

# K.S. Rangasamy College of Technology

(Autonomous)

## Curriculum & Syllabus of M.Tech. Textile Technology

(For the batch to be admitted in 2023 – 2024)

### R 2022

Accredited by NAAC A++ Grade  
Approved by AICTE, Affiliated to Anna University, Chennai.

KSR Kalvi Nagar, Tiruchengode – 637 215.  
Namakkal District, Tamil Nadu, India.

Passed in BoS Meeting held on 22/12/2022  
Approved in Academics Council Meeting held on 07/01/2023

  
BoS Chairman  
Head of the Department  
Department of Textile Technology  
K S Rangasamy College of Technology  
TIRUCHENGODE-637 215

## Department of Textile Technology

### VISION

To be the centre of excellence in textile education, training, research and service.

### MISSION

- To enlighten the students about the latest technology in textile industries through innovative educational practices and multi-disciplinary approach.
- To engage with the industry as solution providers through consultancy.

### PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

- PEO1: Manufacturing Technique and Solutions to Problems:** Graduates are professionally competent in textile manufacturing technique and be able to identify problems and suggest suitable solutions.
- PEO2: Scientific Research Tools & Technology:** Graduates follow scientific and technological developments, to conduct research and prepare the technical reports.
- PEO3: Interdisciplinary Skills and Entrepreneurship:** Graduates will exhibit interdisciplinary skills that results in desired textile products in their career and develop entrepreneurial culture.

### PROGRAMME OUTCOMES (POs)

Engineering Graduates will be able to:

- PO1:** An ability to independently carry out research /investigation and development work to solve practical problems
- PO2:** An ability to write and present a substantial technical report/document
- PO3:** Demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level higher than the requirements in the appropriate bachelor program
- PO4:** Apply knowledge of textile technology towards disruptive innovation.
- PO5:** Analyze engineering concepts and apply sustainability goals to manage projects in multidisciplinary environments.
- PO6:** Lead quality assurance and research & development activities of textile industry.

### MAPPING OF PROGRAMME EDUCATIONAL OBJECTIVES (PEOs) WITH PROGRAMME OUTCOMES (POs)

The M.Tech. Textile Technology Programme Outcomes leading to the achievement of the Program Educational Objectives are summarized in the following table.

Programme Educational Objectives	Programme Outcomes					
	PO1	PO2	PO3	PO4	PO5	PO6
PEO 1	3	2	3	3	3	2

Passed in BoS Meeting held on 22/12/2022

Approved in Academics Council Meeting held on 07/01/2023

  
**BoS Chairman**  
Head of the Department  
Department of Textile Technology  
K S Rangasamy College of Technology

PEO 2	3	3	3	2	2	3
PEO 3	3	2	3	3	3	3

Contributions: 1- Low, 2- Medium, 3- High

**K.S. RANGASAMY COLLEGE OF TECHNOLOGY, TIRUCHENGODE - 637215**  
(An Autonomous Institution affiliated to Anna University)

### Courses of Study

(for the admitted batch in 2023-2024)

### Curriculum

#### SEMESTER I

S.No.	Course Code	Course Title	Category	Contact Periods	L	T	P	C
<b>THEORY</b>								
1.	60 PTT 101	Advanced Short Staple Spinning Technique	PC	3	3	0	0	3
2.	60 PTT 102	Process Control and Fabric Engineering	PC	3	3	0	0	3
3.	60 PTT 103	Quality Analysis of Textiles and Clothing	PC	3	3	0	0	3
4.	60 PTT 104	Statistical Application in Textile Engineering	PC	5	3	1	0	4
5.	60 PDB E26	Research Methodology and IPR	PC	3	3	0	0	3
6.	60 PTT E1*	Professional Elective I	PE	3	3	0	0	3
7.	60 PAC 001	English for Research Paper Writing	AC	2	2	0	0	0
<b>PRACTICALS</b>								
8.	60 PTT 1P1	Quality Evaluation Laboratory	PC	4	0	0	4	2
<b>Total</b>				<b>26</b>	<b>20</b>	<b>1</b>	<b>4</b>	<b>21</b>

#### SEMESTER II

S.No.	Course Code	Course Title	Category	Contact Periods	L	T	P	C
<b>THEORY</b>								
1.	60 PTT 201	Structural Mechanics of Textile Structures	PC	3	3	0	0	3
2.	60 PTT 202	Advances in Chemical Processing	PC	3	3	0	0	3
3.	60 PTT 203	Industrial Textiles	PC	3	3	0	0	3
4.	60 PTT 204	Clothing Comfort	PC	3	3	0	0	3
5.	60 PTT E2*	Professional Elective II	PE	3	3	0	0	3
6.	60 PTT E3*	Professional Elective III	PE	3	3	0	0	3
7.	60 PAC 002	Disaster Management	AC	2	2	0	0	0
<b>PRACTICALS</b>								
8.	60 PTT 2P1	Textile Product Development Laboratory	PC	6	0	0	6	3
9.	60 PTT 2P2	Term Paper and Seminar	CG	2	0	0	2	0
<b>Total</b>				<b>28</b>	<b>20</b>	<b>0</b>	<b>8</b>	<b>21</b>

