – protection of medical staff – Nurses education – Public information. Occupational risk assessment and management – focus on nanomaterials. | | | | | | | | |