Passed in BoS Meeting held on 22/12/2022

60 PTT 101	Advanced Short Staple Spinning Technique	Category	L	T	P	Credit
		PC	3	0	0	3

### Objectives

- To enable the students to learn the theory of various operations.
- To learn different stages of yarn spinning.
- To understand the influence of various parameters on quality and productivity of short staple yarn

### Pre-requisites

- Nil

### Course Outcomes

On the successful completion of the course, students will be able to

CO1	Theory of opening and cleaning in spinning preparatory machine, generation of hooks, neps and rectification.	Understand
CO2	Wire and roller drafting technology involved, their limitation and scope for improvement.	Analyse
CO3	Theory of twisted yarn with their effects on quality and productivity.	Understand
CO4	Knowledge on different twisting methods.	Understand
CO5	Influences of fiber bending on yarn uniformity and their types of levelling.	Understand

### Mapping with Programme Outcomes

<b>Course Contents and Lecture Schedule</b>		
<b>S. No</b>	<b>Topic</b>	<b>No. of Hours</b>
<b>Module 1: Fibre Dispersion and Cleaning (Total: 10 Hours)</b>		
1.1	Necessity of fibre-individualization	1
1.2	Fibre opening and cleaning in blow-room machinery	1
1.3	Forces acting on the fibre during carding operation	1
1.4	Mechanism of fibre dispersion, fibre transfer, short fibre removal, and trash removal	2
1.5	Entanglement and disentanglement of fibres	1
1.6	Theory of hook formation	1
1.7	New approaches to improve fibre-dispersion in carding	2
1.8	Mechanism of removal of short fibres, neps, and trash in comber	1
<b>Module 2: Attenuation and Fibre Straightening (Total: 10 Hours)</b>		
2.1	Principle of roller drafting and its application in yarn production	1
2.2	Ideal drafting; factors affecting drafting force	1
2.3	Fibre dynamics during drafting and drafting irregularities – causes and remedies	2
2.4	Amount of draft and draft distribution on strand irregularity	1
2.5	Function of aprons in roller drafting	1
2.6	Limitations of apron-drafting and scope for improvement	1
2.7	Mechanism of wire-point drafting and its application in yarn production	1
2.8	Comparison of wire-point drafting with roller drafting; influence of fibre-extent on yarn quality	1
2.9	Improvement of fibre-extent by carding, drafting, and combing actions	1
<b>Module 3: Twisting (Total: 8 Hours)</b>		
3.1	Twisted yarn geometry; forces acting on fibre and yarn during twisting	2
3.2	Effect of fibre helix angle on strength, parameters affecting optimum twist level	2
3.3	Balloon and spinning triangle formation and their effects on yarn quality and productivity	2
3.4	Fundamental requirements to create real twist in a strand; mechanism of twisting in ring spinning	2
<b>Module 4: Twisting Methods (Total: 8 Hours)</b>		
4.1	Separation of twisting and winding actions of yarn; ply twisting, twist balance	2
4.2	Modified twisting principles – open-end twisting, false twisting	2
4.3	Air-jet twisting, air-vortex twisting, up-twisting, two-for-one twisting	2
4.4	Hollow-spindle twisting; merits and demerits of modern twisting systems	2
<b>Module 5: Fibre Blending and Levelling (Total: 9 Hours)</b>		
5.1	Importance of achieving homogeneous blending in fibre-mix	1
5.2	Types of mixing during spinning preparatory process	1
5.3	Lateral and longitudinal fibre blending	1
5.4	Analysis of fibre blend index values	2
5.5	Process parameters of spinning machinery for processing blended material	2
5.6	Influence of intermediate product uniformity on yarn uniformity	1
5.7	Different methods of levelling adopted during spinning processes	1

		PC	3	0	0	3

### Objectives

- To understand theory of preparation of yarn for fabric formation.
- To impart knowledge on different types of fabric formation techniques
- To understand selection and control of process variables during preparatory and fabric formation.

### Pre-requisites

- Nil

### Course Outcomes

On the successful completion of the course, students will be able to

CO1	Knowledge on winding, warping and sizing for weaving preparation process.	Remember
CO2	Explain design developments and process parameters during weaving.	Understand
CO3	Explain design developments and process parameters during weft knitting.	Understand
CO4	Describe technical developments & machine details of Nonwoven machine.	Understand
CO5	Advancement in 3D weaving and 3D braiding technique.	Understand

Semester	Hours/Week			Total Hours	Credit	Maximum Marks		
	L	T	P			C	CA	ES
I	3	0	0	45	3	40	60	100
<b>Weaving Preparation</b>								
Yarn quality requirements - weaving and knitting; winding - yarn faults, quality of splice/knot, knot factor and clearing efficiency, Optimum clearing of yarn; wound yarn package requirements for different weft insertion system and high speed knitting warping; control of ends break in warping, warp beam quality requirements; quality control in size recipe, size pick-up control, yarn stretch control, quality requirements of sized beam – defects and their causes and remedies. Control of productivity in winding, warping and sizing; Waste control in winding, warping and sizing.								9
<b>Weaving</b>								
Loom accessories – quality requirements and its effects on loom performance; control of cross ends and missing ends. Loom shed productivity control – loom speed, loom efficiency, loom stops. Fabric quality control – fabric defects and their causes and remedies; process control for weaving filament, blend yarn and dyed yarn.								9
<b>Knitting</b>								
Types of stitches and their influence on knit fabric properties; weft knitting – method of setting the machine, factors affecting the formation of loops in weft knitting, performance of different yarns, Fabric defects- causes and remedies.								9
<b>Non-Woven</b>								
Quality control in web preparation; Influence of material and process parameters on fabric quality and performance.								9
<b>Unconventional Fabric Formation</b>								
3D Fabrics – Structure, Comparison of 2D and 3D fabrics, classifications; Multilayer fabrics – theory, weaving process, fabric properties, applications; 3 D orthogonal weaving – weaving principles, properties and applications; 3D Braiding – 2D braiding, 3 D braiding, multilayer interlock braiding, properties and applications of braided fabric ; concept of 3D multi axial warp knitting.								9

S. No	Topic	No. of Hours
<b>Module 1: Weaving Preparation (Total: 9 Hours)</b>		
1.1	Yarn quality requirements for weaving and knitting	2
1.2	Winding: yarn faults, quality of splice/knot, knot factor, and clearing efficiency	2
1.3	Optimum clearing of yarn; wound yarn package requirements for different weft insertion systems and high-speed knitting warping	1
1.4	Control of ends break in warping; warp beam quality requirements	1
1.5	Quality control in size recipe, size pick-up control, yarn stretch control	1
1.6	Quality requirements of sized beam – defects, causes, and remedies	1
1.7	Control of productivity in winding, warping, and sizing; waste control	1
<b>Module 2: Weaving (Total: 9 Hours)</b>		
2.1	Loom accessories – quality requirements and effects on loom performance	2
2.2	Control of cross ends and missing ends	1
2.3	Loom shed productivity control – loom speed, efficiency, and stops	2
2.4	Fabric quality control – fabric defects, causes, and remedies	2
2.5	Process control for weaving filament, blend yarn, and dyed yarn	2
<b>Module 3: Knitting (Total: 9 Hours)</b>		
3.1	Types of stitches and their influence on knit fabric properties	2
3.2	Weft knitting – method of setting the machine	2
3.3	Factors affecting the formation of loops in weft knitting	2
3.4	Performance of different yarns in knitting	2
3.5	Fabric defects in knitting – causes and remedies	1
<b>Module 4: Non-Woven (Total: 9 Hours)</b>		
4.1	Quality control in web preparation	3
4.2	Influence of material and process parameters on fabric quality and performance	6
<b>Module 5: Unconventional Fabric Formation (Total: 9 Hours)</b>		
5.1	3D fabrics – structure, comparison of 2D and 3D fabrics, classifications	2
5.2	Multilayer fabrics – theory, weaving process, fabric properties, applications	2
5.3	3D orthogonal weaving – weaving principles, properties, and applications	2
5.4	3D braiding – 2D braiding, 3D braiding, multilayer interlock braiding, properties, and applications of braided fabric	2
5.5	Concept of 3D multi-axial warp knitting	1

60 PTT 103	Quality Analysis of Textiles and Clothing	Category	L	T	P	Credit
		PC	3	0	0	3

### Objectives

- To understand different characteristics of yarns and fabrics
- To understand the effects of fabric characteristics on its end uses
- To test the yarn and fabric samples
- To analyse the various reports generated during quality evaluation of yarns and fabrics
- To interpret the results obtained through these reports for process and quality control.

### Pre-requisites

- Nil

### Course Outcomes

On the successful completion of the course, students will be able to

CO1	Use various tools of testing and analysis for the data in order to draw relevant conclusions	Apply
CO2	Analysis variants length curves and determination of wave length from spectrum	Analyse
CO3	Influence of tensile properties on yarn.	Analyse
CO4	Evaluate comfort and low stress mechanical properties	Analyse
CO5	Evaluation of fabric properties and influence on fabric appearance.	Analyse

60 PTT 104	Statistical Application in Textile Engineering	Category	L	T	P	Credit
		PC	3	1	0	4

### Objectives

- To understand probability distributions and estimation theory
- To familiarize the students with various methods in hypothesis testing
- To understand the concept of analysis of variance
- To gain knowledge on process control using charts and process capability
- To design of experiments for textile applications.

### Pre-requisites

- Nil

### Course Outcomes

On the successful completion of the course, students will be able to

CO1	Apply discrete and continuous distributions concepts in engineering problems	Apply
CO2	Test the statistical hypothesis using normal, t and F and chi-square test	Apply
CO3	Make decisions with minimum error from available data	Apply
CO4	Study the capability of process and control the process	Apply
CO5	Design and analysis the experiments	Apply

### Objectives

- To understand the principles of research process.
- To develop knowledge in analytical skills for collection of research data.
- To understand the procedure in the preparation of reports.
- To accomplish basic idea about the process involved in intellectual property rights.
- To enlighten the process of patent filing.

### Pre-requisites

- Nil

### Course Outcomes

On the successful completion of the course, students will be able to

CO1	To understand the research process and design.	Understand
CO2	To gain the knowledge about sources and collection of research data	Understand
CO3	To understand the procedure of data analysis, preparation of reports and checking plagiarism	Analyse
CO4	To gain the knowledge on Trade mark and functions of UNESCO in IPR	Understand
CO5	To enlighten the benefits, E-filing and Examinations related to patents	Apply

### Objectives

- Characteristics of textile materials and their related models to describe their properties.
- Conducting experiments to characterize the polymers and fibres

### Pre-requisites

- Nil

### Course Outcomes

On the successful completion of the course, students will be able to

CO1	Demonstrate the ability to choose methods appropriate to research problem.	Apply
CO2	Develop skills in qualitative and quantitative data analysis, write report and presentation	Apply
CO3	Knowledge on national and international intellectual property rights.	Apply
CO4	Knowledge on Patent information and Rights	Analyse
CO5	Enlighten the new development in IPR	Apply

60 PTT 201	Structural Mechanics of Textile Structures	Category	L	T	P	Credit
		PC	3	0	0	3

### Objectives

- The structure of ideal and real yarn, migration of fibres in the yarn, breakage mechanism of yarn, mechanics of blended yarns and relationship between structure and property of yarns.
- Geometrical properties of fabrics and its relationship with the mechanical properties of fabric and
- Theory and evaluation of fabric hand.

### Pre-requisites

- Nil

### Course Outcomes

On the successful completion of the course, students will be able to

CO1	Analyses of yarn structure and measurements of various parameters and fundamental research works in this area	Analyse
CO2	Knowledge on fiber migration and their characteristics	Understand
CO3	Knowledge on yarn characteristics and blending mechanism	Understand
CO4	Understand the anatomy of woven structure	Understand
CO5	To know the bending deformation of woven	Understand

60 PTT 204	Clothing Comfort	Category	L	T	P	Credit
		PC	3	0	0	3

### Objectives

- To Know about important characteristics of the fabrics
- To differentiate phenomena which take place in the fabric related to the comfort properties of the fabric.
- To know liquid transfer and water absorption through fabrics.
- To analyze the comfort properties of yarns and fibres.
- To understand the physical properties of clothing and comfort of fabrics.

### Pre-requisites

- Nil

### Course Outcomes

On the successful completion of the course, students will be able to

CO1	Understand different phenomena such as wetting, wicking, heat and moisture interaction	Understand
CO2	Correlate the property of the fabric with comfort to the wearer.	Apply
CO3	Under the concept of moisture transport in clothing.	Understand
CO4	Analyze the parameters expressing heat and mass transmission, air permeability.	Analyse
CO5	Gain knowledge on water holding property, radiation exchange and flammability property	Understand

Semester	Hours/Week			Total Hours	Credit	Maximum Marks		
	L	T	P			C	CA	ES
II	3	0	0	45	3	40	60	100
<b>Concept of Clothing</b> Need and selection of clothing - definition of comfort - components of clothing comfort - Subjective perception of comfort: Psycho-Physiological factors of clothing - Aesthetic concepts of clothing - Various aspects of clothing comfort: thermal comfort - sensorial comfort - body movement comfort. Comfort variables: Thermal and non-thermal comfort variables.								9
<b>Thermal Management in Clothing</b> Human-clothing-environment system - Thermo-regulation in human body - Heat balance - Heat loss - Thermoregulation through clothing system: Heat exchange through clothing. Thermal comfort of clothing - Measurement of thermal transmission characteristics - Parameters for expressing thermal characteristics - Effect of body motion and wind.								9
<b>Moisture Management in Clothing</b> Moisture transport - Liquid water transfer: wicking and water absorption - Principles of moisture vapour transfer - Evaluation of moisture vapour transmission - Factors affecting heat and mass transfer through fabrics- Parameters expressing heat and mass transmission- Air permeability and measurement.								9
<b>Comfort Properties of Fibers, Yarns and Fabric</b> Comfort properties of fibers: Physical modification of fibers - Comfort properties of yarns: Effect of yarn structure characteristics, effect of spinning technique, texturizing - Comfort properties of fabric structures: Fabric constructional parameters, finishing.								9
<b>Comfort Property of Clothing</b> Physical Properties of Clothing and Comfort: Thermal resistance – Water vapour diffusion resistance – Water holding property – Effect of fabric properties – Radiation exchange – Flammability – Clothing with internal spaces.								9

60 PTT 2P1	Textile Product Development Laboratory	Category	L	T	P	Credit
		PC	0	0	6	3

### Objectives

- To enable the student to design, innovate and develop a product that can be commercialized

### Pre-requisites

- Nil

### Course Outcomes

On the successful completion of the course, students will be able to

CO1	Describe the significance of product development in textiles and its overall design logic.	Understand
CO2	Explain the market research, product life cycle and bench marking with suitable examples in textiles.	Understand
CO3	Apply the knowledge of simulation for product development.	Apply
CO4	Study & Analyze the techno economics of each of the case studies.	Analyse
CO5	Evaluate the end product usage.	Analyse

60 PTT 2P2	TERM PAPER AND SEMINAR	Category	L	T	P	Credit
		PC	0	0	2	0

### Objectives

- Students will develop their scientific and technical reading and writing skills that they need to understand and construct research articles.
- A term paper requires a student to obtain information from a variety of sources (i.e., Journals, dictionaries, reference books) and then place it in logically developed ideas.
- To identify the recent topics in the research area and formulate the problem
- To analyze the mathematical model for the identified problem
- To design and simulate/ develop prototype model.

### Pre-requisites

- Nil

### Course Outcomes

On the successful completion of the course, students will be able to

CO1	Survey the relevant bibliography such as national/international referred journals for the preferred areas of research	Understand
CO2	Develop scientific, technical reading and writing skills for the technical report preparation to apply it in their topics of research	Apply
CO3	Apply mathematical ideas to any problem in the research field	Apply
CO4	Implement and analyze the various complex problems in different practical applications	Analyse
CO5	Cultivate presentation skills to deliver their work in front of technically qualified audience	Apply

<b>The work involves the following steps:</b> 1. Selecting a subject, narrowing the subject into a topic. 2. Stating an objective. 3. Collecting the relevant bibliography (at least 15 journal papers) 4. Preparing a working outline. 5. Studying the papers and understanding the authors contributions and critically analysing each paper. 6. Preparing a working outline. 7. Linking the papers and preparing a draft of the paper. 8. Preparing conclusions based on the reading of all the papers. 9. Writing the Final Paper and giving final Presentation Please keep a file where the work carried out by you is maintained. Activities to be carried out							[9]	
Activity	Instructions				Submission week	Evaluation		
Selection of area of interest and Topic	An area of interest, topic has to be selected and objective to be framed				2 <sup>nd</sup> week	3 % Based on clarity of thought, current relevance and clarity in writing		
Stating an Objective								
Collecting Information about chosen area & topic	1.List 1 Special Interest Groups or professional society 2.List 2 journals 3.List 3 conferences, symposia or workshops 4. List 1 thesis title 5. List 5 web presences (mailing lists, forums, News sites) 6. List 6 authors who publish regularly in your area 7. Attach a call for papers (CFP)from your area. 8. Conference/Journal/Symposium in the chosen area.				3rd week	3% (the selected information must be area specific and of international and national standard)		
Collection of Journal papers in the topic in the context of the objective – collect 20 & then filter	<ul style="list-style-type: none"> <li>• Provide a complete list of references you will be using- Based on the objective -Search various digital libraries and Google Scholar</li> <li>• When picking papers to read - tryto:</li> <li>• Pick papers that are related to each other in some ways and/or that are in the same field so that a meaningful survey can be written</li> <li>• Favour papers from well-known journals And conferences,</li> <li>• Favour—firstllor foundationallpapers in the field (as indicated in other people’s surveypaper),Favour more recent papers,</li> <li>• Pick a recent survey of the field so you can quickly gain an overview,</li> <li>• Find relationships with respect to each other and to your topic area (classification scheme/categorization)</li> <li>• Mark in the hard copy of papers whether complete work or section/sections of the paper are being considered</li> </ul>				4th week	6% (the list of standard papers and reason for selection)

60 PTT 3P1	PROJECT WORK – PHASE I	Category	L	T	P	Credit
		PC	0	0	12	6

### Objectives

- To impart practical knowledge to the students and also to make them to carry out the technical procedures in their project work.
- To provide an exposure to the students to refer, read and review the research articles, journals and conference proceedings relevant to their project work and placing this as their beginning stage for their final presentation
- To Independently carry out research / investigation and development work to solve practical problems in the field of Textile
- To write and present a substantial technical report / document in the field of Textile
- To demonstrate the Research findings in Textile domain

### Pre-requisites

- Nil

### Course Outcomes

On the successful completion of the course, students will be able to

CO1	Survey the relevant literature such as books, national/international refereed journals and contact resource persons for the selected topic of research.	Understand
CO2	Use different experimental techniques/different software/computational/analytical tools.	Apply
CO3	Design and develop an experimental set up/ equipment/testing.	Analyse
CO4	Conduct tests on existing setups / equipment's and draws logical conclusions from the results after analyzing them.	Analyse
CO5	Work in a research environment or in an industrial environment	Apply

60 PTT 4P1	PROJECT WORK – PHASE II	Category	L	T	P	Credit
		PC	0	0	24	12

### Objectives

- This enables and strengthens the students to carry out the project on their own and to implement their innovative ideas to forefront the risk issues and to retrieve the hazards by adopting suitable assessment methodologies and starting it to global.

### Pre-requisites

60 PTT 3P1

### Course Outcomes

On the successful completion of the course, students will be able to

CO1	Describe the problem /idea and review and summarize the literature for the topic of the identified problem	Apply
CO2	Illustrate the suitable design of experiments including experimental plan.	Apply
CO3	Explain the concepts of design and development of selected research work.	Apply
CO4	Construction, and fabrication of innovative product/system for the project title	Analyse
CO5	Use various tools of testing and statistical analysis for the data in order to draw relevant conclusions.	Apply

III	0	0	24	90	12	60	40	100
<p>It is a continuation of Project work started in semester III. Students have to submit the report in prescribed format and also present a seminar. The dissertation should be presented in standard format as provided by the department. The candidate has to prepare a detailed project report consisting of introduction of the problem, problem statement, literature review, objectives of the work, methodology (experimental set up or numerical details as the case may be) of solution and results and discussion. The report must bring out the conclusions of the work and future scope for the study. The work has to be presented in front of the examiners panel consisting of an approved external examiner, an internal examiner and a guide, co-guide etc. as decided by the Head and PG coordinator. The candidate has to be in regular contact with his/her guide.</p>

60 PTT E11	Alternative Spinning Systems	Category	L	T	P	Credit
		PC	3	0	0	3

### Objectives

- To understand theory of yarn formation by rotor spinning,
- To understand friction spinning, air-jet spinning and other spinning systems
- To know effect of process parameters used in the spinning system on yarn quality.

### Pre-requisites

- Nil

### Course Outcomes

On the successful completion of the course, students will be able to

CO1	Explain the process parameters for producing rotor spun yarn.	Understand
CO2	Understand DREF-2, DREF-3 spinning systems	Understand
CO3	Gain knowledge on air vortex spinning technique.	Understand
CO4	Understand the concept of new spinning technologies	Understand
CO5	Gain knowledge on wrap yarn and their applications.	Understand

**Course Contents and Lecture Schedule**

S.No.	Topic	Total Hours
1.1	Introduction to Yarn Geometry: Elements of Yarn Geometry	1
1.2	Geometry of Helix and Its Application to Yarn Structures	2
1.3	Yarn Diameter and Packing of Fibers in Yarn	2
1.4	Estimation of Packing Density and Radial Packing Density	2
1.5	Geometry of Folded Yarns	2
2.1	Migration Characteristics in Continuous Filament and Spun Yarns	2
2.2	Effect of Various Parameters on Migration	2
2.3	Measurement of Fiber Migration in Yarn; Effect of Migration on Tensile Behavior and Hairiness	2
3.1	Analysis of Tensile Behavior: Continuous Filament and Spun Yarn	2
3.2	Prediction of Yarn Breakage	1
3.3	Effect of Fiber Properties and Geometrical Configuration on Tensile and Bending Properties of Yarn	2
3.4	Design of Yarn Structures for Functional Uses	1
4.1	Blended Yarn Mechanics: Blend Irregularity and Measurement of Blending Irregularity	2
4.2	Concept of Elongation Balance	2
4.3	Effect of Properties of Constituent Fibers and Blend Composition on Behavior of Blended Yarns	2
5.1	Structure-Property Relationship in Yarns Produced from Ring Spinning, Rotor Spinning, Friction Spinning, and Airjet Spinning Systems	3
5.2	Structure-Property Relationship in Yarns Produced from Other New Spinning Systems	2

60 PTT E22	High performance and specialty fibres	Category	L	T	P	Credit
		PC	3	0	0	3

### Objectives

- To understand advanced spinning technology
- To gain knowledge on manufacturing high performance fibres
- To impart knowledge on the properties and applications of high performance fibre.

### Pre-requisites

- Nil

### Course Outcomes

On the successful completion of the course, students will be able to

CO1	Understand the method of producing high performance fibres	Understand
CO2	Gain knowledge on the industrial applications of various fibers	Understand
CO3	Understand properties and applications of fibers for medical field	Understand
CO4	Gain knowledge on speciality fibres and its applications	Understand
CO5	Understand the properties of chemical and thermal resistant fibers	Understand

60 PTT E31	Process Control and Optimization in Yarn Spinning	Category	L	T	P	Credit
		PC	3	0	0	3

### Objectives

- The process control at different stages of spinning preparatory.
- To understand Ring spinning process to achieve yarn of required quality
- To analyze the influence on yarn quality, process changes for processing of manmade fibres
- To know the control of comber preparatory process; noil%, combing efficiency and neps removal efficiency of comber.

### Pre-requisites

- Nil

### Course Outcomes

On the successful completion of the course, students will be able to

CO1	Understand the process variables and their control in blowroom process	Understand
CO2	Optimize, assess and control card sliver quality	Analyse
CO3	Gain knowledge draw frame and combing process	Understand
CO4	Understand the quality assessment and control in roving and ring spinning	Understand
CO5	Gain knowledge on the limitation of spinning machinery and new concepts for higher production	Understand

60 PTT E33	Financial Management in Textile Industry	Category	L	T	P	Credit
		PC	3	0	0	3

### Objectives

- To understand the basic concepts of financial accounting and capital budgeting.
- To practice the fundamental concepts of costing and costing systems followed in apparel industry.
- To know about the costing of textile products
- To gain knowledge on different sources of finance, cost of capital and investment appraisal techniques and financial statements.

### Pre-requisites

- Nil

### Course Outcomes

On the successful completion of the course, students will be able to

CO1	Understand the concepts of Financial Management and capital budgeting.	Understand
CO2	Understand importance of principles and concepts of working capital, operating cycle, determinants of working capital.	Understand
CO3	Gain knowledge on the basic concepts of cost accounting	Understand
CO4	Understand basic concepts of different costing systems.	Understand
CO5	Calculate the CMT costing technique for garment production	Apply

<b>Introduction About Control System</b> Instrumentation and Transducers: Functional Description of Instruments; Types and applications of Instrumentation - generalized configuration - Tribo electric pick-up, Infrared Transducers - Torque Measurement Elastic transducers - sound level meter - vibration measurements. Control System Components: Basics of control system – Control system examples - Stepper motors - Hydraulic valves - Pneumatic switches, proximity switches and flapper valves - Hydraulic and Pneumatic automation in textile machines- simple sequential logic circuit design - Programmable Logic Controllers (PLC), Block diagram – programming methods – programs – applications of PLC in textile machinery.								9
<b>Industrial automation</b> Industrial Automation: Introduction, integration, material handling system, simple systems for motions by electrical and mechanical devices- Mechanical design for automatic feeding assembly and transfer lines. Electronic Textile Instruments: Electronic principles in evenness tester, classification of faults, digital fibrograph, hairiness meter, Vibroscope - thickness measuring instruments, HVI, AFIS, Universal tensile testers.								9
<b>Control System &amp; Automation In Spinning Industry</b> Control System and Automation in Spinning Machinery: Machinery material flow and its variation controls – Feeders and Stop motions – Auto levelers – safety switches. Production and quality monitors – Full doff and pre-set length monitors. Data acquisition system for spinning preparatory, ring spinning and rotor spinning. On-line monitoring system, case studies.								9
<b>Control System &amp; Automation In Weaving Industry</b> Control System and Automation in Weaving Machinery: Yarn clearer controls - knotter /splicer carriage controls - pre-set length/full cone monitors. Warping machine monitors and controls - sizing machine monitors and controls - auto-reaching/drawing-in and knotting machine monitors and controls. Data acquisition system in weaving preparatory and weaving – humidification system.								9
<b>Computerised Processing In Textiles</b> Computerised Processing: CAD/CAM/CIM in spinning, Weaving, Dyeing, Printing and Apparel production. Electronic Data Interchange and E-com, internet commerce, Business strategy in E-com, Application of E-com in textile industry – Robotics in textile industries.								9
<b>Total Hours:</b>								<b>45</b>

60 PTT E52	Design and Analysis of Textile Experiments	Category	L	T	P	Credit
		PC	3	0	0	3

### Objectives

- To know the fundamentals of experimental design
- To select the suitable design
- To analyse the results.

### Pre-requisites

- Nil

### Course Outcomes

On the successful completion of the course, students will be able to

CO1	Understand the fundamentals of experimental design	Understand
CO2	Gain Knowledge on the single factor textile experiments	Apply
CO3	Gain knowledge on multifactor textile experiments	Apply
CO4	Analyse the special experimental designs for textile applications	Analyse
CO5	Evaluate by Taguchi methods techniques for textile engineering	Analyse

### Mapping with Programme Outcomes

60 PTT E63	Process Control in Textile Wet Processing	Category	L	T	P	Credit
		PC	3	0	0	3

### Objectives

- To know the basics of process control
- To learn about the determination of fastness and finishing properties
- To understand the importance of eco friendly processing

### Pre-requisites

- Nil

### Course Outcomes

On the successful completion of the course, students will be able to

CO1	Understand the importance of process control in chemical processing	Understand
CO2	Determine the fastness properties of textile fabrics	Apply
CO3	Determine the finishing properties of textile fabrics	Apply
CO4	Gain knowledge on computer colour matching	Understand
CO5	Understand the various methods in eco friendly process	Understand

### Mapping with Programme Outcomes

M. Tech Textile Technology								
60 PTTE 63 – Process Control in Textile Wet Processing								
Elective	Hours/Week			Total Hours	Credit	Maximum Marks		
	L	T	P			C	CA	ES
VI	3	0	0	45	3	40	60	100
<b>Introduction to Process control</b> Definition of Process control and Quality control – Need for quality control in textile wet processing – Flow charts indicating Process control and Quality control tests to be carried out in Desizing, Scouring, Bleaching, Souring, Mercerizing, Dyeing, Printing and finishing – Identification and estimation of residual starch – Determination of weight loss during Desizing and Scouring –Estimation of Residual Wax content and Total wax content by Soxhlet extraction method –Estimation of Copper number.								9
<b>Determination of fastness properties</b> Determination of ash content – Determination of Whiteness and Whiteness retention - Determination of Barium Activity number – Shrinkage of fabric – Determination of Light fastness by xenon Arc lamp – Determination of fastness to Washing – Determination of fastness to Dry and Wetrubbing –Determination fastness to Alkaline and Acidic Perspiration.								9
<b>Determination of finishing properties</b> Determination of efficiency of Water Proofing – Determination of efficiency of Flame Proofing – Determination of efficiency of Starching, by Bending length method – Determination of efficiency of Resin finishing by CRA. Estimation of residual formaldehyde present in resin finished fabric, Evaluation of efficiency of wetting agent by Sinking Time method – Evaluation of Dispersing agent – Evaluation of efficiency of detergents by Foam stability test – Identification of various fibres like Cotton, Viscose, Polyester, Wool, Acrylic and Nylon.								9
<b>Computer colour matching system</b> Estimation of Purity of dyes by Dyeing Trails and by using Spectrophotometer. Concept of Computer Colour matching – Advantages of Computer colour matching system and its limitations –Working principle of computer colour matching – Estimation of purity of Sodium Hydrosulphite, Sodium Nitrite, Sodium silicate – Estimation of strength of Hydrogen peroxide.								9
<b>Eco-friendly processing</b> Necessary of Eco-friendly processing – Concept of Eco-Friendly processing – The German Ban –List of banned Amines and Chemicals – Alternatives – Eco-labelling.-Tolerance limits of chemicals and auxiliaries in the export fabrics – Possible sources of contamination of red listed chemicals –ISO 14000 certification. Brief mention about the instruments used for measuring the various eco parameters.								9

60 PAC 003	CONSTITUTION OF INDIA	Category	L	T	P	Credit
		PC	2	0	0	0

### Objectives

- Understand the premises informing the twin themes of liberty and freedom from a civil rights perspective.
- To address the growth of Indian opinion regarding modern Indian intellectuals' constitutional. Role and entitlement to civil and economic rights as well as the emergence nation hood in the early years of Indian nationalism.
- To address the role of socialism in India after the commencement of the Bolshevik Revolution in 1917 and its impact on the initial drafting of the Indian Constitution.

### Pre-requisites

- Nil

### Course Outcomes

On the successful completion of the course, students will be able to

CO1	Discuss the growth of the demand for civil rights in India for the bulk of Indians before the arrival of Gandhi in Indian politics.	Understand
CO2	Discuss the intellectual origins of the framework of argument that informed the conceptualization of social reforms leading to revolution in India	Analyse
CO3	Discuss the circumstances surrounding the foundation of the Congress Socialist Party [CSP] under the leadership of Jawaharlal Nehru and the eventual failure of the proposal of direct elections through adult suffrage in the Indian Constitution.	Apply
CO4	Discuss the passage of the Hindu Code Bill of 1956.	Understand
CO5	Discuss the role and functioning of election commission of India.	Analyse
